

Statement of Purpose

I, **Aamir Ahmad, Khan** belong to the city of Varanasi in the Indian state of Uttar Pradesh. I, therefore, express my desire and passion for the course of technology which can solve real problems and enhance people's quality of life. This interest made me proceed and complete my Bachelor's Degree in Computer Science and Engineering with Specialization in Cloud Computing & Virtualization. I draw so much inspiration from seeing the impacts these fields of study are having on industries and on society in general. The diversity of perspectives will be important in seeing things from a broader picture. I hope to acquire deeper expertise through my M.Sc. I shall be proceeding with my **Master's degree in Computer Science at Philipps-University Marburg**, where I believe that my skills would be well honed and myself ready to contribute to the cutting-edge developments of technology.

Academic Background: I completed my **10th at Central Board of Secondary Education New Delhi** in the year 2014. It carried a **9.0 CGPA**. This was the period when my love for technology and problem-solving skills needed to be instilled into me. In this pursuit, I did my **12th from Central Board of Secondary Education, New Delhi, India** in 2016 with **72%** aggregate in streams such as Physics, Chemistry, and Mathematics. This trained me before going for a **Bachelor of Technology in Computer Science and engineering** with an associated specification of **Cloud Computing & Virtualization** at **Galgotias University**, wherein I graduated with a **CGPA of 7.52** in the year 2021.

Throughout my Undergraduate years, I have always engaged myself with lots of projects and internships that developed me more in terms of knowledge of cloud computing and data management. I get in touch with database management during the **internship at Diesel Locomotive Works**. This Facial Emotion Recognition and Detection at **Kyrion Technologies Pvt. Ltd.**, immensely developed my interest in Artificial Intelligence (AI).

Professional Experience: I worked at **Cognizant Technology Solutions as Programmer Analyst Trainee from 21/07/2021 to 21/01/2022**. This was a job that required one to come up with full-stack applications as well as decide on the correct cloud platforms and approaches when deploying the solutions that we evolved and harnessing the capacity to develop data visualization of the outcomes. Then I worked in **Wipro Limited as a Project Engineer from 07/02/2022 to 12/08/2024** and my responsibility was to do SQL queries while I used to add flavors of analysis by using Python at my disposal. From this position, I was privileged to engage in formulating work solutions with a large dependence on data to improve the business's operations in the best way possible. It supported my knowledge of managing data and my experiences with cloud technologies.

Certifications, Training, and Extracurricular Activities: In May 2022, I earned a **Microsoft Certificate for Azure AI Fundamentals** while in October of 2021; I took and passed the exam that got me the **Microsoft Certificate for Azure Fundamentals**. I believe that both the certification programs grounded me with sound foundations of both AI and cloud computing. I undertook more **courses in Python Programming and Data Processing and Visualization through Coursera**, certified by the University of Michigan, which enhanced my capacity for data analysis.

Additionally, I had several workshops and training sessions. In October 2019, I attended a basic course in **Python**. In October of 2019, I took a course in the **basics of the Python programming language**. I undertook a practical workshop **on AI with Python in July 2019** thus preparing me on AI tools and techniques. I appeared for an **IELTS test** and **I scored 7 bands** conducted in January 2024. It will enable me to communicate effectively in an international academic environment. I was also engaged in extracurricular activities as well. I used to play **table tennis** and was an active **participant in the Dexterix Hackathon**, where I used to practice teamwork and problem-solving skills.

Why this Program? I am really interested in the Master of Science in Computer Science from Philipps-University Marburg because it is straight on my career trajectory. Therefore, with this program, I will have an incredibly good base in data science and AI and state-of-the-art technology, in a nutshell, advance the depth of skills required to be competitive in this rapidly developing field. It's the holistic nature that this program of study will provide me which will ensure that I achieve a balance between theory and practical education, bringing me face-to-face with topics like machine learning, data analysis, and cloud computing that will enable me to build a very strong working platform on areas of interest.

How This Course Will Help Me: It will help me explore deeply into AI and data science, designing even complex analyses of big data while understanding the interpretation of results and designing AI models, which will eventually automate business processes. I will, therefore, be exposed to several emerging technologies like natural language processing and predictive analytics that will change the face of innovation in the world of technology. Taking the study further through practical projects and research opportunities creates the possibility of application of knowledge on problems in reality.

Why Philipps-University Marburg? Philipps-University Marburg, with its highly interdisciplinary approach toward research and great academic excellence in computer science, shows an alignment with my will to grow and become a proper hub for innovation. Commitment to innovation by the university and hence efforts towards collaboration with leaders in the industry make it a perfect place for my academic growth as well as professional growth. I firmly believe that state-of-the-art research facilities and world-class faculties at Marburg shall provide me with the perfect setup to expand the array of my knowledge in addition to instilling the right skills within me that shall take me through success in the tech industry.

Why Germany? Germany is the leader in technological innovation, and most of the world's leading companies in AI, data science, and cloud computing are located here. It is a country that has concentrated much on the areas of research and development to an extent that even incorporates collaborative inputs towards education along with the industry, so it is an ideal place for me to carry on my higher studies. That would give me the research and internship and industry opportunities that I could always apply to gain knowledge in real-life situations to build a successful career.

Future Career: I wish to work in Google or Microsoft or Siemens or SAP as a Data Scientist, AI Engineer, or Machine Learning Expert. So, the Master's program would provide me with the right skills and knowledge so that I would be well prepared for an impactful role in this tech industry and contribute toward guiding AI and data science in the future.

Conclusion: Master's in Computer Science at Philipps-University Marburg is the ideal course that will help me achieve my academic and professional goals. Techniques in advanced AI and data science will keep me interested in acquiring skills within this rapidly developing landscape of technology. I look forward to acquiring expertise from the best, contributing innovative research and bringing change in the field of computer science at the end.

I look forward eagerly to be part of this vibrant academic circle of the university.

Yours faithfully,

Aamir Ahmad, Khan
