

Statement of Purpose

Isha, Sudele here is applying to the **Master's in Computer Science program at the University of Freiburg**. Having a strong academic foundation in computer science engineering and pertinent experience in software development and data science, I am motivated and eager to further my knowledge in this area via the acclaimed curriculum your university offers.

Academic and Professional

I turned up an **84.2% (German Grade: 1.7)**, mark in my 10th grade in 2018. Following that, in 2020 I finished in 12th grade with an **81.6% (German Grade: 1.8)**. Earning a CGPA of **8.71 (German Grade: 1.6)**, Graphic Era Hill University, Dehradun, Uttarakhand, India, is helping me to pursue a **Bachelor of Technology in Computer Science and Engineering**. Aside from this, I worked on a bachelor's project called "**Pet Animal Welfare**," which developed a street animal adoption website utilizing **Django, HTML, CSS**, and machine learning for disease prediction. In the **IELTS test, I scored 7.0 bands**; after completing a course on "**Demystifying Intellectual Property for Research Integrity and Economic Development**" by Delhi Technological University.

I finished a **2-day Blockchain for Beginners** Workshop run by CodroidHub Private Limited. Along with web development technology, my skills include mastery of programming languages including Python, C++, and Java. I also finished a **4-week virtual internship program** under Full Stack Development run by ICT Academy. I learned front-end as well as back-end development over this practice. I also worked on a project applying a street animal adoption system in the real world. These encounters have given me insightful understanding in software development and efficient technology-based problem-solving ability.

Why this Program

As I investigated **Master's degrees in computer science** at several universities, the University of Freiburg caught my attention because of its rigorous academic standards and extensive program scope. The courses are meant to give students actual project experience, so properly ready for the workforce. This program piques my curiosity as, during my practice at ICT Academy, I came to see how crucial modern software technologies are in addressing practical issues. For me, the courses in cyber security, data science, and software engineering of the curriculum are perfect. Completing this program will tremendously advance my professional growth and enable me to land more demanding employment in the global technology scene.

Why Germany

Germany's world-class educational system and emphasis on research and practical learning drew me in especially. Germany is where I wish to remain as the quality of the education in my field is better than others. The rich cultural legacy of Germany as well as the varied and inclusive surroundings thrills me. Studying in Germany will enable me to develop personally and professionally alike. For my profession, the chance to work with top authorities and expose to creative research will be priceless. Furthermore, the opportunity to encounter German customs and culture will improve my own life. Germany's dedication to a digital and sustainable future that fits my both personal and professional objectives appeals to me.

Why this university

Academic brilliance of the **University of Freiburg** is much sought for. Its rank among the top colleges in the world speaks to the caliber of its instruction. The university boasts modern amenities that create the perfect classroom and a varied student population. Having a friend who is presently enrolled at the University of Freiburg, their great experiences have inspired me even more to apply. The institution is a great venue for academic development since it boasts various research institutes and a faculty of eminent experts. Freiburg is a lively city with lots of attractions that provides suitable surroundings for students. With so many businesses hiring University of Freiburg graduates, the local employment scene seems bright. Studying here will equip me with the intellectual, emotional, and professional tools I need to advance in my work.

Occupational Objectives

Want to Pursue a Master's in Computer Science because it will help me to acquire the information and abilities needed to succeed in several professional fields like **IT consultant, data scientist, and software developer**. Where the tech sector is booming, piques especially my interest. The University of Freiburg curriculum will provide me the technical knowledge and social skills required for success in these positions. The program's learning results will equip me to meet my career goals and equip me for the demands of the labor market.

Conclusion

All things considered, I am excited to start graduate work at the University of Freiburg. The curriculum will, in my opinion, equip me with the tools, knowledge, and experiences required reaching my professional objectives. With my academic background and pragmatic experience, I am sure I will be a great benefit to your university. The chance to study in Germany and further the field of computer science excites me.

I value your giving my application some thought.

**Sincerely,
Isha, Sudele**
