

Motivation Letter

Anitta, Thomas is my name, and I am quite excited to study **Data Science for Master's degree at TU Hamburg**. Having training in computer science and engineering, data analysis and machine learning have always captivated me. This program will let me expand my knowledge and abilities in the field of Data Science, so enabling me to reach my career objectives.

Currently finishing my **Bachelor of Technology in Computer Science and Engineering** from APJ Abdul Kalam Technological University, Kerala, India, I have a commendable **CGPA of 7.87 (German Grade: 2.4.)**. Subjects such Engineering Physics, Basics of Civil and Mechanical Engineering, Object-Oriented Programming Using JAVA, Graph Theory, Computer Networks, Computer Graphics and Image Processing, and Distributed Computing have added richness to my academic path. Also I finished a project called "**Mobile Application and Algorithm Development for Expense Splitting**". In my academics, I have always done rather well; my 10th-grade tests came out at **89.4%** and my 12th-grade tests at **88.6%**.

Having followed my academic path, internships have given me real-world experience. Whereas my previous **internship at BDS Technology Pvt. LTD** involved marketing a Holiday Automation Booking system, my newest **internship at Tata Elxsi Limited** concentrated on Android OTT app development. These internships have given me in-field technological practical experience and insightful analysis. I have also shown my language ability by completing the **IELTS test with a 7.5 CEFR level—C1 overall score**.

The Master in Data Science program at TU Hamburg appeals to me since it exactly fits my professional goals. This course provides a complete set of data science courses covering statistical analysis, machine learning, and ideas in data visualization. The practical uses of data science to address commercial problems especially interest me. During my internship at Tata Elxsi Limited, where I observed personally how data-driven solutions might enhance system performance, my passion in data science was sparked. The program's emphasis on doable projects and industry partner cooperation will give me insightful knowledge and experience. Further study in establishing new approaches and methods in data science—which this school stresses—excites me as well.

Germany's universities and outstanding educational standards appeal to me as the country to study in. Since the field of education in Germany is significantly superior, I wish to remain here. I wish to be among the rich German culture, diversity, and good exposure. Germany was my choice for my master's degree since it presents a solid foundation of tech enterprises and startups, hence giving lots of chances for internships and employment. Studying in Germany helps me to develop personally as well as professionally. Germany's cultural and historical backdrop as well as its kind attitude toward overseas students really captivate me. The availability of many scholarships and funding possibilities also appeals to me and makes this perfect location for students from all around the world.

TU Hamburg piques especially my attention since it is among Germany's top technical universities, well-known for its advanced research and courses grounded in experimentation. The university is perfect for me to finish my studies since of its sophisticated curriculum and concentration in data science. Working together with different research institutes and business leaders guarantees that students get useful information and experience. Modern computing facilities and research labs included in TU Hamburg's infrastructure are vital for a thorough education since they reflect The qualified faculty guarantees the caliber of instruction by include eminent researchers and business leaders. The busy student life and diverse university facilities will enable me to develop as a data scientist and interact with like-minded people.

Following completion of the Master's program in Data Science at TU Hamburg, I hope to find employment in positions including **Business Analyst, Data Scientist, or Machine Learning Engineer**. Using data-driven solutions, I wish to help to solve practical issues. Working is particularly interests me since the country boasts a robust employment market for techies. This degree will equip me with the skills and knowledge necessary for these positions, therefore guiding me towards a successful future in data science.

Therefore, the Master in Data Science degree TU Hamburg offers has all the knowledge, abilities, and experience required to fulfill my professional objectives. I think I qualify for this program given my solid academic record and relevant professional experience. The chance to study at TU Hamburg and help to advance data science excites me.

Sincerely,
Anitta, Thomas
