

Statement of Purpose

Isha, Sudele is my entire name, and I respectfully like to apply to **HFT Stuttgart for the Master of Science in Software Technology**. Having a strong academic foundation in computer science engineering and pertinent experience in software development and data science, I am motivated and eager to further my knowledge in this area via the acclaimed curriculum your university offers.

Professionally and academically experienced

Bachelor of Technology in Computer Science and Engineering with an **8.71 CGPA (German Grade: 1.6)**., which shows my commitment to my studies and my want to succeed to the best of my ability, I kept Graphic Era Hill University, Dehradun, under constant attention. My interest in learning specialist expertise in these fields was piqued by specialized classes I took like Mobile Application Development, Disaster Management, Mobile Computing, Compiler Design, and Full Stack Web Development. Both of which gave a solid basis for my next studies, I finished my Senior School Certificate Exam in 2020 with a score of **81.6% (German grade: 1.8)** and my All India Secondary School Exam in 2018 with a score of **84.2% (German grade: 1.8)**.

My practical experience consists on working on several facets of software development during a **4-week virtual internship program** in Full Stack Development run by ICT Academy. In addition, I worked on a **“Pet Animal Welfare”** project at Graphic Era Hill University using **Django, HTML, CSS**, and machine learning for disease prediction, with an eye toward the creation of a street animal adoption website. These encounters have grounded me well in both theoretical and practical facets of computer science. Delhi Technological University sent me a course on **"Demystifying Intellectual Property for Research Integrity and Economic Development,"** and CodroidHub Private Limited hosted a **two-day "Blockchain for Beginners"** program. Reflecting my skill in the English language, I also earned an **overall IELTS band score of 7.0 (CEFR Level - C1)**.

Why this Program?

HFT Stuttgart's Master of Science in Software Technology program provides advanced study in fields directly relevant to my professional objectives. The program's emphasis on modern concerns in software technology especially inspires me since, it will help me to handle the most important problems in the IT industry. This program piques my curiosity as, during my practice at ICT Academy, I came to see how crucial modern software technologies are in addressing practical issues. For me, the courses in cyber security, data science, and software engineering of the curriculum are perfect. Working on research projects and with industry partners excites me since it will let me help to bring about useful experience and support pragmatic advancements. Completing this program will tremendously advance my professional growth and enable me to land more demanding employment in the global technology scene.

why Germany?

Germany's great standing in engineering and technology drives me to apply there. Germany is where I wish to stay as the educational scene there is far better than that of other countries. I wish to be among the rich German culture, diversity, and good exposure. Germany was my choice for my master's degree since it emphasizes research and invention, which will be quite helpful for my academic progress. Studying in Germany will enable me to develop personally as much as professionally. Immersion in Germany's cosmopolitan scene will help me to improve my educational process. Germany's dedication to a digital and sustainable future that fits my both personal and professional objectives appeals to me.

Why does HFT Stuttgart?

Being among the top universities in Germany, particularly in the fields of Computer Science and Engineering, I wish to study at **HFT Stuttgart**. The university's research-oriented character and emphasis on creativity in fields including artificial intelligence, cyber security, and data science fit my academic interests. The modern resources and facilities at HFT Stuttgart excite me since they will help me to study and increase my productivity. The chances for practice and joint projects with business leaders—which will give real-world experience excite me as well. HFT Stuttgart's excellent alumni network will guarantee that I have the appropriate stepping stone for my worldwide employment. Furthermore ensuring a rewarding experience during the course will be the varied community of students and the helpful services at HFT Stuttgart.

Aspirations and Future Career Views

After finishing my education, I want to work in positions include Cyber security Analyst, Data Scientist, or Software Engineer. HFT Stuttgart's Software Technology program will equip me the skills and knowledge required to succeed in these roles. Where demand for IT experts is great, really interests me. The curriculum will provide me with both technical knowledge and interpersonal abilities, therefore preparing me for a successful job. The educational results of this program will enable me to lay a firm basis for my personal development and future employment.

Conclusion

Therefore, I think that studying the Master of Science in Software Technology at HFT Stuttgart will help me to have the required knowledge and background to fulfill my career aspirations. Contributing to the intellectual activities of this esteemed university and learning from the inventiveness that enhances the university excites me. Kindly find my application accepted; I would really appreciate it. Being a member of HFT Stuttgart excites me.

Indeed,

Isha, Sudele
