

Motivation Letter

My full name is **Hrishikesh, Nandeesh**, I am quite excited to start the **Master of Science in Applied Computer Science program at the University of Göttingen**. Having strong computer science academics and practical experience from several internships, I want to expand my knowledge and abilities in this field at your prestigious university. My love of computer science has been driven by my academic path and work experience; thus, I think the University of Göttingen provides the ideal surroundings for my development.

With a **CGPA of 7.61, equivalent to a German grade of 2.19**, I am presently pursuing a **Bachelor of Engineering in Computer Science & Engineering** from Visvesvaraya Technological University, Belagavi, India. Subjects including Engineering Graphics, Mobile Application Development, Artificial Intelligence & Machine Learning, Engineering Chemistry, and Basic Electronics comprise my coursework. Before this, I finished my SSLC with a mark of **94.40% (German Grade - 1.26)** and completed my Pre-University Exam in 2020.

Different internships have given me real-world expertise. I **interned with SmartKnower** in June and July 2022 concentrating on cyber security. From August to September 2023, I then worked on **Data Science projects with Prodigy InfoTech**. Most lately, in September 2023, I worked on **Full Stack Web Development (MERN) interning at Princeton Smart Engineers**. These internships have given me insightful analysis of many facets of computer science, which has helped me to apply theoretical knowledge to practical situations.

Why is one Master of Science in Applied Computer Science? The Master of Science in Applied Computer Science at the University of Göttingen particularly interests me because of my educational background and desired job path. During my undergraduate studies, when I found classes in Artificial Intelligence & Machine Learning and Mobile Application Development to be captivating, my passion in computer science started. These courses let me see how creatively technology may address practical issues. Working on Data Science projects in Prodigy InfoTech, where I interned, was one of the main events that confirmed my choice to follow this degree. This encounter helped me to understand the need of sophisticated understanding in computer science to handle difficult problems. Essential in the digital era, subjects such as algorithms, machine learning, and data science inspire me greatly to study. This curriculum will, in my opinion, equip me with the technical knowledge and problem-solving ability required to flourish in the IT sector.

Germany in particular? Germany's outstanding educational system and emphasis on research and development drive me to want to apply there. Germany is where I wish to stay as the field of education here is much superior than that of other countries. I wish to be among the rich German culture, diversity, and good exposure. Germany appealed to me for my master's degree because of its top-notch curriculum and chance to pick brains of some of the finest in the field. Studying in Germany helps me to develop personally as well as professionally. The nation is perfect for my academic and professional goals because of its focus on creativity and robust IT sector. I wish to fully embrace the German culture, which celebrates both personal and professional development, and seize the chances for foreign travel this country presents.

Why the University of Göttingen? The University of Göttingen appeals especially to me because of its great focus on research and high caliber education. The university's ranking among the best universities in the world says volumes about its intellectual quality. The University of Göttingen boasts a varied student body, with thousands of people from many origins, therefore fostering a lively and inclusive environment. Modern laboratories and libraries among other university facilities are spectacular and offer a great means of student support. Regarding the University of Göttingen's esteemed in-field experts, the faculty has also come under significant compliments. The campus is in a lovely city with a rich history and culture, which makes it perfect for both intellectual development as well as personal one. Although I have no connections or family at the university, my choice has been much affected by the good evaluations and university reputation. I am eager about the chance to learn from the among the greatest research institutions and teachers connected with the Applied Computer Science program.

Aspirations and Future Professional Views: Following my Master of Science in Applied Computer Science, I want to work in positions include **software developer, data scientist, or machine learning engineer**. I think this program will provide me the tools I need to succeed in these roles. Working especially interests me since the nation boasts a vibrant IT sector with lots of chances for computer science experts. Graduates from this school are well-known to be hired by companies including SAP, Siemens, and Bosch; I would be happy to help their creative initiatives. Attaching the University of Göttingen will provide me a strong basis to start a successful career in the IT sector.

Finally, I really hope the Master of Science in Applied Computer Science at the University of Göttingen will satisfy both my intellectual and career goals. Together with the university's first-rate facilities and staff, the program's extensive course will equip me with the knowledge and abilities required to flourish in the IT sector. The idea of joining the active intellectual community at the University of Göttingen and supporting its tradition of distinction excites me. I value your giving my application some thought.

Respects,
Hrishikesh, Nandeesh
