

Statement of Intent

I am **Arijeet, Dutta**. The world of electronics and its countless opportunities have always captivated me. Up thus far, my academic and career path has been motivated by this obsession. Having a good background in electrical engineering from the National Institute of Technology, Raipur (NIT Raipur), I am eager to work on a **Master's degree in micro- and nanoelectronics at BTU Cottbus**. My passion for this profession stems from my wish to help to bring about technological developments and ideas that might have a major influence on society.

Having graduated from the National Institute of Technology, Raipur, India, with an excellent **score of 8.90 CPI (German Grade: 1.6)**, I hold **Bachelor of Technology in Electrical Engineering**. I studied basic electrical engineering, computer programming, electrical measurement and instrumentation, electrical circuit and network analysis, control system engineering, high voltage engineering, and smart grid technology undergradually. I passed my Senior School Certificate Examination (Class 12th) with a **score of 94.2% (German Grade: 1.2)** and my All India Secondary School Examination (Class 10th) with a score of **95.8% (German Grade: 1.1)**.

Over my academic career, I have attended numerous seminars and training courses including a workshop on **artificial intelligence with Deep Learning run** by Learn& Build powered by TechieNest Pvt. LTD. and training in **Catia & Ansys** from Skill Vertex. Currently employed as a **Business Technology Solutions Associate at ZS Associates India Private Limited**, my professional experience spans an ongoing position. My internships have given me a variety of experiences including **designing a low-cost compact electric car** at IIT Patna, working on **ophthalmic devices for eye-disease detection** at **NETR AI PVT. LTD**, and doing industrial robots at Mukkudal robots. Along with classes in **Robotics, Introduction to the Internet of Things and Embedded Systems, and Rocket Propulsion**, I finished technical certifications like the ThoughtSpot Professional Certification. With a **CEFR Level of C1**, my **IELTS score of 7.0** reflects my English competency.

During my summer internship at NIT Raipur, working on a project called "Power Generation & Transmission," my curiosity in micro- and nanoelectronics began. The minute elements of this sector captivated me, and I came to see the great creative possibilities it presents for technological development. The Micro- and Nanoelectronics curriculum at BTU Cottbus appeals especially to me because of its modules, "Advanced Microelectronics" and "Nanoelectronic Devices." These courses will help me to grasp the topic more fully and give me the technical tools and expertise needed to succeed in this discipline. This training will not only improve my technical skills but also enable me to acquire interpersonal skills absolutely vital for career development.

Joining BTU Cottbus, a university well-known for its outstanding research possibilities and academic standards, excites me. Modern facilities, seasoned professors, and active campus life of the university make it perfect for my academic and personal development. With more than 7,000 pupils, BTU Cottbus provides a varied and inclusive setting that promotes creativity and cooperation. BTU Cottbus also has a number of eminent Micro- and Nanoelectronics research facilities and faculty members. The institution is the perfect fit for my professional goals since of its close ties to the business and nearby businesses, which offer lots of chances for internships and job placements. Furthermore, Cottbus provides a suitable setting for both intellectual and personal development with its rich cultural legacy and active community.

After earning my Master's degree in Micro- and Nanoelectronics, I hope to be employed in positions such **Semiconductor Device Engineer, Microelectronics Engineer, or Nanoelectronics Researcher**. The knowledge and abilities this curriculum will provide will help me to help to create creative electronic gadgets and systems. Working particularly interests me since it is well-known for its robust industrial base and electronic technology developments.

Germany's outstanding educational system and the chances it presents for research and creativity inspire me to apply here. Germany is where I wish to stay since the field education there is significantly superior. I wish to be among the rich German culture, diversity, and good exposure. Germany's world-class universities and research possibilities have convinced me that this country should be my Master's program site. Studying in Germany helps me to develop personally as well as professionally. Learning about Germany's customs and culture will assist me to widen my horizons and get a worldwide view.

Ultimately, I am sure that my academic background, real-world experience, and enthusiasm for Micro- and Nanoelectronics qualify me for the Master of Science program at BTU Cottbus. Using my work will help me to significantly influence the field and contribute to its development. The chance to attend BTU Cottbus and advance toward reaching my professional objectives excites me.

I value that you are giving my application some thought.

**With sincerity,
Arijeet, Dutta**
