

## Letter of Motivation

### Introduction

My name is **Swathi Ramesh**, and I am writing to you to demonstrate my interest in pursuing a **Master of Science in Data Science** at the **University of Europe Applied Sciences**. With a firm foundation in Computer Science and Engineering theory and practical competence through various internships, I'm happy to begin my studies in this esteemed program. I want to optimize my knowledge and skills in data science to achieve my long-term career goals in the industry.

### Academic, Professional Experience, Technical Certifications, and Technical Skills

I hold a Bachelor of Engineering in **Computer Science and Engineering** from Visvesvaraya Technological University, India, with a **CGPA of 7.71 (German Grade: 2.3)**. I have a strong grounding in such courses as C Programming for Problem Solving, Data Structures and Applications, Computer Network and Security, Database Management System and Digital Electronics. Prior to this, I completed my Pre-University (12th Class) with a score of **78% (German Grade: 2.0)** and my 10th class exam mark sheet from the Indian Certificate of Secondary Education with **87.84 %** passing marks. I have gained practical experience through several internships. At **Varcons Technologies Pvt Ltd.**, I worked on **Twitter Sentiment Analysis** during the COVID-19 pandemic, where I applied **machine learning models** to analyze real-time data and presented a comprehensive report on the findings. Additionally, I interned at **Karnataka German Technical Training Institute**, where I completed a **Red Hat Certified Engineer (RHCE)** program, equipping me with valuable skills in Linux systems and network administration. My **Bachelor's project**, titled "**Design and Fabrication of Smart Nursing Robot**," aimed at addressing the growing demand for **smart healthcare systems** by leveraging **AI and machine learning** technologies to assist elderly and disabled individuals with personalized healthcare services. In terms of **certifications**, I have successfully completed the **Java Full Stack course** from **Pentagon Space**, a course on **IoT Edge Computing and IoT Analytics** from **Infosys**, and a training program in **Red Hat (RHCE)** from **Karnataka German Technical Training Institute Bengaluru**. These experiences, combined with my **technical skills** in **Network Analysis and Synthesis, Industrial Automation, Digital Electronics, Telecom**, and familiarity with **IoT and machine learning**, have significantly enhanced my competencies and deepened my motivation to pursue advanced studies in **Artificial Intelligence**. Also, I Completed 16 years of Education in the English Language.

### Why Master of Science in Data Science?

One of the reasons I am inclined toward the **M.Sc. in Data Science** offered at **UE** is that it provides a balanced curriculum made up of modules from different schools, elective courses from other faculties, and specialization in various advanced data science courses. Particularly the Capstone Project of the program for instance involves students from different study programs in actual, consulting-based projects. It should be noted that as part of practical training, they enhance their knowledge gained in the fields of big data, machine learning, and artificial intelligence, which fully corresponds to my professional objectives. The structure of the course contributes to the balanced academic workload and at the same time creates the conditions for the acquisition of practical skills within the chosen subject area. The addition of university-wide and faculty-wide modules also widens my coverage area because it is interdisciplinary. I am quite sure that by developing those skills I will be able to change the world through data-driven solutions in sectors such as healthcare, an area of interest demonstrated by my design of a smart nursing Robot during my bachelor's degree projects. This course will then prepare me technically and capacitate me practically toward realizing my dreams of being a data scientist.

### Why Germany?

**Germany** proves to be the most suitable to pursue my higher education because of the ISO and advanced technological systems of Germany. Such high standard infrastructure and strong economy make the country a suitable place for research and development in collaboration with industries. Further, many multinational technology companies are in **Germany** so there is high demand for data science skilled workers. I am also encouraged by the provision of interdisciplinary learning as well as the German education system, and the research and innovation that the country upholds. In addition, the large and hospitable population of international students and the very high standard of living make such countries worthwhile destinations for students such as me, who desire the best of both worlds-worry free education.

### Why the University of Europe for Applied Sciences?

The **University of Europe for Applied Sciences (UE)** is my first choice because of its strong emphasis on such sciences together with the practical approach. This mode of the theoretical and practical combination provides the best learning setup for me in the **M.Sc. Data Science** program. Concerning the member universities, I like that the university has cooperation agreements with top organizations, which will provide me with an opportunity to face real data processing tasks. Moreover, **UE** has a prominent focus on innovation and entrepreneurship at the same time it offers a perfect opportunity to contribute to the implementation of modern technological advancements. Also, the infrastructure of the university and an international focus of people make the university a perfect place for personal and study development.

### Conclusion

Therefore, I believe that effective preparation to achieve my career goal requires me to acquire skills and knowledge that comprise the **University of Europe for Applied Sciences M.Sc. in Data Science**. I am looking forward to plunging myself into the context of interdisciplinary learning within the program and becoming an active member of this growing academic community. I am eager to build up my professional experience in data science and I am glad to become a part of **UE** with my vision.

Thank you for considering my application.

Yours sincerely,

**Swathi, Ramesh**
