

STATEMENT OF PURPOSE

I am **Siddhi Nitin, Naik** from Maharashtra, India, and I am compiling this statement of purpose to express my desire, enthusiasm, and strong zeal to study the course of **Master of Data Science at FAU Erlangen in Germany**.

Academic and Professional Background: I finished my tenth grade in 2018 and my twelve grade in 2020 with **86.5% (German Grade: 1.60) and 83.85% (German Grade - 1.75) scores**. At Savitribai Phule Pune University, where I have completed my **Bachelor of Engineering**, I have a **CGPA of 8.88 (equal to a German mark of 1.56)**. During my academic path, I worked on **web development projects interning at CollegeRanker** in India. This encounter inspired me to study more about data science and technology since it piqued my curiosity in the fields. I have also finished other technical classes and seminars, including "**Business Intelligence Using BI**" from Skill Nation and "**Complete Python 2024 for Absolute Beginners**" from Udemy. Having completed the **IELTS with an overall band score of 7.0**, I can be sure I am ready for this academic path.

I have also taken other classes, including "**TCS iON Career Edge - Young Professional course**" from TCS and "**Master the Coding Interview: Data Structures + Algorithms**" from Udemy. These encounters have given me necessary practical knowledge and abilities for my subject of study. Developing a deep learning-based speech-to-text system for my bachelor project, "**Lip Reading using Machine Learning: Enhancing Speech Recognition and Accessibility**," sharpened my technical abilities and stoked my passion in computer science.

I want to complete this master's degree because of my significant interest in data science and its potential to solve real-world problems. My curiosity in data science was inspired during my bachelor project this project established a Speech-to-Text (STT) system targeted at translating speech from video data into written text. The impetus for this initiative was the increased need for accessible content and the possible applications in numerous sectors. This encounter let me appreciate the power of data science in producing meaningful solutions. I am particularly excited about topics like "Machine Learning," "Data Mining," and "Big Data Analytics" offered in the curriculum. These classes will give me with the technical knowledge and abilities needed to flourish in the profession of data science. I believe this course will benefit me professionally by arming me with the expertise to traverse complicated data-driven contexts and personally by increasing my problem-solving talents.

FAU Erlangen has a very lengthy history, dating back to 1743. It is well-known for its strong concentration on research and practical learning methods, which include case studies and projects. The university is regarded among the top institutions in Germany, with a student body of approximately 40,000 pupils. The school is equipped with state-of-the-art facilities and an experienced faculty that is dedicated to student achievement. Although I do not have any personal links at FAU Erlangen, I have been motivated by the university's reputation and its relationships with major companies. I am particularly drawn to the city of Erlangen, recognized for its rich culture and scientific developments. The city's proximity to large firms like Siemens and Adidas offers significant work prospects for graduates. Studying at FAU Erlangen will give me with academic benefits such as access to cutting-edge research and a diversified learning environment. Personally, it will allow me to explore a new culture and extend my horizons. Professionally, it will prepare me for a successful career in data science by providing me with the information and abilities needed to flourish in the industry.

I wish to apply to Germany because of its significant emphasis on quality education and research. I aim to stay in Germany because the field of education here is significantly superior compared to other places, offering good exposure and diversity. I am particularly attracted to the German culture, known for its rich history, creativity, and inclusivity. Studying in Germany will help me flourish professionally by offering access to world-class education and cutting-edge research facilities. Personally, it will allow me to explore a new culture and create a global network. Germany's devotion to research and innovative ideas, together with its strong economy, makes it a great destination for me to pursue my master's program.

After completing this course, I aim to have a job in data science roles such as **Data Analyst, Machine Learning Engineer, or Data Scientist** with huge international organizations or tech startups. This training will provide me the information and global viewpoints I need to succeed in these professions. I wish to as it is home to many prominent companies in technology and innovation. The study at FAU Erlangen will prepare me for these responsibilities by equipping me with the technical knowledge and abilities needed to flourish in the field of data science.

I am very determined and committed, combined with having good basics from my past education. I also have a global outlook and a drive to contribute successfully to this master's program. I truly look forward to starting my data science study adventure at your renowned university. After finishing this course, the topics I would acquire would help me start a rewarding job.

Thank you for considering my application.

Sincerely,
Siddhi Nitin, Naik
