

Statement of Purpose

My name is **Isha, Sudele**, an India citizen. I'm writing to say how highly the **University of Hildesheim's Master of Science in Software Engineering (MSc)** programme interests me. Having a strong academic background, a variety of professional experience, and a clear future vision, I am sure this program is the ideal fit for my ambitions and academic goals.

Academic and Professional I turned up an **84.2% (German Grade: 1.7)**, mark in my 10th grade in 2018. Following that, in 2020 I finished in 12th grade with an **81.6% (German Grade: 1.8)**. Earning a CGPA of **8.71 (German Grade: 1.6)**, Graphic Era Hill University, Dehradun, Uttarakhand, India, is helping me to pursue a **Bachelor of Technology in Computer Science and Engineering**. Aside from this, I worked on a bachelor's project called "**Pet Animal Welfare**," which developed a street animal adoption website utilizing **Django, HTML, CSS**, and machine learning for disease prediction. In the **IELTS test, I scored 7.0 bands**; after completing a course on "**Demystifying Intellectual Property for Research Integrity and Economic Development**" by Delhi Technological University.

I finished a **2-day Blockchain for Beginners** Workshop run by CodroidHub Private Limited. Along with web development technology, my skills include mastery of programming languages including Python, C++, and Java. I also finished a **4-week virtual internship program** under Full Stack Development run by ICT Academy. I learned front-end as well as back-end development over this practice. I also worked on a project applying a street animal adoption system in the real world. These encounters have given me insightful understanding in software development and efficient technology-based problem-solving ability.

Why this University? The **University of Hildesheim's** Master of Science in Software Engineering (MSc) programme appeals especially to me because of its extensive course and chance to study advanced subjects such software project management, software architecture, and data science. My past studies and initiatives have piqued my curiosity in these subjects. Developing my first mobile application excited me, and I felt great when I saw it run perfectly. The Hildesheim program will enable me to advance my knowledge and abilities in these fields, therefore arming me for a successful career in software engineering. The work being done at the Institute of Computer Science, where innovative research in several spheres of science is carried out, especially interests me

Why this Program? I want to Pursuing my **Master's degree in Software Engineering** would be best at the University of Hildesheim because of its prestigious staff, modern facilities, and dedication to academic quality. The university's lively academic community and concentration on research-driven teaching strategies really inspire me. Furthermore, the chance to network in the field of software engineering by working with business leaders and participating in internships will offer priceless practical knowledge. Modules like "Machine Learning," "Data Analysis," and "Software Engineering"—which fit my career objectives and interests particularly pique my curiosity. These courses will provide me the technical understanding and abilities required to succeed in the field of applied computer science.

Why Germany? I decided to study in Germany in order to take advantage of its excellent educational system and rich cultural legacy. The field of education in Germany is significantly better than in other countries, hence I wish to remain here. I want to really experience Germany's variety and culture since I think it will provide me wonderful exposure. Germany presents various employment possibilities in the engineering sector, hence I wish to study there. Experiencing Germany's advanced technology and creative environment would help me to grow personally and professionally. I want to study my master's program there. Studying in Germany will help me acquire the skills and information required to succeed in my field, thus both personally and professionally

Occupation Objectives - After earning my Master of Software Engineering, I hope to land jobs in project management, data science, or software development. Working in Germany will allow me to apply the most recent techniques to challenging technical challenges, therefore supporting businesses' growth and competitiveness ahead of their time. I intend to maintain developing professionally in software engineering by always learning and adjusting to new technology developments. In business and beyond, I ultimately see myself spearheading initiatives using software technology to improve the world.

Conclusion - I appreciate you gave my application some thought. Beginning this next step at the University of Hildesheim excites me. Contributing to the active academic community of the institution excites me since it will equip me with the tools and knowledge required to reach my professional aspirations in applied computer science. This curriculum will give me the tools and basis I need to succeed in my next projects, so I am sure

Sincerely,
Isha, Sudele
