

Motivation Letter

Arijeet, Dutta is my full name, and I respectfully like to apply to **PFH of New Mobility for the Master of Science degree**. Having been born in Bhilai, Chhattisgarh, India, on June 24, 2002, I have always been driven about technology and engineering. Having a strong academic foundation in Electrical Engineering and a lot of experience from internships, I am motivated and eager to expand my knowledge in this area via the great program this prestigious university.

Having graduated from the National Institute of Technology, Raipur, India, with an excellent **score of 8.90 CPI (German Grade: 1.6)**, I hold **Bachelor of Technology in Electrical Engineering**. I studied basic electrical engineering, computer programming, electrical measurement and instrumentation, electrical circuit and network analysis, control system engineering, high voltage engineering, and smart grid technology undergradually. I passed my Senior School Certificate Examination (Class 12th) with a **score of 94.2% (German Grade: 1.2)** and my All India Secondary School Examination (Class 10th) with a score of **95.8% (German Grade: 1.1)**.

Over my academic career, I have attended numerous seminars and training courses including a workshop on **artificial intelligence with Deep Learning run** by Learn& Build powered by TechieNest Pvt. LTD. and training in **Catia & Ansys** from Skill Vertex. Currently employed as a **Business Technology Solutions Associate at ZS Associates India Private Limited**, my professional experience spans an ongoing position. My internships have given me a variety of experiences including **designing a low-cost compact electric car** at IIT Patna, working on **ophthalmic devices for eye-disease detection** at **NETR AI PVT. LTD**, and doing industrial robots at Mukkudal robots. Along with classes in **Robotics, Introduction to the Internet of Things and Embedded Systems, and Rocket Propulsion**, I finished technical certifications like the ThoughtSpot Professional Certification. With a **CEFR Level of C1, my IELTS score of 7.0** reflects my English competency.

I became quite interested in micro mobility solutions while in my bachelor's program, and I scored highly in disciplines including Control System Engineering and Smart Grid Technology. My love of programming languages including C and Python as well as electrical circuits and control systems has sharpened my ability to solve problems. Along with finishing projects like "Ophthalmic Devices for Eye-Disease Detection" and "Design and Development of QUAD Bike," I also scored highly in practical labs including Electrical Measurement and Instrumentation. These encounters have sharpened my practical understanding and equipped me to use theoretical ideas in pragmatic situations.

PFH University appeals especially to me because of its emphasis on developing technology and strong industry relations. Specialized courses in the Master's degree in New Mobility - Micro Mobility that fit my interests, including "Sustainable Urban Mobility" and "Innovative Vehicle Concepts," abound. The practitioner-oriented strategy of the institution guarantees job preparation, hence I am enthusiastic to interact with creative technologies and learn from its prestigious staff. Given the chance, I am sure I will be valuable to PFH. The university's dedication to give overseas students a safe and culturally varied surroundings confirms my choice to study there even more.

Applying for a Master's degree abroad will enable me to advance my academic career; Germany was chosen based on its outstanding reputation in world education. Germany respects education, particularly in science and technology, hence I would like to study there. Surrounded by an environment that encourages cultural variety and provides international students with a safe haven is what I wish. To improve my learning process, I would wish to welcome the variety and rich German culture. In a country known for its wide cultural and historical legacy, tolerance, and friendly attitude, I wish to develop both personally and professionally. I wish to grow in abilities that will enable me to succeed in my profession and support the worldwide micro mobility sector.

Following my schooling, I hope to improve India's professional IT scene. There are lots of possibilities since the IT sector is expected to expand greatly. Having received foreign education will provide me a competitive edge in positions like **Urban Mobility Planner or Micro Mobility Engineer in top companies**. Using my IoT and micro mobility expertise, I am enthusiastic to help government initiatives such Smart Cities Mission. India wants to lead the world in sustainable transportation solutions, hence the information gained outside will be absolutely important. My Indian background and this worldwide experience will help me to combine local creativity with global norms.

Being a committed student, my aim is to work for a famous company, pick up fresh abilities, and help it to flourish constantly. Aiming to improve the campus atmosphere by active participation, I bring the same dedication to my academic path. I intend to launch a socially conscious startup emphasizing innovation and helping causes including poverty, education, and healthcare in the future. My academic performance, work experience, and genuine love of micro mobility thus enable me to decide that the Master of Science in New Mobility - Micro Mobility at PFH University is the appropriate course of study for me. I am ready to completely grab the opportunities the university offers and engage in its academic community.

I value your considering of my application. The possibility of maybe visiting PFH University and forward my academic and career route intrigues me. Thank you.

With sincerity,
Arijeet, Dutta
