

Letter of Motivation

Introduction

My full name is **Arpit, Parashar**, and I kindly wish to apply for a **Master of Science** program in **Computer Science** at **Technische Universität Clausthal**. I have a Bachelor's degree, with lots of technical and practical experience and I'm very keen to expand my understanding and skills in computer science. This program should allow me to further explore my passion for technology and in the long term contribute to my long-term career aspirations.

Academic Background, Internship, and Technical Skills

I have completed with **Bachelor of Technology in Computer Science and Engineering** from **Maharshi Dayanand University**. My undergraduate score was **72.83% (German grade 2.36)**, and I learned topics like Database Structure & Algorithms, Computer Networks, Network Security & Cryptography. Before my bachelor's degree, I did a **Diploma in Electrical Engineering** from Haryana State Board of Technical Education. This diploma gave me good basics in subjects like fundamentals of electrical and electronics engineering and digital electronics which are important for computer science also. Similarly, I proceeded to pass my All India Secondary School Examination (10th Class) under the Central Board of Secondary Education (CBSE) and acquired some basic mastery in subjects like Mathematics, Science, and Information Technology. As the **Flutter Associate Developer Intern** in **Nijomee Technologies Pvt. Ltd**, I got hands-on experience in the field of mobile development, problem-solving, and of course teamwork abilities. Moreover, I have also worked on **Programming languages** such as **Python, C, C++, JAVA**, and **Microsoft Office**. Alongside my technical skills, my **IELTS score of 6.5 (CEFR Level: B2)**.

Why Master of Science in Computer Science?

The **Computer Science Master's program** at **TU Clausthal** bridges the gap between research and practice in a perfect middle ground while fulfilling my career objectives. To develop today's tech world requires up-to-date skills, the curriculum is also intended to bring students up to date with the latest in artificial intelligence, data science, and software systems engineering. In the forefront of these changes and the new digital era, the program fosters the understanding of the theoretical basis and the practical 'hands-on' applications of the science of Computer Science, prepares graduates to be not only 'digitally aware', but also make their impact felt within the digital transformation process of practically any industry. I have very much a special interest in courses such as Secure and Cooperative Information Systems and Artificial Intelligence which will give me the capacity to create in areas of IT security and machine learning. There are two major motivators for me: the chance to conduct research projects, and the 'Research Track', which encourages students who wish to go on to a doctorate. More importantly, the strong industry partnerships and the chance to write my thesis with a company will make the move from academia to industry much easier. As Germany's requirement for IT specialists is increasing, this degree will allow me to enter and perform in a variety of exciting careers within software development, IT security, and project management.

Why Germany?

Germany boasts of world-class education and lots of the best universities in the world. Research and development in the country is a very high focus area, making it the correct place to study computer science at an advanced level. Moreover, the tech sector is thriving in Germany as there are a lot of tech companies that are already present in **Germany** and third nations stay profitable to one other. As well as affordable education, Germany provides a good learning system without respecting it. As well as this, I will be able to expose myself to a multicultural environment and perceive other people's views; collaborate with peers from different backgrounds. Rest assured lastly that with **Germany's** robust job market, with specific relevance to the convergence of technology, there are great career opportunities post-graduation.

Why TU Clausthal?

The reason for choosing TU Clausthal was that it is very weighted to focus on academic excellence and practical application in computer science. What the university is known for is its highly specialized programs that have a tight connection to industry partners so students get the opportunity of the real-life experience. The modern research facilities at the university want to produce grassroots graduates ready to work in the industry. TU Clausthal's Computer Science faculty excels in cutting-edge research work and is active in the fields. Being part of such a famous center would not only help develop my technical skills but also allow me to work on the research areas I like. Second, TU Clausthal's proximity to Germany's most prosperous tech companies makes it an excellent location for me to study.

Conclusion

Finally, I believe the **Master of Science in Computer Science** at **TU Clausthal** will grant me the knowledge and skills required to succeed in the ever-changing technology field. I would love to be a part of and then reap the benefits of such me wealth of an academic environment your university provides.

Thank you for considering my application. I look forward to your positive response.

Sincerely,

Arpit, Parashar
