

# Statement of Purpose

## Introduction

My name is **Skanda Gowda**, and I am from India. I feel extremely grateful for an opportunity to present itself wherein I can apply for the **Master of Science** program in **Digitalization and Automation** at **PFH**. My area of educational interest is centred around Material Science which is my main motivator for pursuing this program.

## Academics, Projects, Technical Skills

My graduation concluded in July of 2024 in Bachelor of Technology in Mechanical Engineering from PES University, Bengaluru, Karnataka, India. Throughout the program, I came into contact with subjects like Control Engineering, Heat Transfer, Engineering Mechanics - Statics, Engineering Physics, Engineering Chemistry, Mechatronics and MEMS, etc., that proved to be great points of learning. I completed my 10<sup>th</sup> Standard exams in April 2018 with a score of **85.76% (German Grade: 1.6)**. Then my 12<sup>th</sup> Standard exams in March 2020 secured me the score of **86.33% (German grade: 1.6)**.

In the duration of my undergrad, I have successfully presented a project for my bachelor's degree titled "Fabrication of 3 Axis Engraving Machine." The focal aim of this project was to build a portable engraving tool that could engrave on wood and metal, among other surfaces. This project required fabrication, assembly, and testing to ensure accuracy and precision. Apart from this, I have completed a course of short duration like "AutoCAD Essential" from CADD Centre Training Services in Bangalore, India, to nurture my technical skills. I also undertook the **IELTS** exam in August 2024 in which I secured an **overall band score of 7.0 along with 7.5 in listening and 7.0 in reading**.

## Why Germany?

I am now eager to draw my academic journey forward by applying for Master's abroad. I chose Germany as the country to pursue my Master's in because of its reputation in World Education. Germany places great value on education, especially in the field of science, and this is reflected in the high-quality teaching seen in the country. **The courses offered are constantly evolving to meet the changing standards of the world.** Not only is Germany more accepting towards cultural diversities, it also provides a safe environment for the international students. The exposure to diversity and German culture will enrich my learning experience. I believe that Germany's educational infrastructure will help me grow both professionally and individually. The country's diverse cultural and historical background, along with its tolerance and welcoming nature, make it an ideal place for international students to achieve success in their studies and personal development.

## Why PFH?

For me, selecting PFH makes sense. The university is acclaimed for its modern technological resources, expert instructors, and emphasis on real-world application. The research centers and the chance to collaborate with esteemed academicians in the fields of artificial intelligence and smart technology are especially appealing to me. The university offers the exact graduate program I'm seeking for with its esteemed staff, cutting-edge facilities, and challenging curriculum. With its focus on real-world experience and its solid relationships with top business executives, PFH will give me the professional network and real-world experience I need to excel in my career. Furthermore, the university attracts international students like me due to its location in a city renowned for its thriving cultural scene and good standard of living.

## Why This Course?

I am eager to pursue the **Master of Science** program in **Digitalization and Automation** at the University of Stuttgart. My fascination with this specialised area has developed through my undergrad journey. I will be able to contribute to the creation of creative solutions that enhance vehicle command processing and data transmission thanks to the information and abilities I get from this program. I'm especially curious to find out how automation and digitization might improve operational effectiveness and open up new growth prospects for the automotive sector. I have no doubt that the training I get at PFH will help me fulfill my professional goals and position me for success in the workplace.

## Conclusion

Therefore, based on my academic results, work experience, and genuine enthusiasm for mechanical engineering, I believe that the program of **Master of Science in Digitalization and Automation** is the perfect fit for me.

Thank you for taking the time to consider my application.

Thanking you,

Skanda Gowda
