

Statement of Purpose

From Delhi, India, I go by **Ajay Singh, Dhillon**. The chance to apply for the **Master of Science degree in Applied Computer Science at the University of Göttingen** makes me quite happy. My main driving force for enrolling in this degree in computer science, which forms the foundation of my intellectual pursuits.

Starting with a good basis in secondary education, where I obtained a noteworthy **9.0 CGPA (German equivalent: 1.5)** on the Secondary School Examination (10th Class) run by the Central Board of Secondary Education (CBSE), Delhi, India. Maintaining this trend in my Senior Secondary education (CBSE 12th Class), I **scored 88.4% (German equivalent: 1.5)** in May 2019. After completing my secondary education, I worked on a **Bachelor of Technology in Information Technology** at Guru Gobind Singh Indraprastha University, Delhi, India, graduating in March 2024 with a very outstanding **CGPA of 9.43 (German equivalent: 1.2.)**. This curriculum taught me about many programming languages, algorithms, and the foundations of artificial intelligence.

Through internships, I intentionally sought out real-world experience to balance my academic background. Through a **one-month front-end development internship** at **Technoboot Pvt. LTD.**, I gained insightful knowledge of practical uses for my technical abilities. Further extending my knowledge of artificial intelligence and project management is my completion of various technical courses including **"Introduction to Artificial Intelligence"** and **"Agile Project Management"** from Coursera. To improve my programming, I also finished courses on **Data Structures and Introduction to C++ from Coding Ninjas**. Understanding the value of user interfaces in software development came from my six-week online React by Internshala Trainings participation.

Applying for a Master's abroad will help me to forward my academic path, and Germany was selected for its outstanding world educational reputation. Germany's excellent teaching—especially in the sciences—allows me to wish to study there. I wish to go through the always changing courses that satisfy the worldwide requirements. I wish to live somewhere that welcomes cultural differences and offers a safe haven for overseas students. Immersion in German culture will help me to deepen my education process. Using Germany's educational system, I wish to develop both personally and professionally. Being in a nation with a rich cultural and historical heritage will help me to succeed in both academics and personal growth in line with its kind attitude.

The University of Göttingen is a very reputable university with a strong concentration on research and quality education, hence I wish to study there. The university's top 1001–1200 position in the QS rankings 2025 says volumes about its quality. The current technology tools and qualified professors the university offers thrill me. Academic and personal development would be perfect here thanks to the active student body with a varied variety of interests and the well-equipped university buildings. The university's research facilities and chance to learn from eminent experts in the field also appeal to me. Studying at Göttingen appeals even more with its strong cultural scene and historical importance. I also know about the local employment scene and the existence of businesses who employ Applied Computer Science program graduates, so advancing my career.

Starting the Master of Science program in Applied Computer Science at the University of Göttingen excites me. My interest in this multidisciplinary program derives from my need to create creative answers for practical situations. The strong basis in computing, programming, and artificial intelligence I developed throughout my undergraduate studies fits exactly the goals of this curriculum. The courses on advanced algorithms, machine learning, and data analysis—which will equip me with both academic knowledge and practical skills—excite me especially because they will enable me. The knowledge and abilities I will acquire from this program will be priceless for my career and will enable me to significantly support the tech sector.

After finishing this degree, I intend to work in roles including **data scientist, machine learning engineer, or software developer**. Developing solutions that solve practical issues in the tech sector especially interests me as a means of helping the sector. I want to work since the employment market there is strong and presents lots of chances for computer science development. The Master of Science in Applied Computer Science from the University of Göttingen will provide me the technical knowledge and interpersonal skills required to succeed in these professions and start a great career.

My academic performance, professional experience, and sincere passion for computer science thus help me to determine that the Master of Science in Applied Computer Science at the University of Göttingen is the ideal choice for me. The program will equip me with the tools and knowledge required to reach my professional objectives and significantly benefit the tech sector, so I am sure. I appreciate your giving my application some thought.

Sincerely,
Ajay Singh, Dhillon
