

Statement Of Purpose

I am the Indian student **Isha, Sudele**. Here I am writing my **Master of Science in Applied Computer Science** statement of intention at **Deggendorf Institute of Technology**. First of all, I would want to provide my educational records proving my suit for your esteemed master's degree program.

Academic and Professional

English will be my teaching language for master's studies. I took the IELTS test, where I earned an **overall of 7.0**, in **CEFR Level: C1**, to improve in this language. Following my graduation from college, I was accepted to Graphic Era Hill University for my Bachelor of Technology in Computer Science and Engineering With an **CGPA of 8.71 (German Grade - 1.6)**. Delhi Technological University sent me a technical certificate acknowledging completion of "**Demystifying Intellectual Property for Research Integrity and Economic Development**". I also finished ICT Academy's **4-week Virtual Internship Program** in Full Stack Development. I filled in my knowledge gap by working on projects as described below, completing several practice, and undergoing training. CodroidHub Private Limited led a **2-day Blockchain for Beginners Workshop** program. Working on a project called "**Pet Animal Welfare**," I created a street animal adoption website leveraging **Django, HTML, CSS**, and machine learning for disease prediction.

Why this program?

Master of Science in Applied computer science is the topic I have selected since it always helps us to engage with technology and offers answers to different technical problems. My bachelor's degree offers a strong basis in this discipline. Now, I want to learn more in all the fields I already covered in my bachelor's degree, including some particular ones of this field. I choose to work on a master's degree in Applied Computer Science in order to have thorough understanding of this discipline. Here I will get special mix of technical and personal abilities like programming, data analysis, and software development. Furthermore crucial to success in this sector are soft skills such communication, teamwork, and problem-solving. Since modules like Mobile Application Development and Full Stack Web Development fit my past studies and internships, I really find interest in them. These abilities will help me improve personally in addition to help me professionally.

Why Germany?

Pursuing advanced computer science education would be best done in Germany. Germany has a well-regarded worldwide quality education system, hence I intend to study there. The field of education in Germany is significantly better than in other countries, hence I wish to remain here. I wish to be among the rich German culture, diversity, and good exposure. Germany will enable me to develop personally and professionally, hence I wish to pick it for my master's degree. Studying in Germany will provide me the chance to learn from the finest, as I wish to do.

Why this University?

Before deciding on **Deggendorf Institute of Technology** in Germany, I engaged myself in thorough web study and spoke with various well-wishers and mentors. The university's outstanding global rankings, rich alumni, and worldwide reputation really have impressed me. For students to grow both personally and professionally, it provides a special learning atmosphere. These are the main factors that drove me to choose Deggendorf Institute of Technology above others. Above all, the Applied Computer Science master's degree fits my academic criteria and course of study corresponds with my areas of interest.

Occupational Objectives

Having a master's degree, I can work in tech startups, research labs, and software development firms among other fields. My dream job would be one of project manager, data analyst, or software developer. I want to be a top applied computer science professional helping to support innovative research and development projects. Either pursuing an academic career or working for a multinational tech business, where I can inspire and guide next generations of computer scientists, I see myself being quite important.

Conclusion

Being highly aspirational, I would want to concentrate specifically on my academics since today's effort will shape my career tomorrow. I would want you to consider my application and provide me an opportunity to join your university.

Yours honestly,

Isha, Sudele
