

Statement of Goals

I live at Satara, Maharashtra, India and am **Siddhi Nitin, Naik**. I would like to apply to the **Technische Hochschule Deggendorf** for **Master of Science program in Artificial Intelligence and Data Science**. Technology and its possibilities to address practical issues have always excited me. This love has motivated me to work on a Bachelor of Engineering degree from Savitribai Phule Pune University, which I will finish in June 2024.

Academically, I finished my tenth grade in 2018 and my twelve grade in 2020 with **86.5% (German Grade: 1.60) and 83.85% (German Grade - 1.75) scores**. At Savitribai Phule Pune University, where I have completed my **Bachelor of Engineering**, I have a **CGPA of 8.88 (equal to a German mark of 1.56)**. During my academic path, I worked on **web development projects interning at CollegeRanker** in India. This encounter inspired me to study more about data science and technology since it piqued my curiosity in the fields. I have also finished other technical classes and seminars, including **"Business Intelligence Using BI"** from Skill Nation and **"Complete Python 2024 for Absolute Beginners"** from Udemy. Having completed the **IELTS with an overall band score of 7.0**, I can be sure I am ready for this academic path.

I have also taken other classes, including **"TCS iON Career Edge - Young Professional course"** from TCS and **"Master the Coding Interview: Data Structures + Algorithms"** from Udemy. These encounters have given me necessary practical knowledge and abilities for my subject of study. Developing a deep learning-based speech-to-text system for my bachelor project, **"Lip Reading using Machine Learning: Enhancing Speech Recognition and Accessibility,"** sharpened my technical abilities and stoked my passion in computer science.

Programmatic Motivation: The **M. Sc. program in Artificial Intelligence and Data Science** offered by **Technische Hochschule Deggendorf** brings the perfect combination of a strong theoretical background and demandable skills. I find that the approach to learning and coursework in the curriculum, with emphasis on machine learning and deep learning, as well as data as an instrument of decision-making is ideal for me. The program's flexibility is diverse and I will get to explore a broad spectrum of topics revolving around AI and data Science hence preparing me for many positions in the technological sector. The practical assignments and business relationships that are ALL parts of the course would grant me practical experience for practical problems. Moreover, the learning outcomes from this program will enable me to come up with creativity in solving problems using AI, this is an emerging field with wide career opportunities. Through this course, my goal is to further assist active research and development of AI as well as supporting industries in a broad array of fields and thereby make a difference in society.

Attractiveness to Germany: I wish to apply to Germany since it presents an affordable, top-notch world-class educational system. The field of education in Germany is significantly better than in other countries, hence I wish to remain here. I wish to be among the rich German culture, diversity, and good exposure. Germany's great focus on research and innovation makes it the country I wish to study master's degree from. Studying in Germany will help me to advance both personally and professionally since it will give me a worldwide viewpoint and improve my abilities. My decision to study in Germany has been much affected by the facts about Germany's history, technological developments, and sustainability commitment; hence, I wish to fully absorb these elements.

Fit with the Institution: **Technische Hochschule Deggendorf** can rightly be regarded as one of the finalists in my list of graduate schools because of its high academic reputation of offering applied sciences and technology. The university infrastructure includes several technologically advanced campuses including the Technology Campus will facilitate research in AI and data science. This makes the university strategic working partners with industry players so that the curriculum meets the trends in the job market as well as the emerging trends in particular within the technological industry. The major selling point of a pragmatic curriculum through internships and projects will enable me to be ready to face job markets with ease and success. Also, the commitment of the Deggendorf academic community towards the success of students and new ideas will be beneficial for my personality and career building. In particular, I was glad to see that the University is focused on sustainability and ethical AI which is also a priority for me when developing AI solutions.

Desired Future Objectives, my dream is to be a Data Scientist employed in a reputable organization. Using the knowledge and abilities acquired from this degree, I hope to create creative ideas addressing current problems. Working on initiatives connected to artificial intelligence and machine learning particularly interests me since I think these technologies could transform several sectors. Through this program, I wish to provide a strong basis for a successful career in Artificial Intelligence and Data Science and help to progress technology.

Ultimately, I am sure that the Technische Hochschule Deggendorf for Artificial Intelligence and Data Science is the best fit for my academic and career path. I am totally ready to seize the possibilities and difficulties this program and studying in Germany would present. I value your giving my application some thought.

Sincerely,
Siddhi Nitin, Naik
