

Declaration of Intent

Introduction - From Salem, Tamil Nadu, India, I go by **Krishna Kumar, Govindaraju** and am this chance to apply for **TU Kaiserslautern's Master of Science degree in Computer Science** makes me immensely appreciative. Computer science is the field of study that most interests me academically; hence it has been my main driving force for choosing this degree.

At Anna University, Chennai, India, I earned an **8.64 (German grade - 1.82) Bachelor of Engineering in Civil Engineering**. Starting with my Higher Secondary Course Certificate from the Department of Government Examinations, Chennai, where I scored **76.16%, (German grade - 2.01)**, my academic path started. My Matriculation Examination result before then was **87.18% (German grade - 1.59)**. These intellectual benchmarks have set a strong basis for my engineering profession.

Professional and Scholarly Experience: My path professionally has been varied and rewarding. Currently employed as **Manager-QS at Arvind Technocrats & Engineers LLP**, I handle client billing, subcontractor invoicing, and material reconciliation. Before this, I managed audit and quantity takeoff for infrastructure projects while a **Senior Manager-Billing Engineer at NumberTree in New Delhi**. Pre-tender and post-tender quantity takeoff and rate analysis for road projects were my responsibility as a **Quantity Surveyor at ABU Hatim Co. L.L.C.** in Oman. I have also worked as a **Senior Engineer (Planning) Dilip Buildcon Limited** and a **Senior Engineer (Quantity Surveyor) Pan India Infraprojects Private Limited**. Starting her career as a **Graduate Engineer Trainee at L&T DHTL**, I worked on site execution and project management. During my **internship at L&T Construction**, I recall working on the CMRL Depot Project which piqued my interest in overseeing major initiatives. Apart from my work responsibilities, I have actively engaged in extracurricular events. **The Youth Red Cross and Red Ribbon Club** at Sona College of Technology had me volunteer. In addition, I have finished certificates in **Primavera P6 Training and an internal course** on the Salem-Ulundurpet highway project. I have also taken the **IELTS test** and finished courses including Primavera P6 Training, earning an **overall band score of 6.5**.

Why Germany specifically? Applying for a Master's abroad helps me to sketch ahead my academic path. I chose Germany since I would profit from its standing in world education. I want to study in a nation where education—especially in science—is highly valued, and I think Germany's top-notch instruction captures this. I wish to live in a setting that develops to satisfy evolving worldwide criteria. I wish to live in a society that welcomes difference and offers a safe surroundings for overseas students. I think exposure to diversity and German language will enhance my educational process. Germany's educational system helps me to grow both personally and professionally. Being in a nation with a rich cultural and historical heritage will help me grow personally since it will be part of me.

Reason TU Kaiserslautern? TU Kaiserslautern is well-known for its contemporary technical tools, seasoned teachers, and pragmatic knowledge application, hence I want to study there. The university excels on many different learning environments, and its facilities and student count really speak to me. The research centers and chance to work with seasoned computer science academics in the subject will help me. The busy cultural and business environment around the university excites me since it presents lots of chances for both professional and personal development. I think the university's linkages to companies will offer great chances for internships and employment, therefore greatly developing my career.

Reason for This Course - Studying a Master of Science in Computer Science at TU Kaiserslautern excites me. During my undergraduate studies, my passion with cutting-edge computer systems and design solutions motivated me to seek for this degree. This course will address significant sub-domains like algorithms, data structures, artificial intelligence, and software engineering. I wish to get good at applying mathematical and computational approaches to solve engineering challenges. I also like to become technically competent in specialist fields including robotics and automated tools. I want to increase my practical skills so that I may help to guarantee improved engineering practices and product quality.

Prospectuses for Future Employment - After earning my Master's degree, I intend to work in roles including **systems analyst, data scientist, or software developer**. I want to work where the employment scene for recent computer science grads is booming. I think that the knowledge and abilities I will acquire from this program will equip me for these positions and support my successful career building process. With my studies, I hope to contribute significantly to the field of computer science and offer creative answers to practical issues.

In conclusion - Thus, considering my academic performance, professional experience, and sincere passion for computer science, I am sure that the Master of Science in Computer Science at TU Kaiserslautern is the best fit program for me. I appreciate your giving my application some thought.

I appreciate it.

Krishna Kumar, Govindaraju
