

Statement of Purpose

Isha, Sudele from India here. I would want to apply to the **University of Bonn to Master's in Computer Science**. My educational path and work experience have convinced me that this program will offer the perfect stage for my development and future goals.

Academic and Professional - I turned up an **84.2% (German Grade: 1.7)**, mark in my 10th grade in 2018. Following that, in 2020 I finished in 12th grade with an **81.6% (German Grade: 1.8)**. Earning a CGPA of **8.71 (German Grade: 1.6)**, Graphic Era Hill University, Dehradun, Uttarakhand, India, is helping me to pursue a **Bachelor of Technology in Computer Science and Engineering**. Aside from this, I worked on a bachelor's project called "**Pet Animal Welfare**," which developed a street animal adoption website utilizing **Django, HTML, CSS**, and machine learning for disease prediction. In the **IELTS test, I scored 7.0 bands**; after completing a course on "**Demystifying Intellectual Property for Research Integrity and Economic Development**" by Delhi Technological University.

I finished a **2-day Blockchain for Beginners** Workshop run by CodroidHub Private Limited. Along with web development technology, my skills include mastery of programming languages including Python, C++, and Java. I also finished a **4-week virtual internship program** under Full Stack Development run by ICT Academy. I learned front-end as well as back-end development over this practice. I also worked on a project applying a street animal adoption system in the real world. These encounters have given me insightful understanding in software development and efficient technology-based problem-solving ability.

Why Germany- Germany is a mix of academic, industrial, business, and research/scientific brilliance mixed with a fascinating culture, history, legacy, and inventiveness, hence I wish to study there. I wish to engage in largely practice-based education whereby courses demand practical learning more than academic knowledge. I wish to be part of a system whereby universities excel in terms of student satisfaction, employability, etc. Particularly for international students, I desire to live in a varied and interesting surroundings Germany offers. Experiencing Germany's high caliber and varied educational system would help me grow personally as well as professionally.

Why this University- Certainly, I finished my bachelor's degree from one of the top universities in India, and I would count it a luxury to be able to pursue my Master's studies at the **University of Bonn** and benefit from its first-rate infrastructure and research possibilities. Among the acknowledged German universities is the University of Bonn. It promises its students a clear career path and high-quality instruction. The university gives its pupils contemporary tools and facilities. For internships and employment possibilities, it forms alliances with top business executives. The university invites students from all around the globe and adds variation to the campus. With the direction of prominent departmental faculty members and my love of the topic, I am sure I can achieve in the program.

Why this Program- Under this **Master's degree in Computer Science**, I will learn a great deal in fields such mathematics, machine learning, data ethics and privacy, data visualization, programming, software, analyzing techniques, problem-solving ability, and many more. I will also learn how to use these abilities in pragmatic ways to get insightful knowledge. Apart from this, a German degree will increase my competitiveness in the employment scene. It will open an interesting career in several fields. Modules like "Machine Learning," "Data Analysis," and "Software Engineering"—which fit my career objectives and interests particularly pique my curiosity.

Occupational Objectives- After finishing my education, I want to work in positions include **Cyber security Analyst, Data Scientist, or Software Engineer**. The curriculum will provide me with both technical knowledge and interpersonal abilities, therefore preparing me for a successful job. The educational results of this program will enable me to lay a firm basis for my personal development and future employment. Long term, I want to be a top applied computer science professional helping to support innovative research and development projects. Either pursuing an academic career or working for a multinational tech business, where I can inspire and guide next generations of computer scientists, I see myself being quite important

Conclusion- I would want to thank you for spending your valuable time over my application. If you see me deserving of your university, I also modestly ask you to give it some thought and offer me this special chance.

Sincerely,
Isha, Sudele
