

Letter of Motivation

Introduction

I'm **Swathi, Ramesh**, an Indian national, and I am interested and applying for an **M.Sc. in Artificial Intelligence** at **BTU Cottbus**. I am aiming to deepen in the world of artificial intelligence, obtaining those skills that could allow me to make a positive contribution to this growing blossoming industry.

Academic, Professional Experience, Technical Certifications, and Technical Skills

I hold a **Bachelor of Engineering in Computer Science and Engineering** from Visvesvaraya Technological University, India, with a **CGPA of 7.71 (German Grade: 2.3)**. I have a strong grounding in such courses as C Programming for Problem Solving, Data Structures and Applications, Computer Network and Security, Database Management System and Digital Electronics. Prior to this, I completed my Pre-University (12th Class) with a score of **78% (German Grade: 2.0)** and my 10th class exam mark sheet from the Indian Certificate of Secondary Education with **87.84 %** passing marks. I have gained practical experience through several internships. At **Varcons Technologies Pvt Ltd.**, I worked on **Twitter Sentiment Analysis** during the COVID-19 pandemic, where I applied **machine learning models** to analyze real-time data and presented a comprehensive report on the findings. Additionally, I interned at **Karnataka German Technical Training Institute**, where I completed a **Red Hat Certified Engineer (RHCE)** program, equipping me with valuable skills in Linux systems and network administration. My **Bachelor's project**, titled "**Design and Fabrication of Smart Nursing Robot**," aimed at addressing the growing demand for smart healthcare systems by leveraging **AI and machine learning** technologies to assist elderly and disabled individuals with personalized healthcare services. In terms of certifications, I have successfully completed the **Java Full Stack course** from Pentagon Space, a course on **IoT Edge Computing and IoT Analytics** from Infosys, and a training program in **Red Hat (RHCE)** from **Karnataka German Technical Training Institute Bengaluru**. These experiences, combined with my **technical skills** in **Network Analysis and Synthesis, Industrial Automation, Digital Electronics, Telecom**, and familiarity with **IoT and machine learning**, have significantly enhanced my competencies and deepened my motivation to pursue advanced studies in **Artificial Intelligence**. Also, I Completed 16 years of Education in the English Language.

Why Master of Science in Artificial Intelligence?

The **M. Sc. Artificial Intelligence** at **BTU Cottbus** is the perfect program for starting my career. It supports a wide range of applications such as autonomous driving, facial recognition, and medical data analysis, propelling us into new industry challenges. It also works on explainable artificial intelligence, meaning that besides working, running an AI system should be trusted and explainable. I will be more engaged with methods as advanced as deep learning, Bayesian networks, and constraint-based programming. Due to a broad collaboration with leading research institutions, I will have the chance to get hands-on projects and thesis work, and this exactly paves the way for a successful career in AI research and development. In particular, I'm looking forward to being able to use innovative AI solutions to solve new socially relevant problems.

Why Germany?

Germany is well known for its high quality and leading-edge education in technology and engineering. It is clear that the country is very committed to innovation and its investment in research infrastructure makes it quite a good destination for me to study. Additionally, in **Germany's** multicultural environment, one has an opportunity to collaborate with a lot of minds – minds of different cultures, which makes for creativity and a fuller scope of vision. An added benefit is that German universities place great emphasis on practical training, which will help the students get used to the jobs that the global market is looking for. **Germany's** focus on sustainability and international ethics in technology are values and goals I too share. This will provide me with an opportunity to learn in such an environment not only to increase my original academic degree but also to provide me with such basis which will help me make a substantial contribution in the area of artificial intelligence.

Why BTU Cottbus?

The most intriguing about **BTU Cottbus** to me is precisely its strong commitment to interdisciplinary approaches to artificial intelligence. Contributing to that environment are the university's state-of-the-art research facilities and the excellent faculty. Furthermore, **BTU's** working with industry leaders is to ensure that students are adequately prepared for professional challenges. The fact that I share BTU's values of sustainability and ethical AI development resonates with my values is why **BTU** is my top place of education. The chance to conduct the kind of research on real problems that advance technology and technology, in general, is something I am excited to do. In addition to that, being in an international atmosphere at **BTU** is going to allow me to get into contact with a global network of professionals and researchers who will facilitate my education.

Conclusion

In summary, I would love to study at the **BTU Cottbus** and I believe working on an **M.Sc. Artificial Intelligence** will grant me the abilities required to form a real impression in the business. I am excited to be contributing to and learning from the lively academic community of the university. It's a pleasure for me to express my application. While I hope that I'm able to contribute to the innovative work at **BTU**, I can't wait!

Regards,
Swathi, Ramesh
