

Statement of Goals

I live at Satara, Maharashtra, India and am **Siddhi Nitin, Naik**. I would like to apply to the **University of Bonn, Germany's Computer Science programme**. Technology and its possibilities to address practical issues have always excited me. This love has motivated me to work on a Bachelor of Engineering degree from Savitribai Phule Pune University, which I will finish in June 2024.

Academically, I finished my tenth grade in 2018 and my twelve grade in 2020 with **86.5% (German Grade: 1.60) and 83.85% (German Grade - 1.75) scores**. At Savitribai Phule Pune University, where I have completed my **Bachelor of Engineering**, I have a **CGPA of 8.88 (equal to a German mark of 1.56)**. During my academic path, I worked on **web development projects interning at CollegeRanker** in India. This encounter inspired me to study more about data science and technology since it piqued my curiosity in the fields. I have also finished other technical classes and seminars, including **"Business Intelligence Using BI"** from Skill Nation and **"Complete Python 2024 for Absolute Beginners"** from Udemy. Having completed the **IELTS with an overall band score of 7.0**, I can be sure I am ready for this academic path.

I have also taken other classes, including **"TCS iON Career Edge - Young Professional course"** from TCS and **"Master the Coding Interview: Data Structures + Algorithms"** from Udemy. These encounters have given me necessary practical knowledge and abilities for my subject of study. Developing a deep learning-based speech-to-text system for my bachelor project, **"Lip Reading using Machine Learning: Enhancing Speech Recognition and Accessibility,"** sharpened my technical abilities and stoked my passion in computer science.

Programmatic Motivation: Different events and goals drive me to seek a Master's in Computer Science. Growing up, I saw how creatively technology could solve daily challenges. For example, I created a web application for CollegeRanker that streamlined the college choosing process for students while my intern there. This encounter strengthened my conviction on the possibilities of technology to influence favorably. Furthermore, my studies in deep learning at Savitribai Phule Pune University and blockchain technologies piqued my interest in more sophisticated computer science subjects. Classes like "Software Engineering" and "Machine Learning" presented at the University of Bonn especially thrill me. These courses will provide me with the technical knowledge and interpersonal skills required to succeed in my work. Through exposing me to many points of view and creative ideas, I hope this program will not only help me develop professionally but also personally.

Attractiveness to Germany: I wish to apply to Germany since it presents an affordable, top-notch world-class educational system. The field of education in Germany is significantly better than in other countries, hence I wish to remain here. I wish to be among the rich German culture, diversity, and good exposure. Germany's great focus on research and innovation makes it the country I wish to study master's degree from. Studying in Germany will help me to advance both personally and professionally since it will give me a worldwide viewpoint and improve my abilities. My decision to study in Germany has been much affected by the facts about Germany's history, technological developments, and sustainability commitment; hence, I wish to fully absorb these elements.

Fit with the Institution: The University of Bonn has great reputation and strong concentration on computer science; hence it is the perfect fit for me. With the Times Higher Education World University Rankings of 2023 ranking the university 105th globally, it is rather well-ranked. Comprising about 38,000 students, the University of Bonn boasts modern facilities, seasoned teachers, and a dynamic campus situated in the ancient city of Bonn. Although I do not know anyone personally at the university, alumni and present students have given me great comments. Notable computer science research facilities and eminent instructors at the institution fit very nicely with my academic and career aspirations. The city of Bonn, with its many attractions and rich cultural legacy, fuels even more my desire to study there. Furthermore, the local employment scene is encouraging since corporations like Deutsche Telekom and DHL recruit Computer Science graduates. Studying at the University of Bonn offers intellectual, personal, and professional advantages that make it the ideal option for my further studies.

Desired Future Objectives, my dream is to be a **Software Developer or Data Scientist** employed in a reputable organization. Using the knowledge and abilities acquired from this degree, I hope to create creative ideas addressing current problems. Working on initiatives connected to artificial intelligence and machine learning particularly interests me since I think these technologies could transform several sectors. Through this program, I wish to provide a strong basis for a successful career in computer science and help to progress technology.

Ultimately, I am sure that the University of Bonn's Computer Science department is the best fit for my academic and career path. I am totally ready to seize the possibilities and difficulties this program and studying in Germany would present. I value your giving my application some thought.

Siddhi Nitin, Naik
