

Letter of Motivation

Introduction

My name is **Arpit, Parashar**, and I am writing to state my intentions regarding my **Master of Science in Applied Data Science** at the **University of Göttingen**. As a Computer Science and Engineering graduate, it will be a great privilege to improve on the knowledge and experience in applied data science that can be achieved when pursuing this master's degree.

Academic Background, Internship, and Technical Skills

I have completed with **Bachelor of Technology in Computer Science and Engineering** from **Maharshi Dayanand University**. My undergraduate score was **72.83% (German grade 2.36)**, and I learned topics like **Database Structure & Algorithms, Computer Networks, Network Security & Cryptography**. Before my bachelor's degree, I did a Diploma in Electrical Engineering from Haryana State Board of Technical Education. This diploma gave me good basics in subjects like fundamentals of electrical and electronics engineering and digital electronics which are important for computer science also. Similarly, I proceeded to pass my All India Secondary School Examination (10th Class) under the Central Board of Secondary Education (CBSE) and acquired some basic mastery in subjects like Mathematics, Science, and Information Technology. As the **Flutter Associate Developer Intern** in **Nijomee Technologies Pvt. Ltd**, I got hands-on experience in the field of mobile development, problem-solving, and of course teamwork abilities. Moreover, I have also worked on **Programming languages** such as **Python, C, C++, JAVA**, and **Microsoft Office**. Alongside my technical skills, my **IELTS** score of **6.5 (CEFR Level: B2)**.

Why Master of Science in Applied Data Science?

The **Master of Science in Applied Data Science** at the **University of Göttingen** is an excellent chance to master the usage of big and complex data sets. I will therefore be in a position to have more depth in Mathematics, statistics, and computing sciences while at the same time be able to focus on a particular area of application like computational Sustainability or Digital Business Administration. The core courses include information that is vitally important for the further work of a data scientist, such as machine learning, statistical modeling, and infrastructures for data science. This is because through the research focus, internships, and partnerships with industries, the program gives me a practical chance to use these methods. The ethical aspects of data science and the knowledge of how to present the findings competency will enable me to take up leadership positions in several sectors. Also, the professionalization section implies a possibility to adjust the curriculum to the goals that are important for a learner in terms of career opportunities for further effective promotion in the project activity in such spheres as, for example, healthcare, digital business, and sustainability.

Why Germany?

Germany has a well-developed education system the standard and research facilities in Germany are incredibly high so, I would prefer to go to Germany for my higher study. The country is highly focused on innovativeness especially in the aspect of technology and data science thereby creating an excellent academic bowl for learning. That is why, German universities provide a very suitable environment for obtaining theoretical knowledge as well as practical experience in some fields, which is especially important for such subjects as data science. Furthermore, the situation in **Germany** is favorable with their powerful gross; and the presence of numerous industries for the data scientist to work with leading corporations to develop relevant projects. Studying in Germany also gives me a good opportunity to join a multicultural environment and expand my circle of connections as well as broaden my perspective on cultural differences.

Why the University of Göttingen?

This led me to specifically target the **University of Göttingen** because of its focus on research and because it has a solid reputation within the data science field. The University's material provisions, as well as the availability of a great number of research materials, will enable me to succeed in my endeavors. The structure of the curriculum in the program is good, and it contains a right proportional combination of theoretical and practical knowledge, which makes it perfect for me. Another aspect that impressed me also is the cooperation of the university with leading companies and research centers where I will be ensured to achieve practice experience and develop projects that meet the requirements of modern society. Thirdly, an international outlook of the program will enable me to work with students and instructors from different backgrounds thus enhancing my learning. Women attending **Göttingen University** will find that the city is a perfect student city with lots of opportunities to grow both as a person and an academic.

Conclusion

Therefore, I am sure that working in the **Master of Science in Applied Data Science** at the **University of Göttingen** will help me to reach my goals. The subjects offered under this program, and the learning environment in Germany, make me eager for my higher studies here. I shall be pleased to be part of and be enriched by the rich academic culture of the **University of Göttingen**.

Thank you for considering my application.

Sincerely,
Arpit, Parashar
