

Statement of Purpose

I am **Aamir Ahmad, Khan** Native of the divine city of **Varanasi, Uttar Pradesh, India**. Technologies are things in which I am keenly interested because I believe that technology can solve huge problems. I have hands-on experience working with data and AI technologies. Meanwhile, knowing the increasing relevance of advanced knowledge in Data Science and AI, I kept myself to take up my postgraduate course - **Master of Data Science and Artificial Intelligence at Saarland University**. This will help me to acquire modern skills to be able to make effects in this ever-changing tech society.

Academic Background: I completed my **10th at Central Board of Secondary Education New Delhi** in the year 2014. It carried a **9.0 CGPA**. This was the period when my love for technology and problem-solving skills needed to be instilled into me. In this pursuit, I did my **12th from Central Board of Secondary Education, New Delhi, India** in 2016 with **72%** aggregate in streams such as Physics, Chemistry, and Mathematics. This trained me before going for a **Bachelor of Technology in Computer Science and engineering** with an associated specification of **Cloud Computing & Virtualization at Galgotias University**, wherein I graduated with a **CGPA of 7.52** in the year 2021.

Throughout my Undergraduate years, I have always engaged myself with lots of projects and internships that developed me more in terms of knowledge of cloud computing and data management. I get in touch with database management during the **internship at Diesel Locomotive Works**. This Facial Emotion Recognition and Detection at **Kyrimon Technologies Pvt. Ltd.**, immensely developed my interest in Artificial Intelligence (AI).

Professional Experience: I worked at **Cognizant Technology Solutions as Programmer Analyst Trainee from 21/07/2021 to 21/01/2022**. This was a job that required one to come up with full-stack applications as well as decide on the correct cloud platforms and approaches when deploying the solutions that we evolved and harnessing the capacity to develop data visualization of the outcomes. Then I worked in **Wipro Limited as a Project Engineer from 07/02/2022 to 12/08/2024** and my responsibility was to do SQL queries while I used to add flavors of analysis by using Python at my disposal. From this position, I was privileged to engage in formulating work solutions with a large dependence on data to improve the business's operations in the best way possible. It supported my knowledge of managing data and my experiences with cloud technologies.

Certifications, Training, and Extracurricular Activities: In May 2022, I earned a **Microsoft Certificate for Azure AI Fundamentals** while in October of 2021; I took and passed the exam that got me the **Microsoft Certificate for Azure Fundamentals**. I believe that both the certification programs grounded me with sound foundations of both AI and cloud computing. I undertook more **courses in Python Programming and Data Processing and Visualization through Coursera**, certified by the University of Michigan, which enhanced my capacity for data analysis.

Additionally, I had several workshops and training sessions. In October 2019, I attended a basic course in **Python**. In October of 2019, I took a course in the **basics of the Python programming language**. I undertook a practical workshop **on AI with Python in July 2019** thus preparing me on AI tools and techniques. I appeared for an IELTS test and **I scored 7 bands** conducted in January 2024. It will enable me to communicate effectively in an international academic environment.

I was also engaged in extracurricular activities as well. I used to play **table tennis** and was an active **participant in the Dexterix Hackathon**, where I used to practice teamwork and problem-solving skills.

Why I chose this program: The Master's program in Data Science and Artificial Intelligence, which is taught at Saarland University, will complement my academic background. It will further drive me toward meeting my career objectives. My interest in cloud computing, data management and AI developed out of my undergraduate studies. Further internships with Wipro and Cognizant Technology Solutions have also deepened my understanding of SQL data optimization and also of data analysis in Python. I realize that, in order to stay current today, the skill areas that require focus are AI and Data Science. The program affords the right opportunity to allow me to understand how **machine learning, AI systems, data analysis and cloud computing interrelate**. I will be further enabled to work on even more advanced projects applied toward real-world challenges for solutions.

How This Course Will Benefit Me: This Master's program will empower me with the knowledge and skills necessary for rapid growth in the fields of AI and Data Science. I will learn big data analytics, build AI models, and automate business efficiency tasks. But with numerous new innovations in AI technologies, such as natural language processing and predictive analytics, I will experience the particular uses of them in the role that would not have been available otherwise. Moreover, in this course, practical experience with research will help me to put all the ideas into practice, which will enable me to develop some of the practical skills that will be extremely important for my career as a data scientist and an AI professional.

Why Saarland University? I became keenly interested in Saarland University because it enjoys a very good reputation in computer science and AI research. Tie-ups with institutions such as the Max Planck Institute for Informatics and the German Research Center for Artificial Intelligence (DFKI) would make this place an ideal location to continue further studies. It focuses on giving theoretical education accompanied by application-oriented research, perfectly preparing students for facing the conditions of the high-tech industry. The university, with highly qualified faculty and research facilities of international standard, will provide the perfect environment for learning new things. Besides, developing a network with such experts in this area creates other exciting career opportunities.

Why Germany for My Higher Education? German science and technology education is well-known all around the world. Learning in Germany will allow me to take up the challenge of learning in a stimulating environment that fosters the most innovative and collaborative industry interactions. I am keenly interested in research and development opportunities in Germany, given my desire for advanced education combined with acquiring hands-on experience in the tech industry. The chance to be part of a society that celebrates creativity and brilliance and to learn from the finest brains in the area excites me especially.

Future Goals: After completing my Master's degree, I will be very happy and eager to work for **Google, Microsoft, Siemens and SAP as a Data Scientist, AI Engineer or Machine Learning Specialist, etc.** All the special knowledge and skills that I'll be acquiring from this course make me more efficient than others.

Conclusion: I am looking forward to joining Saarland University for a Master's in Data Science and Artificial Intelligence. In this program, given the emphasis on advanced themes of AI and data science techniques in an extremely hands-on approach, it will prepare me to be successful in this high-tech industry. The thought of learning from the best and adding something to the world of AI and data science excites me.

Sincerely,

Aamir Ahmad, Khan
