

Motivation Letter

My name is **Anitta, Thomas** and I am an Indian national. I'm writing to say how really interested I am in starting the **UE Data Science programme**. Having completed the **IELTS with an overall band score of 7.5**, I can be sure I am ready for this academic quest.

Currently finishing my **Bachelor of Technology in Computer Science and Engineering** from APJ Abdul Kalam Technological University, Kerala, India, I have a commendable **CGPA of 7.87 (German Grade: 2.4)**. Subjects such Engineering Physics, Basics of Civil and Mechanical Engineering, Object-Oriented Programming Using JAVA, Graph Theory, Computer Networks, Computer Graphics and Image Processing, and Distributed Computing have added richness to my academic path. Also I finished a project called "**Mobile Application and Algorithm Development for Expense Splitting**". In my academics, I have always done rather well; my 10th-grade tests came out at **89.4%** and my 12th-grade tests at **88.6%**.

Having followed my academic path, internships have given me real-world experience. Whereas my previous **internship at BDS Technology Pvt. LTD** involved marketing a Holiday Automation Booking system, my newest **internship at Tata Elxsi Limited** concentrated on Android OTT app development. These internships have given me in-field technological practical experience and insightful analysis.

The UE Data Science program exactly aligns with both my academic background and career goals. During my college studies, particularly as I came to see how greatly data-driven decisions may affect many industries including banking, healthcare, and technology, my passion in data science was sparked. Emphasizing empirical research and quantitative analysis, the program's extensive course will provide me with advanced knowledge for comprehending and addressing difficult data-related challenges.

From the Data Science program, I hope to be able to apply statistical techniques to practical situations and examine big datasets. I will develop a thorough awareness of data science theories and their useful relevance in many different sectors. I will also acquire advanced programming language abilities in Python and R, statistical software, and data visualization tools, thereby arming me to offer insightful analysis and recommendations.

After finishing this degree, I want to be employed as a **Data Scientist for a top technological business**. In this capacity, I aspire to support data-driven plans aiming at long-term success. The knowledge and abilities this program provides will enable me to reach my objective and provide a strong basis for my future employment.

For several very convincing reasons, I have decided UE going forward. First of all, UE is well-known for its knowledge in data science research and instruction. Second, the varied and foreign student body of the university provides insightful cultural encounters and a worldwide view on data concerns. Furthermore, the facilities and tools at hand for students will greatly enhance my educational process. Finally, a key component of this curriculum is the chance to grow from eminent faculty members who are authorities in their domains.

For other reasons as well, Germany is a great place for my additional study. Germany's great educational system and emphasis on research and invention appeal to me as a study destination. The field of education in Germany is significantly better, hence I wish to remain here. I wish to be among the rich German culture, diversity, and good exposure. Germany will enable me to develop both personally and professionally, hence I wish to pick it for my master's degree. The facts on Germany and its culture will help me to grow from them and guide my choice to study here.

This curriculum at your university will definitely provide me the tools I need to flourish both personally and academically. The opportunity to add to and gain from the active intellectual community at your esteemed university excites me.

Sincerely,
Anitta, Thomas
