

Statement of Purpose

My name is **Isha, Sudele** and **Technische Universität Ilmenau (TU Ilmenau)** greatly interests me to pursue a **Master of Science in Research in Computer and Systems Engineering**. Furthering my knowledge and experience in this subject excites me, thus I think the TU Ilmenau program, with its strong academic background and professional skills requirements, is the perfect one for my ongoing study.

Academic and Professional- I turned up an **84.2% (German Grade: 1.7)**, mark in my 10th grade in 2018. Following that, in 2020 I finished in 12th grade with an **81.6% (German Grade: 1.8)**. Earning a CGPA of **8.71 (German Grade: 1.6)**, Graphic Era Hill University, Dehradun, Uttarakhand, India, is helping me to pursue a **Bachelor of Technology in Computer Science and Engineering**. Aside from this, I worked on a bachelor's project called "**Pet Animal Welfare**," which developed a street animal adoption website utilizing **Django, HTML, CSS**, and machine learning for disease prediction. In the **IELTS test, I scored 7.0 bands**; after completing a course on "**Demystifying Intellectual Property for Research Integrity and Economic Development**" by Delhi Technological University.

I finished a **2-day Blockchain for Beginners** Workshop run by CodroidHub Private Limited. Along with web development technology, my skills include mastery of programming languages including Python, C++, and Java. I also finished a **4-week virtual internship program** under Full Stack Development run by ICT Academy. I learned front-end as well as back-end development over this practice. I also worked on a project applying a street animal adoption system in the real world. These encounters have given me insightful understanding in software development and efficient technology-based problem-solving ability.

Why this Program? The **M.Sc. degree in Research in Computer and Systems Engineering** at TU Ilmenau appeals especially to me because of its thorough and interesting course. The fundamental subjects of the program—Artificial Intelligence, Data Science, and Cybersecurity—exactly what I want to learn more about. During my college studies, especially on my project on Pet Animal Welfare where I created a street animal adoption website utilizing Django, HTML, CSS, and machine learning for disease prediction, my passion in these topics was piqued. This project motivated me to help to create significant solutions by stressing the practical application of computer science.

My internships have also helped me to see how crucial it is to close the theory-practicing divide. For example, I worked on real-world projects at ICT Academy where I had to apply classroom skills to address useful problems. Technical knowledge and interpersonal skills among other learning opportunities from this curriculum will be quite helpful for both personal and professional development.

Why Germany? Germany is well-known for its excellent education and strong focus on research and innovation, hence I wish to study here. Germany is where I wish to stay since the field of education here is significantly better than others. I wish to be among the rich German culture, diversity, and good exposure. Germany has the ideal mix of academic brilliance and practical experience, hence I wish to pick it for my master's degree. Studying in Germany will help me both personally and professionally grow since it offers an interesting surroundings for foreign students. Germany's rich history and culture have always captivated me and shaped my choice to study here; I want to really become immersed in them.

Why is TU Ilmenau? **TU Ilmenau** appeals especially to me since it ranks among technological colleges really well. The university's dedication to computer science research and innovation fits exactly my academic and career interests. Modern facilities and a lively student population at TU Ilmenau will give me a rich study environment. Though I do not know personally anyone at the university, I have read about the encouraging community and chances for cooperation with foreign students. The university's appeal increases with its location in Ilmenau, a city renowned for its scenic surroundings and cultural legacy. Knowing about the prestigious research centers and eminent faculty members at TU Ilmenau has strengthened my wish to study here. With businesses aggressively looking for graduates from the Research in Computer and Systems Engineering program, Ilmenau's local job market is vibrant. This will give me first-rate chances for internships and eventual job.

Future Job Views and Aspirations- After finishing the M.Sc. program in Research in Computer and Systems Engineering, I hope to be employed in positions such Systems Engineer, Data Scientist, or AI Specialist. Helping to create creative ideas that solve social problems especially interests me. Using the knowledge and abilities acquired from this degree. This program will provide me the knowledge required to succeed in my selected field and reach my professional objectives.

Eventually- All things considered, I am sure that following the Master of Science in Research in Computer and Systems Engineering at TU Ilmenau marks the next natural development in my academic and professional path. Joining the rich intellectual scene of the institution and optimizing the chances it presents excites me. I am dedicated to reach perfection and contribute positively to the domains of computer science and society. Please review my application kindly.

I value you giving my application some thought.

Isha, Sudele
