

Letter of Motivation

Introduction

I am **Arpit, Parashar**, and I hereby declare my eager desire, to be admitted, for a **Master of Science in Applied Computer Science** at the **Technische Hochschule Deggendorf**. I have done my Bachelor of Engineering in Computer Science and Engineering and established a sound knowledge of programming skills. I wish to undertake this master's program to sharpen my academic qualifications for the ever-changing world of technology and computer science.

Academic Background, Internship, and Technical Skills

I have completed with **Bachelor of Technology in Computer Science and Engineering** from **Maharshi Dayanand University**. My undergraduate score was **72.83% (German grade 2.36)**, and I learned topics like **Database Structure & Algorithms, Computer Networks, Network Security & Cryptography**. Before my bachelor's degree, I did a Diploma in Electrical Engineering from Haryana State Board of Technical Education. This diploma gave me good basics in subjects like fundamentals of electrical and electronics engineering and digital electronics which are important for computer science also. Similarly, I proceeded to pass my All India Secondary School Examination (10th Class) under the Central Board of Secondary Education (CBSE) and acquired some basic mastery in subjects like Mathematics, Science, and Information Technology. As the **Flutter Associate Developer Intern** in **Nijomee Technologies Pvt. Ltd**, I got hands-on experience in the field of mobile development, problem-solving, and of course teamwork abilities. Moreover, I have also worked on **Programming languages** such as **Python, C, C++, JAVA**, and **Microsoft Office**. Alongside my technical skills, my IELTS score of **6.5 (CEFR Level: B2)**.

Why Master of Science in Applied Computer Science Program?

As I wanted to develop myself in this field, I applied for the **Master of Science in Applied Computer Science** program where I will be able to focus on embedded systems, i.e. the result of the adhesion of software and hardware that generates an answer to a great number of market industries, such as automotive, health care, automation. During my undergraduate Computer Science and Engineering degree, this course will further enhance my knowledge of software systems on what I learned. This program will emphasize problem-solving of design testing and the development of embedded systems with intensive learning which will be helpful in this aspect. I like the approach of the course both theoretical and applied computer science as distinct modules such as embedded systems and electrical engineering will equip me for future advancement in the technology sector. The program with such an approach of project-based and real-life oriented will equip me with enough skill system to solve the challenges of high-tech development globally. Additionally, participation in research-based projects and working with industrial partners will provide great practical experience. By passing this course I will be in a good position to solve real-world problem-solving problems in technology-oriented organizations and better job opportunities in countries across the world.

Why Germany?

First, it is important to note that **Germany** is increasingly famous around the world in terms of engineering, innovation, and technology. It is one of the most known hubs for advanced research institutions and technical firms; therefore the best place for students of similar themes in computer or others. The knowledge this country provides is suited to knowledge that gives the appropriate mix of theoretical knowledge and practical experience appropriate to the knowledge that an engineer should possess. **Germany** also has developed industrial industries and economy to intern in IT industries with various opportunities for internship/job vacancies. In **Germany**, I appreciate sustainability and innovation, and so this is the country where I'm able to grow as a person and as a professional, as well. I was also drawn to Germany because of the low cost to study, and its friendly policies for the students.

Why Technische Hochschule Deggendorf?

The reason I chose **Technische Hochschule Deggendorf** is because it performs very well Academically plus it is an Applied Science University. I am very interested in this university because of its strong focus also in practical and real-life courses and covering these courses computer science topics, it has advanced laboratories and research facilities to give me what I require to have advancement in my technical knowledge. For me, the call of the university in terms of research and innovation in such areas as Artificial Intelligence, Machine Learning, and whatnot is perfect. Also, student internships or practical projects to fit the market are possible in working with other companies. **Technische Hochschule Deggendorf** is open to students of different nationalities, and we have partnerships with institutions across the globe, so I would benefit from a multicultural landscape in which I will grow. I also give thanks to the several professional services in this university which will help me in advocating for felicity and productivity in my studies.

Conclusion

Altogether, I am sure that further education in **Technische Hochschule Deggendorf** via the **Master of Science in Applied Computer Science** program will help me to develop the necessary competencies, acquire the required knowledge, and gain the practical experience that will enable me to succeed in my intended career.

Thank you for considering my application.

Yours sincerely,

Arpit, Parashar
