

## Motivation Letter

I am **Anitta, Thomas** having a strong academic background in computer science and engineering. It gives me great pleasure to show my desire in **Master's degree in Applied Data Science at the University of Göttingen**. This letter summarizes my credentials, goals for this program, and reasons behind them.

Currently finishing my **Bachelor of Technology in Computer Science and Engineering** from APJ Abdul Kalam Technological University, Kerala, India, I have a commendable **CGPA of 7.87 (German Grade: 2.4)**. Subjects such Engineering Physics, Basics of Civil and Mechanical Engineering, Object-Oriented Programming Using JAVA, Graph Theory, Computer Networks, Computer Graphics and Image Processing, and Distributed Computing have added richness to my academic path. Also I finished a project called "**Mobile Application and Algorithm Development for Expense Splitting**". In my academics, I have always done rather well; my 10th-grade tests came out at **89.4%** and my 12th-grade tests at **88.6%**.

Having followed my academic path, internships have given me real-world experience. Whereas my previous **internship at BDS Technology Pvt. LTD** involved marketing a Holiday Automation Booking system, my newest **internship at Tata Elxsi Limited** concentrated on Android OTT app development. These internships have given me in-field technological practical experience and insightful analysis. I have also shown my language ability by completing the **IELTS test with a 7.5 CEFR level—C1 overall score**.

**Germany's strong focus on innovation, research, and high-quality education drives me to seek my higher degree there.** I wish to participate in a vibrant academic atmosphere that supports intellectual growth and application of knowledge. With its strong economy and industrial and technology sector leadership, Germany seems to be the perfect setting for my academic and career development. I wish to be surrounded in a cosmopolitan setting that would improve my own growth and widen my viewpoint on the world.

**Data has always captivated me since it has great power to guide decisions.** My bachelor's degree piqued my especially interest in how data analysis may enhance corporate operations. My internships underlined even more the need of data-driven decision-making for the survival of companies. I still clearly recall working on a project at Tata Elxsi, where user experience of our Android OTT app was much enhanced by data analysis. This encounter confirmed my choice to work on a Master's degree in Applied Data Science. To properly contribute to the subject, I wish to learn more analytical techniques and their strategic uses.

**Directly connected to my interests and professional aspirations, the Applied Data Science program at the University of Göttingen provides modules in Data Mining, Machine Learning, and Big Data Analytics.** The chance to work with like-minded colleagues and learn from seasoned faculty members excites me especially. The technical knowledge and interpersonal skills I will acquire from this program will, in my opinion, help me to make wise judgments and stimulate creativity in my next employment.

**Strong reputation and academic excellence of the University of Göttingen appeal to me as a study partner.** Ranked among the best universities worldwide, the university offers an inspiring setting for intellectual development and creativity. Having more than 30,000 students, the university presents a varied and active community. For my studies, the modern facilities, seasoned professors, and central Göttingen location make it perfect. The university's partnerships with leading companies also appeal to me since they give insightful exposure to practical scenarios. Furthermore providing many chances for both personal and professional development is Göttingen, with its rich cultural legacy and active employment market.

**After receiving my Master's degree,** I hope to land positions as **Data Scientist, Business Analyst, or Machine Learning Engineer**. Want to work, where data science is fast expanding, piques especially my interest. The Applied Data Science program at the University of Göttingen will provide me information and abilities that will help me to solve challenging data problems and support creative ideas. Using my knowledge will help me to influence society positively and propel corporate development. Apart from that, I intend to keep growing professionally by always studying and keeping current with the most recent developments in the area.

**Ultimately,** I am sure that working for a Master's degree in Applied Data Science at the University of Göttingen will greatly forward my career. Joining a program that fits my interests and ambitions excites me, and I think the University of Göttingen will offer the ideal stage for me to fulfill my dreams. Please give my application some thought and give me the chance to join this prestigious university.

Sincerely,  
**Anitta, Thomas**
