

Letter of Motivation

Born on November 24, 2001, I am an Indian citizen and go by **Siddhi Nitin, Naik**. I am writing to say how really interested I am in the **University of Göttingen's M.Sc. Applied Data Science programme**. Having completed the **IELTS with an overall band score of 7.0**, I can be sure I am ready for this academic path.

Academically, I finished my tenth grade in 2018 and my twelve grade in 2020 with **86.5% (German Grade: 1.60) and 83.85% (German Grade - 1.75) scores**. At Savitribai Phule Pune University, where I have completed my **Bachelor of Engineering**, I have a **CGPA of 8.88 (equal to a German mark of 1.56)**. During my academic path, I worked on **web development projects interning at CollegeRanker** in India. This encounter inspired me to study more about data science and technology since it piqued my curiosity in the fields. I have also finished other technical classes and seminars, including **"Business Intelligence Using BI"** from Skill Nation and **"Complete Python 2024 for Absolute Beginners"** from Udemy.

I have also taken other classes, including **"TCS iON Career Edge - Young Professional course"** from TCS and **"Master the Coding Interview: Data Structures + Algorithms"** from Udemy. These encounters have given me necessary practical knowledge and abilities for my subject of study. Developing a deep learning-based speech-to-text system for my bachelor project, **"Lip Reading using Machine Learning: Enhancing Speech Recognition and Accessibility,"** sharpened my technical abilities and stoked my passion in computer science.

My academic interests and career goals are exactly matched by the M.Sc. Applied Data Science programme at the University of Göttingen. During my undergraduate studies, my fascination in data science developed particularly in view of the impact of data-driven decision-making in many spheres. Classes in the Applied Data Science program—machine learning, data mining, and big data analytics—will equip me with the tools I need to meet challenging data problems. From the M.Sc. Applied Data Science program, I will be able to examine difficult data and apply quantitative techniques to solve practical problems. Data science theories will become quite familiar to me, with their useful applications in business, policy-making, and finance as well as other fields. Developing advanced abilities in statistical tools, programming languages like Python, and data interpretation would also help me to enable me to offer informed ideas and recommendations.

After finishing this degree, I want to be working as a **data scientist for a big IT business**. In my line of work, I want to help create solid data-driven plans meant to propel long-term success. The knowledge and skills of this program will enable me to fulfill my goal and provide a strong basis for my professional life.

For numerous reasons, I have decided on the University of Göttingen. The institution is first well-known for its mastery of data science research and instruction. The wide and multinational student population of the University of Göttingen offers priceless cultural encounters and a worldwide view on data concerns. The tools and facilities provided to students will greatly enhance my educational path. At last, a key element of this curriculum is the opportunity to interact with professors who are authorities in their domains.

Germany is well-known for its excellent educational system and emphasis on research and invention; hence I wish to study there. I wish to remain in Germany since the quality of education here is really good compared to other countries. I wish to be among the rich German culture, diversity, and good exposure. Germany drew me in for my master's degree because of its first-rate infrastructure and chances for professional development and practical experience. Studying in Germany helps me to develop personally as well as professionally. I choose to study in Germany since I want to fully experience its culture, which is renowned for its efficiency, accuracy, and rich legacy.

This curriculum at your university will definitely provide me the tools I need to flourish both personally and academically. The opportunity to add to and gain from the vibrant academic community at your esteemed university excites me.

I value your giving my application some thought. I'm looking forward your acceptance.

Sincerely,
Siddhi Nitin, Naik
