

Letter of Motivation

From Bhilai, Chhattisgarh, I am **Arijeet, Dutta**, an Indian student writing to convey my zeal and excitement for **Master of Electronics Engineering at HS Bremen**. From my early years, the transforming potential of technology and how it influences our environment captivate me. Having a solid background in electrical engineering, I am excited to expand my knowledge and abilities in this discipline at a famous university like HS Bremen.

Having graduated from the National Institute of Technology, Raipur, India, with an excellent **score of 8.90 CPI (German Grade: 1.6)**, I hold **Bachelor of Technology in Electrical Engineering**. I studied basic electrical engineering, computer programming, electrical measurement and instrumentation, electrical circuit and network analysis, control system engineering, high voltage engineering, and smart grid technology undergradually. I passed my Senior School Certificate Examination (Class 12th) with a **score of 94.2% (German Grade: 1.2)** and my All India Secondary School Examination (Class 10th) with a score of **95.8% (German Grade: 1.1)**.

Over my academic career, I have attended numerous seminars and training courses including a workshop on **artificial intelligence with Deep Learning run** by Learn& Build powered by TechieNest Pvt. LTD. and training in **Catia & Ansys** from Skill Vertex. Currently employed as a **Business Technology Solutions Associate at ZS Associates India Private Limited**, my professional experience spans an ongoing position. My internships have given me a variety of experiences including **designing a low-cost compact electric car** at IIT Patna, working on **ophthalmic devices for eye-disease detection** at **NETR AI PVT. LTD**, and doing industrial robots at Mukkudal robots. Along with classes in **Robotics, Introduction to the Internet of Things and Embedded Systems, and Rocket Propulsion**, I finished technical certifications like the ThoughtSpot Professional Certification. With a **CEFR Level of C1, my IELTS score of 7.0** reflects my English competency.

A personal experience during my years of education piqued my interest in electronics engineering. I recall clearly the day my father brought our first computer home. Its powers enthralled me, and I lost many hours investigating its features. This pique of interest drove me to study electrical engineering. The thorough course of the Master's degree in Electronics Engineering at HS Bremen appeals especially to me. The provided modules, Smart Grid Technology and High Voltage Engineering, perfectly align with my academic interests and professional objectives. Learning from the seasoned professors and getting understanding from the university's research excites me. The program's emphasis on hands-on instruction will equip me to meet demands in the real world and significantly advance the field.

Reputation of HS Bremen as a top authority in electronics engineering is well-known. My subsequent studies would be perfect at the institution because of its modern buildings, varied student population, and encouraging academic atmosphere. The chance to interact with academics and fellow students and professors who are equally passionate about electrical engineering excites me as well. Furthermore presenting many chances for professional development and networking is the city of Bremen, with its rich cultural legacy and booming tech sector. Bremen's local employment market is strong, and many businesses aggressively seek graduates of the Electronics Engineering program, offering first-rate professional pay.

The great level of education and the practical learning method in Germany appeal to me as the place to study. Studying in Germany will, in my opinion, expose me globally and offer the varied viewpoints required to succeed in my field. Germany is where I want to stay as field education here is significantly superior. I wish to encounter the German culture, diversity, and good exposure. Germany's dedication to research and creativity convinced me that it would be the ideal location for my master degree. Immersion in German culture, language acquisition, and close relationships with people from all around the globe will help me improve personally and professionally. I value the nation's great cultural legacy and emphasis on academic performance.

After earning my Master's degree, I want to get employed at a top **IT business as a software engineer or data scientist**. The study at HS Bremen will provide me superior knowledge and abilities that will help me to solve difficult technological problems and support the creation of creative ideas. Working is especially interests me since the tech sector is booming and presents lots of chances for professional development. With the knowledge and experience I will acquire at HS Bremen, I am sure that a successful and fulfilling career in electronics engineering will be opened for me.

Ultimately, I think a big step in reaching my objectives will be a chance to study a Master of Electronics Engineering at HS Bremen. The curriculum will equip me with the information, abilities, and experiences required to succeed in my area and significantly contribute to the tech sector, so I am sure. I am hoping to get the chance to continue my graduate work at your prestigious university.

I value that you are giving my application some thought.

**With sincerity,
Arijeet, Dutta**
