

STATEMENT OF PURPOSE

I am **Aamir Ahmad, Khan** hailing from **Varanasi, a city in Uttar Pradesh, India**. Since my childhood, I have been very interested in technology and how it can be further used to resolve real-world problems. My desire to learn data, artificial intelligence, and cloud computing has been the driving force behind my academic and Professional achievements thus far. I now look forward to taking a **Master of Science in Applied Data Science at the University of Göttingen**, continuing to hone my skills in handling practice with AI technologies and platforms in the cloud. This course is aligned with my professional interests, and I will learn the developed knowledge required to make a mark in the technological field.

Academic Background: I completed my **10th at Central Board of Secondary Education New Delhi** in the year 2014. It carried a **9.0 CGPA**. This was the period when my love for technology and problem-solving skills needed to be instilled into me. In this pursuit, I did my **12th from Central Board of Secondary Education, New Delhi, India** in 2016 with **72%** aggregate in streams such as Physics, Chemistry, and Mathematics. This trained me before going for a **Bachelor of Technology in Computer Science and engineering** with an associated specification of **Cloud Computing & Virtualization** at **Galgotias University**, wherein I graduated with a **CGPA of 7.52** in the year 2021.

Throughout my Undergraduate years, I have always engaged myself with lots of projects and internships that developed me more in terms of knowledge of cloud computing and data management. I get in touch with database management during the **internship at Diesel Locomotive Works**. This Facial Emotion Recognition and Detection at **Kyrion Technologies Pvt. Ltd.**, immensely developed my interest in Artificial Intelligence (AI).

Professional Experience: I worked at **Cognizant Technology Solutions as Programmer Analyst Trainee from 21/07/2021 to 21/01/2022**. This was a job that required one to come up with full-stack applications as well as decide on the correct cloud platforms and approaches when deploying the solutions that we evolved and harnessing the capacity to develop data visualization of the outcomes. Then I worked in **Wipro Limited as a Project Engineer from 07/02/2022 to 12/08/2024** and my responsibility was to do SQL queries while I used to add flavors of analysis by using Python at my disposal. From this position, I was privileged to engage in formulating work solutions with a large dependence on data to improve the business's operations in the best way possible. It supported my knowledge of managing data and my experiences with cloud technologies.

Certifications, Training, and Extracurricular Activities: In May 2022, I earned a **Microsoft Certificate for Azure AI Fundamentals** while in October of 2021; I took and passed the exam that got me the **Microsoft Certificate for Azure Fundamentals**. I believe that both the certification programs grounded me with sound foundations of both AI and cloud computing. I undertook more **courses in Python Programming and Data Processing and Visualization through Coursera**, certified by the University of Michigan, which enhanced my capacity for data analysis.

Additionally, I had several workshops and training sessions. In October 2019, I attended a basic course in **Python**. In October of 2019, I took a course in the **basics of the Python programming language**. I undertook a practical workshop **on AI with Python in July 2019** thus preparing me on AI tools and techniques. I appeared for an **IELTS test** and **I scored 7 bands** conducted in January 2024. It will enable me to communicate effectively in an international academic environment. I was also engaged in extracurricular activities as well. I used to play **table tennis** and was an active **participant in the Dexterix Hackathon**, where I used to practice teamwork and problem-solving skills.

Why I Chose to Study for a Master's in Applied Data Science at the University of Göttingen: Applied Data Science is best suited for me, given my academic background and what I consider as an important pursuit in my career aspirations. The Master of Science program with a focus on data analytics, machine learning, and AI at the University of Göttingen provides me with an absolutely perfect chance to deepen such crucial knowledge and proficiency within those fields. I can say that what excites me the most is the hands-on nature of the learning experience, where concepts learned in class are applied to real-world issues, and projects with concrete social utilities are worked on. This program will also help me with advanced topics such as big data analytics and predictive modeling, which are interesting topics for me. It is the best environment for growth and development, considering that the University of Göttingen focuses on research-oriented learning and is one of the top institutions for data science. I have the opportunity to work with industry gurus and faculty who are leaders in their fields. This is a second critical factor for this program.

Why I Want to Take This Course: Pursuing this Master's program will help me in the following ways:

- Develop strong competencies in the more advanced data science techniques, including but not limited to machine learning algorithms and AI models.
- Practical hands-on experience with big data analytics, cloud technologies, and data visualization
- Work on real projects that will give me opportunities to apply knowledge in real-world settings to train and heighten my problem-solving abilities and analytics capabilities.
- Stay updated on growth in the fields of technological evolution in AI and data science so as to be in a position to bring new innovations to the technology sector.

Why I Chose Germany for Higher Studies: Germany is also well known for the quality of its education in sciences, technology and engineering worldwide. For a strong emphasis on research and innovation, coupled with an exciting technology industry, Germany provides a perfect platform to follow up on advanced education in the disciplines of data science and artificial intelligence. To be particularly attracted to this is Germany's focus on practical learning, which I can align with the hands-on experience I wish to acquire on cutting-edge technologies.

Through its active research environment and encouragement of joint collaborations between academia and industry, Germany will provide me with many opportunities to take part in research projects and participate in research internships that will greatly enhance the value of my learning process. I am convinced that studying in Germany will not only expand my horizons in terms of academics but also impart ample international experience necessary for success in today's competitive world of technology.

Future Goals: Immediately after my Master's degree graduation, I wish to join the best companies worldwide working in the technology sector where I can apply the skills and knowledge acquired in data science and AI. My future goals are to work with companies like Google, Microsoft, Siemens or SAP. The course will open doors for many streams such as:

- Data Scientist
- Machine Learning Engineer
- AI Engineer.

Conclusion: I believe that at the University of Göttingen, the Master of Science in Applied Data Science will sufficiently equip me with the required expertise and skills, providing sufficient practice within a constantly transforming field of data science and AI. This strong curriculum when paired up with this university's culture or research and innovation will prepare and position me to be at the frontier of the tech industry and make a positive contribution towards the development of innovative technologies. I look forward to engaging with the best faculty, working on great projects and being a member of such an active academic community. Therefore, I look forward to joining the University of Göttingen for my further journey to becoming a successful data scientist and AI professional.

Thank you very much for considering my application.

Aamir Ahmad, Khan
