

Statement of Purpose

I, **Aamir Ahmad, Khan** belong to the city of **Varanasi in the state of Uttar Pradesh, India**. I have always been interested in various elements of technology and their possibilities to solve problems as well as to contribute to the betterment of people's lives. Such interest made me work to acquire a Bachelor's degree in Computer Science and Engineering with a specialization on Cloud Computing & Virtualization. I have been working with data and AI technologies within my academic and working experience. Witnessing transformations that occur around me because of Data Science and AI, it is the right time for me to have more knowledge, that is why I want to pursue a **Master in Data Science at the University of Mannheim**. This is actually the right time for me to improve my skills with more professional skills that will enable me to play a crucial role within this competitive new technology stream.

Academic Background: I completed my **10th at Central Board of Secondary Education New Delhi** in the year 2014. It carried a **9.0 CGPA**. This was the period when my love for technology and problem-solving skills needed to be instilled into me. In this pursuit, I did my **12th from Central Board of Secondary Education, New Delhi, India** in 2016 with **72%** aggregate in streams such as Physics, Chemistry, and Mathematics. This trained me before going for a **Bachelor of Technology in Computer Science and engineering** with an associated specification of **Cloud Computing & Virtualization** at **Galgotias University**, wherein I graduated with a **CGPA of 7.52** in the year 2021.

Throughout my Undergraduate years, I have always engaged myself with lots of projects and internships that developed me more in terms of knowledge of cloud computing and data management. I get in touch with database management during the **internship at Diesel Locomotive Works**. This Facial Emotion Recognition and Detection at **Kyrion Technologies Pvt. Ltd.**, immensely developed my interest in Artificial Intelligence (AI).

Professional Experience: I worked at **Cognizant Technology Solutions as Programmer Analyst Trainee from 21/07/2021 to 21/01/2022**. This was a job that required one to come up with full-stack applications as well as decide on the correct cloud platforms and approaches when deploying the solutions that we evolved and harnessing the capacity to develop data visualization of the outcomes. Then I worked in **Wipro Limited as a Project Engineer from 07/02/2022 to 12/08/2024** and my responsibility was to do SQL queries while I used to add flavors of analysis by using Python at my disposal. From this position, I was privileged to engage in formulating work solutions with a large dependence on data to improve the business's operations in the best way possible. It supported my knowledge of managing data and my experiences with cloud technologies.

Certifications, Training, and Extracurricular Activities: In May 2022, I earned a **Microsoft Certificate for Azure AI Fundamentals** while in October of 2021; I took and passed the exam that got me the **Microsoft Certificate for Azure Fundamentals**. I believe that both the certification programs grounded me with sound foundations of both AI and cloud computing. I undertook more **courses in Python Programming and Data Processing and Visualization through Coursera**, certified by the University of Michigan, which enhanced my capacity for data analysis.

Additionally, I had several workshops and training sessions. In October 2019, I attended a basic course in **Python**. In October of 2019, I took a course in the **basics of the Python programming language**. I undertook a practical workshop **on AI with Python in July 2019** thus preparing me on AI tools and techniques. I appeared for an **IELTS test and I scored 7 bands** conducted in January 2024. It will enable me to communicate effectively in an international academic environment. I was also engaged in extracurricular activities as well. I used to play **table tennis** and was an active **participant in the Dexterix Hackathon**, where I used to practice teamwork and problem-solving skills.

Why This Program: The University of Mannheim offers just what I am looking for- the Mannheim Master in Data Science. Throughout my undergraduate studies and internships, I have pursued a strong interest in data science, cloud computing, and AI. Though my exposure to work at Cognizant and Wipro had exposed me to SQL data optimization and Python-based data analysis, I feel that the need to promote one in this tech world which is continuously changing in a rapid pace definitely necessitates the upscaling of one's skills with more technical advancements of AI and data science. The course offered at Mannheim on MMDS will provide me with a blend of the theoretical and practical aspects, teaching me about machine learning, data analysis, and big data management. This course will enable me to work on high-tech projects and develop innovative solutions in solving real-life problems.

How This Course Will Benefit Me: It will provide me with technical skills and knowledge concerning AI and data science, and I will be able to perform well in both fields. I will be able to analyze and interpret large amounts of data, formulate AI models, and automate tasks for business efficiency. This Master's program will also expose me to new technologies such as natural language processing and predictive analytics, which are significant drivers of innovation in the tech industry. I will also receive good hands-on learning experience and exposure to research projects, wherein theoretical concepts could be applied to solve practical problems; thus, I should equip myself with the desired skills to make me an effective data scientist and AI professional.

Why the University of Mannheim? I chose the University of Mannheim because of its great reputation in data science, as well as focusing on interdisciplinary research. I perceived that Mannheim offered the right balance in theory and application very direction that I learn best with and where I would like my career to start. I am assured that with Mannheim's top-notch research facilities and experienced faculty, I will have the right environment in which to grow both academically and professionally. The MMDS program gives me great exposure in collaboration with industry leaders and experts, who will help me, establish my professional networks and open doors to interesting career opportunities within the tech world.

Why Germany for My Higher Education? The stronghold of high-grade education, particularly in science and technology is in Germany. Here, some of the main leaders of high-tech companies such as Siemens, SAP, and Bosch-which are at the current frontier of AI and data science-are located. Therefore, studying in Germany will provide me with access to the most advanced research and internships, and it will be easy to apply my knowledge to real-life situations. Germany has a tendency to focus on innovation and industry collaboration, which makes the country ideal to spend years doing my higher studies since it matches exactly to my interest in the subject of data science and AI.

Future Goals: In the short term, after my master's, I would like to work with international leaders in technology, including **Google, Microsoft, Siemens, and SAP, as a Data Scientist, AI Engineer, or Machine Learning Specialist**. I will be different from others within the tech space and lead innovative projects in AI beyond what people thought were normal. With my knowledge and skills in AI and data science, I am confident that I will be able to successfully carry out my professional goals and genuinely impact the tech industry.

Conclusion: The Master program in Data Science in Mannheim, from the University of Mannheim. Advanced data science techniques and AI are at the core of this program, so it will provide me with the skills I need for success and flourishing in the tech industry. I can only learn from the best, contribute to the latest research, and make a difference in AI and Data Science.

Aamir Ahmad, Khan
