

Letter of Motivation

Introduction

My name is **Arpit, Parashar**, and I wish to apply for the **Master's in Scientific Computing program** at **Heidelberg University**. Having the correct academic background in the field of Computer Science Engineering and having the experience through the internships. To augment my learning, I am desirous to proceed with a specialized graduate degree in **Scientific Computing** to make imperative advancements in computational procedures and heightened problem-solving techniques.

Academic Background, Internship, and Technical Skills

I have completed with **Bachelor of Technology in Computer Science and Engineering** from **Maharshi Dayanand University**. My undergraduate score was **72.83% (German grade 2.36)**, and I learned topics like **Database Structure & Algorithms, Computer Networks, Network Security & Cryptography**. Before my bachelor's degree, I did a Diploma in Electrical Engineering from Haryana State Board of Technical Education. This diploma gave me good basics in subjects like fundamentals of electrical and electronics engineering and digital electronics which are important for computer science also. Similarly, I proceeded to pass my All India Secondary School Examination (10th Class) under the Central Board of Secondary Education (CBSE) and acquired some basic mastery in subjects like Mathematics, Science, and Information Technology. As the **Flutter Associate Developer Intern** in **Nijomee Technologies Pvt. Ltd**, I got hands-on experience in the field of mobile development, problem-solving, and of course teamwork abilities. Moreover, I have also worked on **Programming languages** such as **Python, C, C++, JAVA**, and **Microsoft Office**. Alongside my technical skills, my **IELTS score of 6.5 (CEFR Level: B2)**.

Why Master's in Scientific Computing?

I think the **Master in Scientific Computing** is perfect for me because the goal of the program fits my plans to join computational research and algorithm development. It makes me greatly attracted to the interdisciplinary subject that takes features of mathematics, computer sciences, and engineering to assist me in modeling and solving problems in the best possible manner that exists in the real world though there are more advantages of the field. From this course, I will be in a position to gain complex algorithms, computing solutions, and the relevant theories for use in calling disciplines inclusive of Data Science, Machine learning, and Physical simulations. Furthermore, the impact of the program on learning by doing and the emphasis on research means I can work on innovation projects and further research science algorithms. Surely, the achieved knowledge to contribute to the understanding of the factors entering the profession of Computational Scientist or Software Developer in related industries or research centers operating within the frames of science and technology advancements. Likewise, through the course, I will build competencies in critical thinking and problem-solving, which will be a point in today's dynamic technical world to deal with other evolving aspects of computation.

Why Germany?

This is why I believe that **Germany** is the perfect country for me to do my higher education in Given the country's academic reputation and focus on Computer Sciences and engineering. It is a fact that German universities possess research-intensive reputations and modern facilities that provide the student with the finest academic insights. The country also has a good technological infrastructure and plenty of companies and research institutions that offer many opportunities for cooperation and training. Furthermore, owing to the enforcement of academic freedom and diversification of the academic environment in **Germany** creativity and critical thinking skills are encouraged. A new culture, friendly attitude towards international students, and a huge amount of people from different countries make studying and living in the country very interesting.

Why Heidelberg University?

Heidelberg University remains my choice of a university of study because of its long-standing experience in academic learning as well as its leadership in research and innovation. I appreciate how the university has incorporated inter-disciplinary undertakings most notably in scientific computing and computational science to my areas of interest. I am also enlightened with the university's computer infrastructure, which is well-string throughout as fast as the system as this is elemental in the subject I want to study and also practice. I will reap immense benefits from **Heidelberg's** excellent faculty members comprising of most of whom are key computational science lords and masters. In addition, the university's external affiliation and research affiliations will provide me with membership to engage in contemporary project development and acquire practical sector experience. The active and lively academic culture in **Heidelberg** along with support from its historical past and international connections will most assuredly help me create an environment that will be invigorating and challenging.

Conclusion

Therefore, I wish to be admitted to **Heidelberg University** to take a **Master's in Scientific Computing** and be impactful in the area of computation research. I strongly believe that **Heidelberg's** standard academic offering, rich research offering, and active learning environment will help me to accomplish my career goals.

Thank you for considering my application. I look forward to the opportunity to contribute to and grow within the vibrant community at **Heidelberg University**.

Yours sincerely,

Arpit, Parashar
