

Letter of Motivation

Introduction

My full name is **Arpit, Parashar**, and I wish to apply for a **Master of Science in Data Analytics** at **BSBI**. This letter is to express my deep interest in joining this program, as I see it as the means to obtain the additional advanced knowledge and hands-on practical skills needed to be successful in the fast-paced world of data analytics. My academic qualifications are in Computer Science and Engineering which has prompted me to build on my skills and become a worthy asset to data analytics.

Academic Background, Internship, and Technical Skills

I have completed with **Bachelor of Technology in Computer Science and Engineering** from **Maharshi Dayanand University**. My undergraduate score was **72.83% (German grade 2.36)**, and I learned topics like **Database Structure & Algorithms, Computer Networks, Network Security & Cryptography**. Before my bachelor's degree, I did a Diploma in Electrical Engineering from Haryana State Board of Technical Education. This diploma gave me good basics in subjects like fundamentals of electrical and electronics engineering and digital electronics which are important for computer science also. Similarly, I proceeded to pass my All India Secondary School Examination (10th Class) under the Central Board of Secondary Education (CBSE) and acquired some basic mastery in subjects like Mathematics, Science, and Information Technology. As the **Flutter Associate Developer Intern** in **Nijomee Technologies Pvt. Ltd**, I got hands-on experience in the field of mobile development, problem-solving, and of course teamwork abilities. Moreover, I have also worked on **Programming languages** such as **Python, C, C++, JAVA, and Microsoft Office**. Alongside my technical skills, my **IELTS score of 6.5 (CEFR Level: B2)**.

Why Master of Science in Data Analytics?

The field that has caught my attention is **Data Analytics** and its importance in today's world economy and technology. **BSBI** has structured the **Master of Science in Data Analytics** as follows; analyzed from a modern and pragmatic perspective comprising state-of-the-art topics that include predictive analytics, machine learning using Python, and Computer Vision. The course will enable me to interact with research active staff and professionals in practice and apply what is learned in real-life briefs and using guest speakers. Thus, the ability to work with loads of data will be developed through the use of practice modules like Enterprise Data Warehouse and Big Data Analytics. The possibility of focusing on visualization by employing programs such as Tableau in conjunction with learning the German language adds to the appeal of the education process even more. Further, the program is there with new hears like research areas such as Artificial Intelligence and the international features of the program also comply with my intended career. It will therefore enable me to be placed in areas that are experiencing tremendous growth such as business analytics to be able to solve the issues facing the growing data economy.

Why Germany?

Germany is well known all over the world for their strict focus on research and development particularly in the technological sector. The country boasts of a good economy and the demand for skilled data analysts to meet the current market demand would be well served by my pursuing my master's studies in this country. **Germany** boasts of having many international organizations and startups that will offer students practical experience and jobs after completing their studies. Also, the educational system in that country is one of the most prestigious and credited for the highest standard of academic trappings. Studying in **Germany** will also enable me to have and work with a cosmopolitan student population from around the world. This is complemented by the fact that the interphase between academia and industry in Germany is quite close thus providing me with the best and most modern tools and techniques in data analytics.

Why BSBI?

Among the many reasons why I chose to attend **BSBI**, I wanted an innovative school, that encourages entrepreneurship, and that focuses on the application of what is learned in the classroom. The business relationships of the institution continue to offer students excellent networking opportunities while presenting problems experienced by practicing firms. Moreover, as a city with many startups and innovative technologies, Berlin is an ideal place for a young data analyst such as myself to develop at **BSBI**. The faculty is comprised of practicing professionals and academics with academic and industry backgrounds. I also like the cultural and professional diversity of students at BSBI through which I will be able to interact with those from other cultures. Another appealing aspect is the focus on personal growth and preparation for the job market, which is conducive to my career goals at **BSBI**.

Conclusion

Therefore, I find that gaining a **Master of Science in Data Analytics** from **BSBI** will arm me with the necessary skills, knowledge, and practical experience to enable me to achieve those long-term objectives. It enables me to meet your expectations as far as academic qualification coupled with skills acquired in carrying out data analysis is concerned. I am eager to be a part of the **BSBI** organization to contribute myself maximum to the organization and to enhance myself for the further position of this organization.

Thank you for considering my application.

Sincerely,

Arpit, Parashar
