

Letter of Motivation

Introduction

My full name is **Arpit, Parashar**, and I kindly wish to apply for a **Master of Science** program in **Computer Science** at **TU Darmstadt**. Having the correct academic background in the field of Computer Science Engineering and having the experience through the internships. I feel reasonably inspired and prepared to enhance my understanding of this computing specialization by benefiting from the worthwhile program being provided at this wonderful university.

Academic Background, Internship, and Technical Skills

I have completed with **Bachelor of Technology** in **Computer Science and Engineering** from **Maharshi Dayanand University**. My undergraduate score was **72.83% (German grade 2.36)**, and I learned topics like **Database Structure & Algorithms, Computer Networks, Network Security & Cryptography**. Before my bachelor's degree, I did a Diploma in Electrical Engineering from Haryana State Board of Technical Education. This diploma gave me good basics in subjects like fundamentals of electrical and electronics engineering and digital electronics which are important for computer science also. Similarly, I proceeded to pass my All India Secondary School Examination (**10th Class**) under the Central Board of Secondary Education (CBSE) and acquired some basic mastery in subjects like Mathematics, Science, and Information Technology. As the **Flutter Associate Developer Intern** in **Nijomee Technologies Pvt. Ltd**, I got hands-on experience in the field of mobile development, problem-solving, and of course teamwork abilities. Moreover, I have also worked on **Programming languages** such as **Python, C, C++, JAVA**, and **Microsoft Office**. Alongside my technical skills, my **IELTS** score of 6.5 (CEFR Level: B2).

Why Master of Science in Computer Science Program?

The **Master of Science** in **Computer Science** offered at **TU Darmstadt** provides me with an advanced study of state of art issues that are active to my choice of career. The approach of the courses, the areas of courses I want to learn Data Science, Machine Learning, Cybersecurity, etc are exactly what I need. The concentration on current theoretical knowledge and a strong connection with real life will help me to provide the most essential answers to the most important problems in the field of IT. Moreover, the program will enable me to work on research projects and cooperate with partners from the industrial sector and I think that this is the most important advantage of the program, providing me an opportunity to take part in the developments. This way, the course is versatile because one can see been your core field or not but then you can focus on what to begin with this semester making it too more definite. This program with help me with my professional development and better and more challenging jobs in the international market of technology. This is because the program is better known among students available, which means it prepares some of the best students to meet the market requirements in various fields.

Why Germany?

Germany is recognized internationally for its high standards in learning institutions and its focus on research and development particularly in engineering and technology disciplines. First, **Germany** is famous for its focus on science and innovations, especially in the technology and engineering sectors. Many universities in **Germany** offer good quality education and they always encourage innovation. Second, it is an opportunity to get a multicultural experience as the primary model of education in **Germany** will help me interact with different viewpoints and ideas, which I consider vital as a person and a professional. Moreover, the chance to study in English as well as to have close connections with industry thanks to the educational centers in **Germany** will benefit my future profession.

Why TU Darmstadt?

Out of all the institutions I have come across, **TU Darmstadt** impresses me as an institution that is esteemed for its emphasis on quality teaching and research. Its recognition in computer science, its focus on applied research that promotes interaction with the commercial world, and its ethos appeal to my values and aspirations. I am also astounded by well well-equipped and enabled environment in terms of various learning amenities for the students in the respective colleges, which will improve my learning outcomes. Furthermore, the active involvement of the university in supporting innovation and entrepreneurship is even more attractive, knowing that I want to make changes in IT and software technologies. This means that through active partnerships with large technology companies, the university provides an excellent platform for networking as well as gaining practical experience. Also, its active campus and focus on the multicultural audience can provide a comprehensive and joyful process of training.

Conclusion

In conclusion, I would like to apply my abilities and passion to earning the **Master of Science** in **Computer Science** degree at **TU Darmstadt**. I am sure that this course will prepare me with all the skills I need to become successful in the field that I have chosen for myself and be able to make the relevant change in the IT sector. Due to these reasons, I wish to join this prestigious institution to extend my academic and career progression.

Sincerely,

Arpit, Parashar
