

Letter of Motivation

Introduction

My name is **Swathi, Ramesh** and I am pleased to tell you that I have a profound interest in applying for the **Master of Science in Applied Data Science program** at **Georg-August University Göttingen**. Having acquired a sound academic background in **Computer Science and Engineering** coupled with appropriate experiences in the Computer Science field, I wish to increase my understanding and expand my knowledge of data sciences to be in a position to make a positive contribution.

Academic, Professional Experience, Technical Certifications, and Technical Skills

I hold a Bachelor of Engineering in **Computer Science and Engineering** from Visvesvaraya Technological University, India, with a **CGPA of 7.71 (German Grade: 2.3)**. I have a strong grounding in such courses as C Programming for Problem Solving, Data Structures and Applications, Computer Network and Security, Database Management System and Digital Electronics. Prior to this, I completed my Pre-University (12th Class) with a score of **78% (German Grade: 2.0)** and my 10th class exam mark sheet from the Indian Certificate of Secondary Education with **87.84 %** passing marks. I have gained practical experience through several internships. At **Varcons Technologies Pvt Ltd.**, I worked on **Twitter Sentiment Analysis** during the COVID-19 pandemic, where I applied **machine learning models** to analyze real-time data and presented a comprehensive report on the findings. Additionally, I interned at **Karnataka German Technical Training Institute**, where I completed a **Red Hat Certified Engineer (RHCE)** program, equipping me with valuable skills in Linux systems and network administration. My **Bachelor's project**, titled "**Design and Fabrication of Smart Nursing Robot**," aimed at addressing the growing demand for **smart healthcare systems** by leveraging **AI and machine learning** technologies to assist elderly and disabled individuals with personalized healthcare services. In terms of **certifications**, I have successfully completed the **Java Full Stack course** from **Pentagon Space**, a course on **IoT Edge Computing and IoT Analytics** from **Infosys**, and a training program in **Red Hat (RHCE)** from **Karnataka German Technical Training Institute Bengaluru**. These experiences, combined with my **technical skills** in **Network Analysis and Synthesis, Industrial Automation, Digital Electronics, Telecom**, and familiarity with **IoT and machine learning**, have significantly enhanced my competencies and deepened my motivation to pursue advanced studies in **Artificial Intelligence**. Also, I Completed **16 years** of Education in the **English Language**.

Why Master of Science in Applied Data Science?

This **M.Sc. in Applied Data Science** offered by the **Georg-August University Göttingen** fits me well in terms of prior knowledge and further career plans. This choice of course's subject matter: mathematics, computer science, and statistics will enable me to process and analyze large sets of complicated data from any realm. I have a special interest in fields of application like Bioinformatics and Medical Data Science where students can specialize in areas with very high demands in the market. The program focuses heavily on the scientific method, its inherent issues, and its application to real-life situations to ensure that I am ready to be a responsible data scientist, whenever the chance arises. Besides, the opportunity of internships and cooperation with business partners will contribute to the practical experience as well as skills that improve the qualifications. For this kind of work, I would like to apply a solid background in state-of-the-art data science methodologies in such areas as healthcare, finance, and digital business. For the graduates the prospects are very bright, one can get a job quickly with IT and research organizations and many of them can even choose to go for a PhD or become IT entrepreneurs.

Why Germany?

Germany receives a lot of attention for its high-standard education system and also hosts some of the best universities in the world. The emphasis placed on research and innovation is especially beneficial in a country when deciding to undertake a Master's degree in a specialized technical area such as data science. **Germany's** diversified and strong economy especially in the fields of technology and engineering presents far-reaching prospects for internship, research, and employment after completion of the university. Germany is a multicultural society and this observing an ability for students from different cultural backgrounds to learn in the society. Also, the cost of tuition and access to scholarships are low making **Germany** a preferred study destination for many an international student.

Why the Georg-August University Göttingen?

Out of all the universities listed, the **Georg-August University Göttingen** has been highlighted for its main focus on research-oriented teaching and the early establishment of academies. The curriculum of the university's **Master of Science in Applied Data Science** is vast and oriented according to the market requirements. This, together with the strong emphasis on machine learning, statistics, and big data is exactly what I was looking for, and I could not be happier about joining this school. Some features that impressed me are the research centers of the university and partnerships with key companies to guarantee practical experience in solving real-life data analysis problems. Sophisticated state laboratory data, covering analysis tools, data lab services, and large datasets, will further improve my hands-on data manipulation skills. The composition of students at Göttingen will also provide a wide range of academics, which will challenge me to interdisciplinary learning, springing the best ideas out of it.

Conclusion

Hence, I strongly desire the **Master of Science in Applied Data Science** program provided at the **Georg-August University Göttingen** which I believe will equip me with the required skills, and knowledge, and chance the realization of my career goals. I would be glad to contribute to the peculiar life of the university's academic space and will endeavour to apply my expertise in data science to aid the process.

Thank you for considering my application.

Swathi, Ramesh
