

Declaration of Intent

The chance to apply for the **Master program of Communications and Information Technology at the University of Bremen** makes me quite happy. **Meghana, Manjegowda** an **81.37% (German Grade - 1.9) Bachelor of Engineering in Electronics and Communication Engineering** graduate from Bangalore University, India, Among the disciplines I have studied are mechanical engineering science, basic electronics, computer communication networks, signals and systems, embedded systems, microcontrollers, etc. Studying communications and information technology excites me now since it will teach sophisticated scientific approaches, methods, and applications in technical sciences.

During my Bachelor project, "**Personal Trainer Using Artificial Intelligence**," where I suggested an improved back propagation algorithm for creating a device that acts as a personal workout trainer, my passion in this topic was piqued. Also I have completed my 12th with **92.16% (German Grade: 1.3)** and achieve grades **9.2 CGPA (German Grade: 1.4)** in 10th standard. My **IELTS score of 7.5**, with individual scores of Listening: 8.0, Reading: 8.0, Writing: 6.5 and Speaking: 6.5, clearly shows my English competency in August 2024. This credential emphasizes my language skills and my preparedness to engage in a worldwide academic scene.

Apart from my academic success, I have acquired useful experience by means of an **internship at CYRAAC Services Private Limited, Bangalore, India**, from June 2021 to November 2021. I worked on market research to grasp consumer demands, tastes, and industry trends as well as competition offers and market prospects for sales throughout that time. This practical experience has strengthened my academic knowledge and given me a view of Electronics Engineering's real-world useful applications. Currently employed as a **Consultant - Sales for the same organization**, I find potential leads, schedule meetings to learn about their needs, and present company products. I participate in the negotiating stage as well to conclude deals. Along with I was awarded certificate of participation for "**Poster Presentation Contest**" and attending a Workshop on '**Robotics**'.

Germany is home to the most sophisticated colleges in the world and the elite, which have always given each of their students an amazing educational experience. This is why I want to apply here. Since field education in Germany is significantly better than in other countries, I wish to remain here. I wish to encounter the German culture, diversity, and good exposure. Germany's high academic standards and quality of instruction have me deciding on that country for my Master's degree. Germany will enable me to develop both personally and professionally, thus I wish to study there. Rich German culture promotes accuracy, creativity, and a strong feeling of community, hence I want to really absorb it.

I would want to relate a narrative from my last internship that motivated me to study communications and information technology. I carried out industry trend analysis, customer needs, and market research to better grasp this encounter helped me to see in the digital era of today the need of efficient communication and information management. The Master's degree at the University of Bremen will provide me with the technical know-how and social skills required to succeed in this sector. While modules like "Network Security" and "Data Management" will provide me with practical skills vital for my job development, courses like "Advanced Communication Systems" and "Information Theory" will provide me a strong knowledge of the subject matter.

The University of Bremen's great reputation and standing inspire me to apply. Ranked among Germany's best universities, the University of Bremen is well-known for having robust research initiatives. The campus is alive with clubs, events, and cultural activities that just help to increase the likeability of the university. The University of Bremen boasts outstanding facilities and faculty, and I am eager about the possibility of studying from some of the finest brains in the field. With its rich past and cultural sites, Bremen presents a suitable setting for both intellectual and personal development. Furthermore, Bremen's local employment scene is booming; many businesses are recruiting recent graduates from the Communications and Information Technology program.

Since a Master's degree in Communications and Information Technology will allow me to work in several professional roles including **Network Engineer, Communication Specialist, and Information Systems Manager**. I want to work since the employment market for these positions is strong and expanding. The curriculum will equip me with the knowledge, abilities, and practical experience required succeeding in these exciting and fast expanding domains, therefore fostering innovation in many different sectors.

After closely looking over the Master's program I am applying for, I have decided that the course exactly fits my goals and so I would want to obtain a chance to attend the University of Bremen. With any luck, my letter gets a positive response.

I value your giving my application some thought.
Meghana, Manjegowda
