

Letter of Motivation

Introduction

I am **Arpit, Parashar**, and I am writing to express my interest in pursuing a **Master of Science in Computer Science** at **IU - International University of Applied Sciences**. With a solid educational background in Computer Science and Engineering and I have practical experience as a Flutter Associate Developer Intern, I am willing to enhance my knowledge and skills in the sphere of studies at your esteemed institution.

Academic Background, Internship, and Technical Skills

I have completed with **Bachelor of Technology in Computer Science and Engineering** from **Maharshi Dayanand University**. My undergraduate score was **72.83% (German grade 2.36)**, and I learned topics like **Database Structure & Algorithms, Computer Networks, Network Security & Cryptography**. Before my bachelor's degree, I did a Diploma in Electrical Engineering from Haryana State Board of Technical Education. This diploma gave me good basics in subjects like fundamentals of electrical and electronics engineering and digital electronics which are important for computer science also. Similarly, I proceeded to pass my All India Secondary School Examination (10th Class) under the Central Board of Secondary Education (CBSE) and acquired some basic mastery in subjects like Mathematics, Science, and Information Technology. As the **Flutter Associate Developer Intern** in **Nijomee Technologies Pvt. Ltd**, I got hands-on experience in the field of mobile development, problem-solving, and of course teamwork abilities. Moreover, I have also worked on **Programming languages** such as **Python, C, C++, JAVA, and Microsoft Office**. Alongside my technical skills, my **IELTS score of 6.5 (CEFR Level: B2)**.

Why Master of Science in Computer Science Program?

I believe that the **M.Sc. in Computer Science** offered at **IU International University of Applied Sciences** matches my career objective since I aim to be a computer scientist. This program entails a course plan and includes fundamental fields ranging from software engineering, data science, artificial intelligence, and cybersecurity among others. The first year will be important to get a strong grounding in the course's statistical and mathematical content, as well as basic issues in algorithm design and evaluation and such topics as the complexity of computations, optimization, and approximation. Specifically, the elective modules in advanced cyber security, machine learning, and blockchain technology will enable me to develop in three rapidly evolving informative technology areas, thus training me to fit into the modern and competitive IT market. This course is very practical and teaches not just the theory but the application of the concepts learned through project works, this will build up my technical skills. Adding an internship will be beneficial because students will gain practical experience and make important contacts. Upon completion of this program, I can secure a diversity of relevant careers with some of the leading technology firms and thus guarantee my ability in the field of computer science.

Why Germany?

The level of education in **Germany** is rather high and education in **Germany** always emphasizes the stages of research and innovations. There are many high-tech corporations and, as a result, new ventures there and this has made the country offer excellent opportunities for the growth of the career. Currently, **Germany** is one of the most powerful economies, having great technological advancement and these two characteristics make computer science the best to put into practice ideas. In addition, the orientation to cultural Diversity and International Environment in **Germany** will contribute to the education process. Other stake activities as an expression proving that the country is innovative and sustainable were also appealing to my career choice. They also offer an appropriate lifestyle and many chances for individual self-fulfillment in **Germany**.

Why IU - International University of Applied Sciences?

This **IU - International University of Applied Sciences University** has Among the many factors, it has established a reputation for providing quality education to its students as well as the practices of different approaches to teaching. The particular area that would be of much interest to the university is where the document under discussion focuses on the pragmatic angle of education and concern with businesses. The current facilities and utilities at **IU** will greatly contribute to my study and research endeavors. The contacts with the companies at the international level will help the university to generate internship and employment places for its students. What this would make possible is the learning of students with different cultures and academic backgrounds due to the ethnic diversity of **IU**. The policy on the support of international students in the university ensures that the change and experience in the university will be a healthy affair.

Conclusion

I have no uncertainty that attending **IU's International University of Applied Sciences** to pursue a **Master of Science in Computer Science** would vastly promote my career and personal growth. I simply cannot wait to meaningfully impact the academic community at your prestigious university by bringing my passion, experiences, and skill set.

Thank you for considering my application.

Regards,

Arpit, Parashar
