

Letter of Motivation

Introduction

My full name is **Swathi, Ramesh**, and this letter is to express my interest in pursuing a **Master's degree** in **Artificial Intelligence** at **FAU Erlangen**. I want to pursue this program because I have an academic background in **computer science and engineering** and an interest in artificial intelligence. I know that will help me to be well prepared to rub out all the challenges that exist in this great field.

Academic, Professional Experience, Technical Certifications, and Technical Skills

I hold a Bachelor of Engineering in **Computer Science and Engineering** from Visvesvaraya Technological University, India, with a **CGPA of 7.71 (German Grade: 2.3)**. I have a strong grounding in such courses as C Programming for Problem Solving, Data Structures and Applications, Computer Network and Security, Database Management System and Digital Electronics. Prior to this, I completed my Pre-University (12th Class) with a score of **78% (German Grade: 2.0)** and my 10th class exam mark sheet from the Indian Certificate of Secondary Education with **87.84 %** passing marks. I have gained practical experience through several internships. At **Varcons Technologies Pvt Ltd.**, I worked on **Twitter Sentiment Analysis** during the COVID-19 pandemic, where I applied **machine learning models** to analyze real-time data and presented a comprehensive report on the findings. Additionally, I interned at **Karnataka German Technical Training Institute**, where I completed a **Red Hat Certified Engineer (RHCE)** program, equipping me with valuable skills in Linux systems and network administration. My **Bachelor's project**, titled "**Design and Fabrication of Smart Nursing Robot**," aimed at addressing the growing demand for **smart healthcare systems** by leveraging **AI and machine learning** technologies to assist elderly and disabled individuals with personalized healthcare services. In terms of **certifications**, I have successfully completed the **Java Full Stack course** from **Pentagon Space**, a course on **IoT Edge Computing and IoT Analytics** from **Infosys**, and a training program in **Red Hat (RHCE)** from **Karnataka German Technical Training Institute Bengaluru**. These experiences, combined with my **technical skills** in **Network Analysis and Synthesis, Industrial Automation, Digital Electronics, Telecom**, and familiarity with **IoT and machine learning**, have significantly enhanced my competencies and deepened my motivation to pursue advanced studies in **Artificial Intelligence**. Also, I Completed **16 years** of Education in the **English Language**.

Why Master's in Artificial Intelligence?

The field of study called **Master's in Artificial Intelligence** is provided at **FAU**, and the combination of theoretical knowledge and practice suits me. The program will let me explore further such intricacies as AI in-depth, sophisticated ML models, and data analysis – all of which I enjoy. This course will deepen my knowledge about the application of AI in different fields including health and robotics. Three major areas captured my attention in the curriculum and that's deep learning, neural networks, and computer vision. AI as a progressive field provides a clear chance as infinity to create more solutions to challenges experienced. There will be exponential growth in the need for AI experts in and across several industries and this course will equip me with the challenge to face that demand. Considering this degree, I am determined to be an output director of artificial intelligence, relevant to emergent trends in the field.

Why Germany?

Science and technology is the dominant culture in **Germany** and with its first-rate universities, it is an ideal place for me to pursue my higher studies. The country is well developed technologically with very close ties between research institutions and commercial organizations. Germany will offer me an opportunity to be associated with modern research equipment and work with students short-term internship. In this regard, **Germany** which boasts of practical and research-oriented education will enable me to afford the skills necessary for an AI professional. This commitment to innovation in artificial intelligence technologies is one of the qualities that drew my attention to the country. German degrees are prestigious and accepted by employers and businesses the world over therefore hold good jobs for graduates.

Why FAU Erlangen?

FAU Erlangen is also one of the most research-focused higher learning institutions in Germany, famous for a number of its advanced programs in technology and artificial intelligence. I believe that the specificity of the university to focus on research meets my interest in AI and its practical usage perfectly. The numerous partnerships that **FAU** has established with employers will grant me exposure together with an approach to ample hands-on setting. The elements of academic and professional focus together with highly developed curriculum depth and practical skills training are exactly the things that I need to build my technical experience. Being an open research university with a strong focus on innovations and interdisciplinary research FAU provides the best environment for AI lovers like me. Moreover, AI is also partially developed at FAU, which is renowned internationally, so it is the best university to build my future career.

Conclusion

Therefore, I believe that the **Master's in Artificial Intelligence** at **FAU Erlangen** will help me to fulfill my goals if offered a place to study at this University. This also makes me keen to join the academic fraternity of the university and to exploit all the opportunities that **FAU** and Germany will provide to create a prosperous career in **Artificial Intelligence**.

Thank you for considering my application. I look forward to your positive response.

Yours sincerely,

Swathi, Ramesh
