

## Motivational Letter

Indian national **Varsha, Natashekara** is writing to the **University of Bremen** to show interest in the **Master of Science in Control, Microsystems, Microelectronics (CMM)** program. The university's vibrant international community, first-rate faculty, and thorough program thrill me.

Currently completed my **Bachelor of Engineering in Electronics and Communication Engineering**, I started my academic path at Visvesvaraya Technological University (VTU), Belagavi, India. I have developed a strong basis in disciplines including Engineering Chemistry, Engineering Physics, Digital System Design, Control System, Information Theory and Coding, Embedded System, Satellite Communication, and Cryptography over my undergraduate studies. Right now, my **CGPA is 8.06—that is, German Grade 1.97**. Additionally finished my S.S.L.C. Exam with a score of **90.56% (German Grade: 1.44)** as well as completed my Pre-University Exam.

My academic and professional background has been much shaped by my practical experiences. Working at the **National Aerospace Laboratories in Bangalore**, I interned in structural health monitoring systems knowledge, implementation, and defect detection. This encounter gave me insightful knowledge of practical uses for my academics. Besides, I finished a **robotics course with Teachnook (Wissenaire IIT Bhubaneswar)** and a **web development course with Adverk**. Along with the **Mini-Project Exhibition-23 at K.S. Institute of Technology, Bengaluru**, where I presented a voice-activated elevator project My **IELTS score of 6.5 (CEFR Level: B2)** attests even more to my fluency in English, so enabling me to fully participate in the course content and contribute successfully to discussions and projects.

I participated actively in many extracurricular activities during my academic path, most notably winning the **Wonders of Wildlife** award in 2020 under the Harish R. Bhat Science Foundation **and shining in Bharatanatyam dance**, where I obtained several certificates, including **Madhyama Pratham and Junior Grade Examination** by Akhil Bhartiya Gandharava Mahavidyalaya Mandal, Mumbai.

**My choice to participate in the CMM program at the University of Bremen stems mostly from its fit with my career objectives and educational background.** My background in the pertinent disciplines from my undergraduate studies in Electronics & Communication Engineering is really solid. The emphasis on Control, Microsystems, and Microelectronics of the CMM program exactly matches my interests and past background. Modules like Advanced Control Systems, Microsystems Technology, and VLSI Design fascinate me especially since they will offer both theoretical knowledge and useful skills needed for my career development. The program's multidisciplinary approach—which involves participation from several research centers—generates a special learning environment.

**Germany's outstanding standards in education, particularly in technology and engineering, appeal to me as a place for study.** Since field education in Germany is significantly better than in other countries, I wish to remain here. I wish to be among the rich German culture, diversity, and good exposure. Germany was my choice for a master's program since it provides several scholarships, thereby making it financially possible. Studying in Germany will enable me to develop personally as much as professionally. I wish to fully appreciate the nation's commitment to creativity and support of overseas students. Germany boasts stunning scenery, energetic cities, and historical sites that I wish to see.

**Strong rating and great reputation of the University of Bremen appeal to me as a study partner.** The university provides modern facilities, seasoned professors, and a lovely campus together with a lot of students. The university's commitment to diversity and inclusiveness as well as its chances for multidisciplinary research appeal to me. I wish to engage in events like Diversity Weeks and learn from eminent experts. Applying has been reinforced by the great experiences of friends I have at the University of Bremen. With its rich history, cultural attractions, and active employment market, Bremen is a city I want to visit. Businesses in the city include Airbus, OHB System AG, and Fraunhofer Institute employs graduates of the CMM program.

Using my experience in Control, Microsystems, and Microelectronics will help me to land a **senior position supervising initiatives promoting creativity and streamlining of company operations**. My ultimate aim is to establish myself as a top authority in these domains, therefore supporting projects for research and development aiming at technological limits. I wish to assume a major role in academia or at a worldwide technological corporation and greatly affect the course of technology. The University of Bremen's CMM program offers to provide me with the knowledge and abilities I need to excel in these fast growing domains.

Combining the active academic community of the University of Bremen with using its resources excites me. This curriculum will definitely give me the tools and basis I need to reach my professional objectives in Control, Microsystems, and Microelectronics. I value your giving my application some thought. Growing and serving the University of Bremen community excites me.

**Really,  
Varsha, Natashekara**
