

Letter of Motivation

Introduction

My full name is **Swathi, Ramesh**, and I would like to share my views concerning my interest in applying for the **Master of Science in Big Data and Business Analytics** at **FOM University of Applied Sciences**. Due to my background in data analytics, machine learning and automation, I am well prepared to establish and enhance competencies that would bear me necessary for the profession of data science and business analytics.

Academic, Professional Experience, Technical Certifications, and Technical Skills

I hold a Bachelor of Engineering in **Computer Science and Engineering** from Visvesvaraya Technological University, India, with a **CGPA of 7.71 (German Grade: 2.3)**. I have a strong grounding in such courses as C Programming for Problem Solving, Data Structures and Applications, Computer Network and Security, Database Management System and Digital Electronics. Prior to this, I completed my Pre-University (12th Class) with a score of **78% (German Grade: 2.0)** and my 10th class exam mark sheet from the Indian Certificate of Secondary Education with **87.84 %** passing marks. I have gained practical experience through several internships. At **Varcons Technologies Pvt Ltd.**, I worked on **Twitter Sentiment Analysis** during the COVID-19 pandemic, where I applied **machine learning models** to analyze real-time data and presented a comprehensive report on the findings. Additionally, I interned at **Karnataka German Technical Training Institute**, where I completed a **Red Hat Certified Engineer (RHCE)** program, equipping me with valuable skills in Linux systems and network administration. My **Bachelor's project**, titled "**Design and Fabrication of Smart Nursing Robot**," aimed at addressing the growing demand for **smart healthcare systems** by leveraging **AI and machine learning** technologies to assist elderly and disabled individuals with personalized healthcare services. In terms of **certifications**, I have successfully completed the **Java Full Stack course** from **Pentagon Space**, a course on **IoT Edge Computing and IoT Analytics** from **Infosys**, and a training program in **Red Hat (RHCE)** from **Karnataka German Technical Training Institute Bengaluru**. These experiences, combined with my **technical skills** in **Network Analysis and Synthesis, Industrial Automation, Digital Electronics, Telecom**, and familiarity with **IoT and machine learning**, have significantly enhanced my competencies and deepened my motivation to pursue advanced studies in **Artificial Intelligence**. Also, I Completed **16 years** of Education in the **English Language**.

Why Master of Science in Big Data & Business Analytics?

The opportunity to study at **FOM University of Applied Sciences** and obtain the **M.Sc. in Big Data & Business Analytics** describes my aspirations and expectations as a learner and a professional to the fullest. This program includes focus areas including, Big Data Architecture for Analytics, Business Model for Big Data, and Analytics, which equip students with vital knowledge on how to analyze big data in businesses. Of course, I am most looking forward to such advanced techniques as machine learning and social media analysis as well as programming languages such as Python, SQL, and R. I have to obligate that these competencies will enable me to deal with and analyze large volumes of data for decision making. The real-world projects that are available, for example, the Big Data Consulting Project will ensure that theoretical knowledge obtained can be applied in solving real problems and as a result prepare one to take up tasks such as a Data Scientist or Business Analyst. Ethics, sustainability, and leadership are the other program areas where I shall acquire knowledge and skills to manage the constantly changing business environment properly. Hence, it would help me perform my goal of helping various businesses grow and change by using data-based strategies in different sectors.

Why Germany?

Germany stands as a preferred country for post-university education because of its focus on research. The country is likewise popular for providing education quality and facilities for technology beginning with data science. **Germany** offers opportunities to work with technological innovations and in an environment that stimulates creativity for students. Also, Germany is one of the strongest economies, which specializes not only in the IT sector, manufacturing, and Healthcare sectors provide relay opportunities for foreigners on the job market. This aspect is also useful in the multicultural environment of the country and when dealing with different students from different cultures. Finally, the tuition fees in most universities in **Germany** are low and scholarship opportunities abound making it easy for international students to pursue quality education without being held by the greatest impunity.

Why FOM University?

The practice-oriented curriculum of **FOM University's M.Sc. program in Big Data & Business Analytics** is another advantageous aspect that increases the program's appeal to students because it teaches the practical usage of the acquired theoretical knowledge for resolving actual business problems. The relations of the university with top organizations enable the students to get some practical experience, which is important in the pursuit of a career. FOM has highly flexible study programs that enable students to combine academic masters with professional practice and benefits best for someone like me. Furthermore, the FOM focuses on the aspects of digitalization, and management of large amounts of data, which is also my area of interest. He said that the program which consists of sets of courses has been developed with consideration of the current market needs and trends to produce competent professionals who are in a position to solve challenges that face firms in the market. Lastly, one of the most impressive rooms for students like me, who are practicing data professionals, is the presence of experienced specialists among the members of the faculty who meet academic requirements with professional experience in the field.

Conclusion

Therefore, I assure you that the **Master of Science in Big Data & Business Analytics** at **FOM University** will be the staple for me to attain my professional goals. This is the reason why I am willing to contribute to the academic life of the FOM and to be happy seeing the potential of being a member of this university.

Thank you for considering my application. I look forward to your positive response.

Yours sincerely,

Swathi, Ramesh
