

Motivation Letter

Anitta, Thomas here is writing to say how really interested I am in **Master of Data Science at FAU Erlangen**. I think that my professional skills and academic background have adequately equipped me for this next turn in my educational path.

Currently finishing my **Bachelor of Technology in Computer Science and Engineering** from APJ Abdul Kalam Technological University, Kerala, India, I have a commendable **CGPA of 7.87 (German Grade: 2.4.)**. Subjects such Engineering Physics, Basics of Civil and Mechanical Engineering, Object-Oriented Programming Using JAVA, Graph Theory, Computer Networks, Computer Graphics and Image Processing, and Distributed Computing have added richness to my academic path. Also I finished a project called "**Mobile Application and Algorithm Development for Expense Splitting**". In my academics, I have always done rather well; my 10th-grade tests came out at **89.4%** and my 12th-grade tests at **88.6%**.

Having followed my academic path, internships have given me real-world experience. Whereas my previous **internship at BDS Technology Pvt. LTD** involved marketing a Holiday Automation Booking system, my newest **internship at Tata Elxsi Limited** concentrated on Android OTT app development. These internships have given me in-field technological practical experience and insightful analysis. I have also shown my language ability by completing the **IELTS test with a 7.5 CEFR level—C1 overall score**.

Selecting FAU Erlangen was a deliberate choice grounded in various convincing elements. Particularly in the discipline of Data Science, the university is well-known for its great emphasis on research and pragmatic application. FAU Erlangen presents a perfect setting for creative study and research with its first-rate resources and facilities. Strong links to business leaders of the institution offer priceless chances for internships, networking, and practical project experience. FAU Erlangen also boasts a rich legacy and a varied student body, which I think will enhance my academic path.

Germany presents one of the top higher education systems worldwide, especially in the discipline of Data Science, hence I wish to study there. Germany is where I wish to remain as the quality of the education there is much better. I wish to be among the rich German culture, diversity, and good exposure. Germany is home to some of the best universities worldwide known for their strict academic standards and creative research, hence I wish to pick it for my master's degree. Studying in Germany helps me to develop personally as well as professionally. Since my subject of study depends on technological developments and education, which are vital values of a nation I wish to live in.

My school work and internships started me to get interested in data science. Seeking a curriculum combining research and practical applications, I wanted to apply analytical methods to solve real-world challenges. Advanced Analytical Techniques and Data-Driven Decision Making are two courses I wish to pursue since they will equip me to make strategic and informed corporate decisions. Learning about research skills and using academic knowledge to address practical corporate problems greatly excites me. This program's learning results—technical knowledge and interpersonal skills among other things—will help me personally and professionally.

Being a top specialist in Data Science would assist me to maximize corporate processes and guide strategic decisions, so fulfilling my ultimate career aim. Working as a data scientist or consultant will allow me to assist companies in leveraging data to propel creativity and efficiency. The Master's program at FAU Erlangen will, in my opinion, equip me with the required knowledge and abilities to reach these goals. I want to work, where Data Science grads find lots of chances.

I value your giving my application some thought. Contributing to and learning from the great teachers and varied student body at FAU Erlangen excites me. I think my academic background, work experience, and great drive qualify me for this program. The chance to develop personally and professionally by means of this Master's degree excites me.

Sincerely,
Anitta, Thomas
