

Letter of Motivation

Introduction - My name is **Siddhi Nitin, Naik** and I am writing to offer my candidature for the **Master of Science program in Computer Science at TU Kaiserslautern**. I have a clear idea of how I intend to enhance my studies and career in the field of technology and engineering. Growing up in Satara, Maharashtra, I have always been captivated by the unlimited possibilities that technology offers to solve real-world problems. This enthusiasm has propelled my academic and professional aspirations, and I believe that TU Kaiserslautern is the best venue for me to continue this journey.

Academic, Professional Experience, Training, Technical Certification, & Extra Curriculum Activities - **Academically**, I finished my tenth grade in 2018 and my twelve grade in 2020 with **86.5% (German Grade: 1.60) and 83.85% (German Grade - 1.75) scores**. At Savitribai Phule Pune University, where I have completed my **Bachelor of Engineering**, I have a **CGPA of 8.88 (equal to a German mark of 1.56)**. During my academic path, I worked on **web development projects interning at CollegeRanker** in India. This encounter inspired me to study more about data science and technology since it piqued my curiosity in the fields. I have also finished other technical classes and seminars, including "**Business Intelligence Using BI**" from Skill Nation and "**Complete Python 2024 for Absolute Beginners**" from Udemy. Having completed the **IELTS with an overall band score of 7.0**, I can be sure I am ready for this academic path.

I have also taken other classes, including "**TCS iON Career Edge - Young Professional course**" from TCS and "**Master the Coding Interview: Data Structures + Algorithms**" from Udemy. These encounters have given me necessary practical knowledge and abilities for my subject of study. Additionally, I participated in the "Maths Marathon 2021" offered by the Department of Applied Sciences & Humanities, MIT School of Engineering, which helped me develop my knowledge and skills in this area. Developing a deep learning-based speech-to-text system for my bachelor project, "**Lip Reading using Machine Learning: Enhancing Speech Recognition and Accessibility**," sharpened my technical abilities and stoked my passion in computer science.

Why Master of Science in Computer Science Program? I have always been captivated by the field of computer science, and my scholastic path has further enhanced this fascination. One of the important moments that reinforced my desire to pursue a Master of Science in Computer Science was my bachelor project on "Lip Reading using Machine Learning: Enhancing Speech Recognition and Accessibility." This research aims to transcribe voice from video footage into written text, answering the increased need for accessible content and the possible uses in numerous sectors. The success of this research prompted me to pursue more challenging areas in computer science, such as embedded systems, data signal processing, and control engineering.

Why Germany? I wish to study in Germany since it is a country with a strong background in technology and engineering. I wish to benefit from the high-quality education and established learning infrastructure that German universities offer. I wish to experience the multicultural society in Germany, which promotes an exchange of ideas that is crucial for personal and professional progress. I wish to take advantage of the well-established industrial industry in Germany, which offers exposure and opportunity to partner with major organizations. I want to immerse myself in German culture, which is known for its rich history, inventiveness, and emphasis on precision and quality. I wish to stay in Germany because the field education is considerably better compared to other places, and it will help me improve both professionally and emotionally.

Why TU Kaiserslautern? I am particularly drawn to TU Kaiserslautern because of its outstanding reputation in the field of computer science. The university is regarded among the top institutions globally, and the quality of its faculty and research facilities is well-known. TU Kaiserslautern has state-of-the-art laboratories and research institutes that will provide me with the finest opportunity to apply what I study and solve problems as they emerge. The university's relationships with employers will greatly aid me in my future profession. Additionally, the school location in Kaiserslautern, a city noted for its dynamic culture and innovation, makes it a great setting for my studies. I have also gotten great comments from colleagues and acquaintances who have studied at TU Kaiserslautern, which further strengthens my decision.

Future Career Perspectives and Aspirations - Upon completing my Master of Science in Computer Science from TU Kaiserslautern, I hope to work in professions such as **Software Developer, Data Scientist, or Systems Analyst**. I feel that the information and skills I will obtain from this program will prepare me for these professions and enable me to contribute effectively to the technology industry. I am particularly interested in working, as the country offers several prospects for growth and innovation in the field of computer science. I hope to be part of a team that produces cutting-edge solutions that solve real-world problems and enhance people's lives.

Conclusion - I am convinced that the Master of Science in Computer Science program at TU Kaiserslautern will give me with the information and abilities I need to flourish in my career. The university's well-coordinated curriculum, state-of-the-art facilities, and strong industry contacts make it the ideal venue for me to achieve my academic and professional ambitions. I am delighted about the thought of studying at TU Kaiserslautern and contributing to the field of computer science.

Thank you for considering my application.

Regards,
Siddhi Nitin, Naik
