

## Letter of Motivation

I am writing to express my keen interest in the **MSc program in Neuro-cognitive Psychology at the University of Oldenburg**. With a robust academic background in Clinical Psychology, complemented by significant practical experience and a deep passion for understanding the complexities of the human mind, I am eager to advance my knowledge and skills in this interdisciplinary field. The University of Oldenburg's reputation for cutting-edge research and its commitment to fostering innovative thinking make it the ideal place for me to pursue my graduate studies.

I completed my **Bachelor of Science in Clinical Psychology at Amity University Mumbai in February 2024, where I achieved a CGPA of 8.29, equivalent to a German grade of 2.03**. My coursework included Industrial Psychology, Psychological Disorders, Foundations of Personality, Social Psychology, Biological Psychology, Clinical Psychology, Counseling Psychology, and the Psychology of Gender. This comprehensive curriculum provided me with a solid grounding in both the theoretical and practical aspects of psychology, preparing me well for advanced studies in neuro-cognitive psychology.

My academic journey was marked by active participation in various extracurricular activities that honed my leadership and organizational skills. I served as the Placement Secretary of the Student Council and as the Vice Chair of the UNHRC at the Model United Nations (AMI-MUN) at Amity University. These roles allowed me to develop strong communication and teamwork skills, which I believe are essential for success in the field of neuro-cognitive psychology.

In addition to my academic achievements, I have pursued various certifications to enhance my skills. I completed a course in English and Communication Skills, a minor in English Literature, and a Foreign Language Course in German, acquiring a working knowledge of the language. **My proficiency in English is demonstrated by my IELTS score of 7.5, with individual scores of 8.0 in Listening and Reading, 7.5 in Speaking, and 7.0 in Writing, placing me at the CEFR Level C1.**

My interest in neuro-cognitive psychology is driven by a fascination with the intricate processes that underlie human cognition and behavior. I am particularly interested in exploring how cognitive functions are affected by neurological conditions and how this knowledge can be applied to develop effective interventions. The MSc program at the University of Oldenburg, with its emphasis on research and practical training, offers the perfect platform for me to deepen my understanding of these topics.

The University of Oldenburg's commitment to interdisciplinary research and its state-of-the-art facilities are particularly appealing to me. I am excited about the opportunity to work alongside leading researchers and to contribute to ongoing studies in neuro-cognitive psychology. The prospect of engaging in cutting-edge research and gaining hands-on experience in advanced methodologies is something I find incredibly motivating.

In my free time, I enjoy reading books, playing basketball, and traveling. These activities not only provide me with relaxation but also enhance my cognitive and physical well-being, keeping me balanced and focused on my academic and professional goals.

My long-term objective is to pursue a career in research and academia, focusing on the development of innovative approaches to understanding and treating cognitive and neurological disorders. I am confident that the MSc program at the University of Oldenburg will equip me with the knowledge, skills, and experiences necessary to achieve these goals.

**Thank you for considering my application. I am eager to bring my background in Clinical Psychology, my passion for neuro-cognitive research, and my commitment to academic excellence to the University of Oldenburg. I look forward to contributing to and growing within your esteemed program.**

Sincerely,

Radhika Vikas Yadav
