

Letter of Inspiration

Introduction and Instructional Background: From Salem, Tamil Nadu, India, I go by **Krishna Kumar, Govindaraju** and am from my early years, the fields of engineering and construction captivate me. My academic path and career goals have been much shaped by this early love. Applying at **HFT Stuttgart for the Master's degree in International Project Management** excites me. Believing myself strongly and having a clear vision for my future, I am sure that this program will be the ideal path to reach my academic and professional objectives.

At Anna University, Chennai, India, I earned an **8.64 (German grade - 1.82) Bachelor of Engineering in Civil Engineering**. Starting with my Higher Secondary Course Certificate from the Department of Government Examinations, Chennai, where I scored **76.16%, (German grade - 2.01)**, my academic path started. My Matriculation Examination result before then was **87.18% (German grade - 1.59)**. These intellectual benchmarks have set a strong basis for my engineering profession. Also I have completed my **IELTS exam with overall score of 6.5 CEFR level B2**.

Professional and Scholarly Experience: My path professionally has been varied and rewarding. Currently employed as **Manager-QS at Arvind Technocrats & Engineers LLP**, I handle client billing, subcontractor invoicing, and material reconciliation. Before this, I managed audit and quantity takeoff for infrastructure projects while a **Senior Manager-Billing Engineer at NumberTree in New Delhi**. Pre-tender and post-tender quantity takeoff and rate analysis for road projects were my responsibility as a **Quantity Surveyor at ABU Hatim Co. L.L.C.** in Oman. I have also worked as a **Senior Engineer (Planning) Dilip Buildcon Limited** and a **Senior Engineer (Quantity Surveyor) Pan India Infraprojects Private Limited**. Starting her career as a **Graduate Engineer Trainee at L&T DHTL**, I worked on site execution and project management. Apart from my work responsibilities, I have actively engaged in extracurricular events. **The Youth Red Cross and Red Ribbon Club** at Sona College of Technology had me volunteer. In addition, I have finished certificates in **Primavera P6 Training and an internal course** on the Salem-Ulundurpet highway project.

Germany's why: Germany's outstanding educational system and great quality of its academic programs make me wish to study there. I think German education is significantly better than that of other countries. Germany offers so much rich culture, variety, and fantastic exposure for which I would want to experience. The chance to engage with people from many backgrounds will enable me to develop personally and professionally alike. Given my work goals, I wish to fully absorb the German culture—known for its efficiency and inventiveness. Germany's great focus on theoretical knowledge and practical experience will help me to have a whole education.

The reason HFT Stuttgart is: HFT Stuttgart's solid reputation and extensive program choices have me wanting to apply. HFT Stuttgart is well-known for stressing research-oriented, pragmatic teaching. With almost 4,000 students, the university offers an active intellectual community. The university's facilities, seasoned teachers, and position in the energetic city of Stuttgart really appeal to me. Though I have no personal ties at HFT Stuttgart, alumni have given me great comments that has shaped my decision. Studying in Stuttgart is an interesting location with its rich cultural legacy and many attractions. The local employment scene also appeals to me since businesses like Bosch and Daimler provide chances for recent graduates. By means of academic, personal, and professional advantages, studying at HFT Stuttgart will enable me to develop a strong career in project management.

Why Master of International Project Management? Since a Master's in International Project Management exactly fits my past experiences and professional objectives, I want to pursue it. My excellent basis in project management comes from my expertise in civil engineering and current positions. During my **internship at L&T Construction**, I recall working on the CMRL Depot Project which piqued my interest in overseeing major initiatives. This degree will equip me with the required knowledge to properly oversee worldwide projects. Classes include Risk Management, International Contract Management, and Project Financing especially appeal to me. These classes will help me to have a thorough awareness of the difficulties in running initiatives across several nations and cultures. Finding the finest techniques in project management and how to use them in practical situations excites me. This program will help me to become a well-rounded professional by boosting my interpersonal abilities in addition to my technical knowledge.

Aspired career: Following my master's degree, I would like to work in positions include **consultant in international project management, construction manager, or project manager**. Using the abilities acquired from this training, I hope to work with multinational organizations. My intention is to help with major infrastructure initiatives benefiting society. This degree will equip me with the tools to excel in my profession and help me ready for the difficulties of running worldwide projects. In project management, I want to be leading innovator and provide the sector with sustainable and effective ideas.

Lastly: Finally, I am sure that my background in school, work experience, and great will to progress my knowledge in international project management qualify me for this program. I am excited about the chance of developing inside your prestigious university and ready to provide HFT Stuttgart my expertise and abilities. I appreciate you given my application some thought. This statement of intent should help me get into your esteemed university.

With honest appreciation,
Krishna Kumar, Govindaraju
