

STATEMENT OF PURPOSE

My name is **Siddhi Nitin, Naik** and I am genuinely interested in pursuing and expanding my career in the field of Global Software Development. I have a tremendous love for the subject and solid academic credentials, hence my decision to take up a **M.Sc. in Global Software Development at Fulda University of Applied Sciences**.

Academically, I finished my tenth grade in 2018 and my twelve grade in 2020 with **86.5% (German Grade: 1.60) and 83.85% (German Grade - 1.75) scores**. At Savitribai Phule Pune University, where I have completed my **Bachelor of Engineering**, I have a **CGPA of 8.88 (equal to a German mark of 1.56)**. During my academic path, I worked on **web development projects interning at CollegeRanker** in India. This encounter inspired me to study more about data science and technology since it piqued my curiosity in the fields. I have also finished other technical classes and seminars, including "**Business Intelligence Using BI**" from Skill Nation and "**Complete Python 2024 for Absolute Beginners**" from Udemy. Having completed the **IELTS with an overall band score of 7.0**, I can be sure I am ready for this academic path.

I have also taken other classes, including "**TCS iON Career Edge - Young Professional course**" from TCS and "**Master the Coding Interview: Data Structures + Algorithms**" from Udemy. These encounters have given me necessary practical knowledge and abilities for my subject of study. Additionally, I participated in the "Maths Marathon 2021" offered by the Department of Applied Sciences & Humanities, MIT School of Engineering, which helped me develop my knowledge and skills in this area. Developing a deep learning-based speech-to-text system for my bachelor project, "**Lip Reading using Machine Learning: Enhancing Speech Recognition and Accessibility**," sharpened my technical abilities and stoked my passion in computer science.

I want to study Global Software Development because of a personal event that ignited my interest in the industry. During my internship, I worked on a project that aimed to provide accessible content for persons with disabilities. This event let me appreciate the power of software development in solving real-world problems and improving people's lives. I am particularly interested in the modules on Software Engineering, Data Management, and Cloud Computing provided by the curriculum at Fulda University of Applied Sciences. These programs will give me with the technical knowledge and abilities required to design software solutions that can make a difference.

I wish to apply to Fulda University of Applied Sciences because of its high reputation and outstanding facilities. The university is known for its concentration on practical education and research, which coincides with my professional ambitions. The college is located in a lovely city with a rich cultural background, which will give me with a unique learning experience. Additionally, the university offers a thriving student population, which will help me to meet with like-minded individuals and create a solid professional network. I am particularly attracted to the institution because of its renowned academics and research facilities, which will offer me with the opportunity to study from the finest in the field.

I wish to study in Germany because of its superb education system and the opportunity it gives for professional and personal growth. I intend to stay in Germany because the field of education here is significantly better compared to other destinations. The country offers good exposure, diversity, and a rich culture that will help me improve both professionally and personally. Studying in Germany will offer me with the opportunity to learn from the finest in the area and obtain significant international experience. The country's emphasis on innovation and technical growth will provide a strong context for additional studies and research.

My future career view is to work in the field of software development, specifically in professions such as **Software Developer, Data Analyst, or Cloud Engineer**. The Global Software Development program at Fulda University of Applied Sciences will give me with the knowledge and abilities required to flourish in these professions. I aspire to work where there are several prospects for specialists in this industry. The curriculum will prepare me for a successful career by providing me with a strong foundation in software development and the ability to obtain practical experience through internships and projects.

Lastly, I would want to thank you for considering my application. I expect to hear a nice reaction from your end.

Regards,
Siddhi Nitin, Naik
