

Motivation Letter

Writing under my full name, **Ajay Singh, Dhillon** I am formally expressing my wish for the **Master of Science in Software Engineering at LMU - Ludwig-Maximilians-Universität München**. Academically, I have a degree in information technology and am quite fascinated with technology. Advancing my education to the next level at your prestigious university will help me to reach better academic credentials and strengthen my profession.

Starting with a good basis in secondary education, where I obtained a noteworthy **9.0 CGPA (German equivalent: 1.5)** on the Secondary School Examination (10th Class) run by the Central Board of Secondary Education (CBSE), Delhi, India. Maintaining this trend in my Senior Secondary education (CBSE 12th Class), I **scored 88.4% (German equivalent: 1.5)** in May 2019. After completing my secondary education, I worked on a **Bachelor of Technology in Information Technology** at Guru Gobind Singh Indraprastha University, Delhi, India, graduating in March 2024 with a very outstanding **CGPA of 9.43 (German equivalent: 1.2.)**. This curriculum taught me about many programming languages, algorithms, and the foundations of artificial intelligence.

Through internships, I intentionally sought out real-world experience to balance my academic background. Through a **one-month front-end development internship** at **Technoboot Pvt. LTD.**, I gained insightful knowledge of practical uses for my technical abilities. Further extending my knowledge of artificial intelligence and project management is my completion of various technical courses including **"Introduction to Artificial Intelligence"** and **"Agile Project Management"** from Coursera. To improve my programming, I also finished courses on **Data Structures and Introduction to C++ from Coding Ninjas**. Understanding the value of user interfaces in software development came from my six-week online React by Internshala Trainings participation.

The Master of Science in Software Engineering at LMU - Ludwig-Maximilians-Universität München exactly fits my academic path. This curriculum provides a thorough course guaranteeing current knowledge on software engineering, so helping me to solve challenging technical problems. Because they are so important for future developments, subjects like Advanced Software Engineering, Machine Learning, and Data Science especially pique my attention. Working on a project needing the integration of several software components during my internship at Technoboot Pvt. Ltd., inspired my enthusiasm for software engineering. This encounter helped me to see how valuable sophisticated knowledge in software engineering is. The course's multidisciplinary structure will let me collaborate with professionals from several backgrounds, therefore generating a rich learning environment. Learning something that will enable me to flourish in the current, cutthroat IT market excites me.

Germany's outstanding educational system, which is well-known for quality and innovation, is why I wish to apply there. Germany is where I wish to stay since the field of education here is significantly better. I wish to be among the rich German culture, diversity, and good exposure. Germany was the country I chose for my master's degree since it presents lots of internships and joint projects with prestigious businesses, hence offering chances for practical education. Studying in Germany helps me to develop both personally and professionally. The cultural and historical aspects of Germany captivate me since they make living there varied and enriching.

LMU - Ludwig-Maximilians-Universität München appeals especially to me since it ranks among the best universities in the world. With about 50,000 students and modern facilities, the university presents a lively student body. The campus is in the lovely city of Munich, which accentuates its appeal; the faculty is quite experienced. One acquaintance of mine who attended LMU raved about the academic climate and support services of the institution. Several eminent research facilities and software engineering pioneers among professors call the institution home. Munich is a vibrant city full with cultural attractions including the English Garden and the Marienplatz, which makes living and learning here fascinating. Furthermore, some Munich's top IT companies—including Siemens and BMW—hire LMU graduates, offering great employment prospects. Attaching LMU will provide me many intellectual, personal, and professional advantages as well as a solid basis for my future vocation.

After earning my Master's in Software Engineering, I hope to work as a **data scientist or software developer**. This program will provide me the technical knowledge and people skills needed for these positions. Want to work, where the tech sector is booming, piques especially my interest. The program's emphasis on both academic and practical elements will equip me for the demands of the real world and thereby make me a great benefit to every company. Studying at LMU will, in my opinion, provide me lots of chances and enable me to reach my professional objectives.

Indeed, I think that the Master of Science in Software Engineering program at LMU - Ludwig-Maximilians-Universität München will provide me the skills to meet my professional goals. As such, I am excited to flourish in such a learning environment and help to add to the lively intellectual scene of your esteemed university. I value your giving my application some thought. The chance to be involved at LMU - Ludwig-Maximilians-Universität München excites me.

Sincerely,
Ajay Singh, Dhillon
