

Letter of Motivation

Introduction

I am **Arpit, Parashar**, and I am writing to convey my desire to apply for the **Master of Science in Cyber Security** at **SRH Berlin**. As a Computer Science & Engineering graduate from Maharshi Dayanand University and due to my strong technical background and passion in the technical domain, I believe that this program greatly complements my academic profile and career plans.

Academic Background, Internship, and Technical Skills

I have completed with **Bachelor of Technology in Computer Science and Engineering** from **Maharshi Dayanand University**. My undergraduate score was **72.83% (German grade 2.36)**, and I learned topics like **Database Structure & Algorithms, Computer Networks, Network Security & Cryptography**. Before my bachelor's degree, I did a Diploma in Electrical Engineering from Haryana State Board of Technical Education. This diploma gave me good basics in subjects like fundamentals of electrical and electronics engineering and digital electronics which are important for computer science also. Similarly, I proceeded to pass my All India Secondary School Examination (10th Class) under the Central Board of Secondary Education (CBSE) and acquired some basic mastery in subjects like Mathematics, Science, and Information Technology. As the **Flutter Associate Developer Intern** in **Nijomee Technologies Pvt. Ltd**, I got hands-on experience in the field of mobile development, problem-solving, and of course teamwork abilities. Moreover, I have also worked on **Programming languages** such as **Python, C, C++, JAVA, and Microsoft Office**. Alongside my technical skills, my **IELTS score of 6.5 (CEFR Level: B2)**.

Why Master of Science in Cyber Security?

I find the **Cyber Security** program of **SRH Berlin** most attractive mainly because it is designed to equip me with adequate knowledge and training in IT as well as security in different business settings. It is important because of the topics discussed in the program including Blockchain, DevSecOps, and cryptocurrencies among others. At the same time, the attention to the technologies aimed at security and IT security management will provide me with an understanding of how security can be designed and applied. Besides, I will build proficiency in legal issues such as data protection so that am ready to address security issues in compliance with policies. The technical competencies in the areas of malware analysis, forensics, and project management will provide a basis for defending against actual cyber threats. Therefore, my future careers, which include a security consultant or an IT manager, will mostly involve protecting entities' digital assets and easing risk management. The career opportunities in this field particularly in risk analysis firm and banking institution sectors are enormous and I would like to contribute my knowledge to these sectors.

Why Germany?

Germany is my preferred country of study because of the quality education system that is considered to be sound scholarly as well and relevant to the needs of the present-day world. German universities focus on teaching and providing the latest research experience and are closely related to industries and companies. The country is also a technology hub and therefore the best place to learn about new trends in cyber security. In addition, the culture of research and development that is fast growing in **Germany** makes it possible for students to be part of the technological world. The multicultural nature of **Germany** also allows students to further their learning and possibly engage with more professionals from abroad.

Why SRH Berlin?

For this program, I have particularly selected **SRH Berlin** because it is recognized for providing industry-oriented education in a stimulating and most importantly students-oriented environment. The fact that the university is dedicated to applied sciences coupled with available modern amenities will equip me with real-life knowledge for the cybersecurity specialization. The academic program of Cyber Security focuses on the development of hands-on projects as well as real-world cases, it is a strong suit that helps to combine academic and practical know-how. Moreover, **SRH Berlin** has a good network with industrial partners where internships will also play a vital role in getting real-world experience. When attending the university, I will also be able to acquire experience in a multicultural university and implement an international perspective on security issues.

Conclusion

Therefore, I assure myself and the admissions board that due to my academic performance, work experience, and passion for cyber security, I ought to be placed in this program. I am particularly interested in the area of **Cyber Security**, which is why I would like to develop together with the **Master of Science** program at **SRH Berlin**.

Thank you for considering my application. I look forward to the possibility of being a part of your esteemed institution.

Sincerely,

Arpit, Parashar
