

Statement of Aim

Dedicated and results-oriented, with a solid academic background and practical computer science and engineering experience, I am **Raghav**. Declaring my interest in the **University of Göttingen's Master of Applied Computer Science** fascinates me. My credentials, motivations for applying to this program, and objectives are compiled in this letter.

I graduated in May 2023 with a **CGPA of 7.80 (German equivalent: 2.10)** from Kurukshetra University, Kurukshetra, India, having earned my **Bachelor of Technology in Computer Science and Engineering**. This captures my strong basis in computer science. Prior to that, I passed the Senior School Certificate Examination (Class 12th) taken through the Central Board of Secondary Education in New Delhi, India. Beginning with the All India Secondary School Examination (Class 10th), also from the Central Board of Secondary Education, I came in with **8.4 CGPA (German equivalent: 1.80)** in May 2017. I have also cleared my **IELTS with an overall C1 level of 7.0 CEFR**.

Germany's emphasis on creativity, research, and superior education makes studying there desirable. The intellectual development and useful information Germany's universities foster appeals to me. Furthermore making Germany a perfect location for my master's studies are its strong economy and leadership in the domains of manufacturing and technology. Immersion in the rich German culture and varied community will help me to lay a solid basis for both my personal growth and future employment. Participating in Germany's active academic scene will enable me to develop both personally and professionally.

The Master of Science in Applied Computer Science at the University of Göttingen particularly interests me because of my educational background and desired job path. During my undergraduate studies, when I found classes in Artificial Intelligence & Machine Learning and Mobile Application Development to captivating, my passion in computer science started. These courses let me see how creatively technology may address practical issues. This encounter helped me to understand the need of sophisticated understanding in computer science to handle difficult problems. Essential in the digital era, subjects such algorithms, machine learning, and data science inspire me greatly to study. This curriculum will, in my opinion, equip me with the technical knowledge and problem-solving ability required to flourish in the IT sector.

The University of Göttingen distinguishes itself for its dedication to outstanding research, therefore fostering a motivating environment for intellectual development and innovation. The university's cooperation with top businesses offers academic knowledge application and practical experience. The varied teacher and student body will enable me to grow in my ability for intercultural communication and cooperation. The contemporary facilities help research and instruction, and the opportunity to collaborate with eminent scholars appeals greatly. Göttingen is a great destination to study and develop with its vibrant local employment market and rich cultural environment.

I think the Master of Applied Computer Science degree will present me lots of employment possibilities. I want to be in positions include **knowledge engineer, business analyst, or data scientist**. For recently graduated people in this profession, it has a bright employment scene. The initiative will provide me the technical tools required to land in these roles. Learning in a cosmopolitan setting will also enable me grow personally and equip me for future leadership positions. Having this degree, I am sure I will reach my career objectives and greatly advance the subject of applied computer science.

At last, I am confident that working for a Master's degree in Applied Computer Science at the University of Göttingen will greatly forward my career. The program satisfies my professional goals, employment experience, and academic background. Researching, working with colleagues, and learning from seasoned teachers all thrill me. Kindly review this application and provide me the best stage to fulfill my career goals.

I value your giving of my application some thought.

Raghav
