

Declaration of Intent

I am **Arijeet, Dutta** and I am writing this statement of intent to show my interest, drive, and great will to follow the **Master of Science in Industrial Management in Microelectronics program at Dresden International University** in Germany.

Having graduated from the National Institute of Technology, Raipur, India, with an excellent **score of 8.90 CPI (German Grade: 1.6)**, I hold **Bachelor of Technology in Electrical Engineering**. I studied basic electrical engineering, computer programming, electrical measurement and instrumentation, electrical circuit and network analysis, control system engineering, high voltage engineering, and smart grid technology undergradually. I passed my Senior School Certificate Examination (Class 12th) with a **score of 94.2% (German Grade: 1.2)** and my All India Secondary School Examination (Class 10th) with a score of **95.8% (German Grade: 1.1)**.

Over my academic career, I have attended numerous seminars and training courses including a workshop on **artificial intelligence with Deep Learning run** by Learn& Build powered by TechieNest Pvt. LTD. and training in **Catia & Ansys** from Skill Vertex. Currently employed as a **Business Technology Solutions Associate at ZS Associates India Private Limited**, my professional experience spans an ongoing position. My internships have given me a variety of experiences including **designing a low-cost compact electric car** at IIT Patna, working on **ophthalmic devices for eye-disease detection** at **NETR AI PVT. LTD**, and doing industrial robots at Mukkudal robots. Along with classes in **Robotics, Introduction to the Internet of Things and Embedded Systems, and Rocket Propulsion**, I finished technical certifications like the ThoughtSpot Professional Certification. With a **CEFR Level of C1, my IELTS score of 7.0** reflects my English competency.

My intense passion in the subjects of industrial management and microelectronics drives me to get this master's degree. During my undergraduate studies, especially in courses like Smart Grid Technology and High Voltage Engineering, my passion with electronics started. One major turning point was my internship at IIT Patna, where I helped to create a low-cost, tiny electric car. This knowledge helped me to see how microelectronics could shape industrial management going forward. Essential subjects including semiconductor technology, production management, and quality control—which exactly match my professional objectives—are taught in Dresden International University. Modules like Semiconductor Manufacturing and Production Management especially interest me since they will equip me the technical knowledge and practical skills required to succeed in this sector.

The outstanding reputation of Dresden International University and the chances it presents have convinced me that I should study there. The university is well-known for emphasizing technical and engineering courses rather strongly. Its modern facilities and varied student body would help me to have a suitable study atmosphere. Friends of mine who have attended this university have had really positive experiences that have shaped my choice heavily. The university's research facilities engage in innovative work; the faculty members are authorities in their disciplines. With firms like Infineon Technologies and GlobalFoundries providing outstanding employment possibilities for graduates, Dresden, the city where the institution is situated, is a technological and innovative hub. Rich cultural legacy and active community make the city perfect for both intellectual and personal development.

This program will equip me with the information and tools I need to reach my objectives; I want to work in industrial management and microelectronics. I want to be in positions such **semiconductor process engineer, quality control manager, or manufacturing manager**. The program's emphasis on interpersonal as well as technical abilities will equip me for these roles and enable me negotiate the complexity of the industrial sector. Working in particularly interests me since it leads in technology and engineering and presents lots of chances for professional development.

Germany's great educational system and the chances it presents for international students motivate me to study there. I want to remain in Germany since the field of education there is much better. The exposure to German culture and variety will enhance my educational process and enable me to develop personally and professionally alike. Germany is a perfect location for me to complete my master's degree because of its strong focus on research and innovation as well as stable employment market. The nation's rich cultural legacy, great quality of living, and friendly surroundings for overseas students confirm my choice to study here even more.

Having a good basis from my past academics, I am quite committed and driven. From a worldwide standpoint, I really want to help this master's program to be significantly noteworthy. Starting the path in industrial management and microelectronics at Dresden International University excites me. Following this training, the knowledge and abilities I pick up will enable me to create a fulfilling profession. I value your giving my application some thought.

With sincerity,
Arijeet, Dutta
