

## Letter of inspiration

Applying for **SRH University Heidelberg's Master's in Applied Data Science and Analytics program**, I go by **Anitta, Thomas**. My passion in this discipline has only grown as I have traveled through Engineering Physics, Basics of Civil and Mechanical Engineering, Object-Oriented Programming Using JAVA, Graph Theory, Computer Networks, Computer Graphics and Image Processing, and Distributed Computing.

Currently finishing my **Bachelor of Technology in Computer Science and Engineering** from APJ Abdul Kalam Technological University, Kerala, India, I have a commendable **CGPA of 7.87 (German Grade: 2.4.)**. Subjects such Engineering Physics, Basics of Civil and Mechanical Engineering, Object-Oriented Programming Using JAVA, Graph Theory, Computer Networks, Computer Graphics and Image Processing, and Distributed Computing have added richness to my academic path. Also I finished a project called "**Mobile Application and Algorithm Development for Expense Splitting**". In my academics, I have always done rather well; my 10th-grade tests came out at **89.4%** and my 12th-grade tests at **88.6%**.

Having followed my academic path, internships have given me real-world experience. Whereas my previous **internship at BDS Technology Pvt. LTD** involved marketing a Holiday Automation Booking system, my newest **internship at Tata Elxsi Limited** concentrated on Android OTT app development. These internships have given me in-field technological practical experience and insightful analysis. I have also shown my language ability by completing the **IELTS test with a 7.5 CEFR level—C1 overall score**.

**I want to study in Germany since I think the nation boasts unmatched excellence and inventiveness in its educational system.** I wish to gain from the combination of German universities' theoretical and pragmatic knowledge. I want to become part of a varied and active group of like-minded people and pick useful skills that will equip me for a successful career. I wish to live the contemporary, secure, creative lifestyle Germany is renowned for. These elements taken together have been very important in my choice to study in Germany.

**Of the universities I looked at, SRH University Heidelberg jumped out the most.** Modern buildings, a varied student body, and committed instructors at the institution help to create the perfect setting for learning and development. The Applied Data Science and Analytics degree appeals especially to me since it provides advanced technical skills, a thorough knowledge of data science ideas, and research capability. The program's emphasis on useful applications and real-world challenges exactly complements my professional objectives. The chance to work with peers on creative projects and learn from seasoned teachers excites me.

My personal experiences and goals drive me strongly toward this program. My internship at Tata Elxsi Limited helped me to see how data science might revolutionize sectors and enhance quality of life for individuals. Data analytics and its uses in the resolution of practical challenges excite me to learn more. Particularly fascinating to me are the Applied Data Science and Analytics program's modules—Data Mining, Machine Learning, and Big Data Analytics—that offer I am sure that the knowledge and abilities these courses will provide will help me to significantly contribute to the field of data science.

**Attending SRH University Heidelberg will afford me many intellectual, personal, and professional advantages.** Academically, I will have access to modern tools and a conducive classroom that will enable me to shine in my studies. For me personally, I will have the chance to grow globally, form lifetime connections, and really become immersed in another culture. Professionally, the program will provide me the tools and expertise need to follow a successful career in data science. The chance to collaborate with top businesses in the city and obtain insightful industry knowledge excites me especially.

**After finishing my education,** I want to be employed in positions such **Machine Learning Engineer, Data Analyst, or Data Scientist**. Working is especially interests me since the nation presents a strong employment market for data science experts. The Applied Data Science and Analytics program will provide me with the tools and knowledge necessary to participate to creative projects and have a positive influence in the sector. My long-term objective is to lead the data science sector and apply my knowledge to propel good changes in society.

**Ultimately,** I am sure that my background, knowledge, and love of data science qualify me to be a viable candidate for the Master in Applied Data Science and Analytics degree at SRH University Heidelberg. I am excited to offer the university my commitment and energy, so augmenting its active academic community. This program will, in my opinion, equip me with the information, tools, and chances required reaching my professional objectives and significantly influencing the field of data science.

Sincerely,  
**Anitta, Thomas**
