

Motivation Letter

Graduating from the National Institute of Technology, Raipur, India, with a Bachelor of Technology in Electrical Engineering, my name is **Arijeet, Dutta**. Applying for the renowned **RPTU University of Kaiserslautern Landau, Germany's Master's program in Automation and Control** excites me.

Having graduated from the National Institute of Technology, Raipur, India, with an excellent **score of 8.90 CPI (German Grade: 1.6)**, I hold **Bachelor of Technology in Electrical Engineering**. I studied basic electrical engineering, computer programming, electrical measurement and instrumentation, electrical circuit and network analysis, control system engineering, high voltage engineering, and smart grid technology undergradually. I passed my Senior School Certificate Examination (Class 12th) with a **score of 94.2% (German Grade: 1.2)** and my All India Secondary School Examination (Class 10th) with a score of **95.8% (German Grade: 1.1)**.

Over my academic career, I have attended numerous seminars and training courses including a workshop on **artificial intelligence with Deep Learning run** by Learn& Build powered by TechieNest Pvt. LTD. and training in **Catia & Ansys** from Skill Vertex. Currently employed as a **Business Technology Solutions Associate at ZS Associates India Private Limited**, my professional experience spans an ongoing position. My internships have given me a variety of experiences including **designing a low-cost compact electric car** at IIT Patna, working on **ophthalmic devices for eye-disease detection** at **NETR AI PVT. LTD**, and doing industrial robots at Mukkudal robots. Along with classes in **Robotics, Introduction to the Internet of Things and Embedded Systems, and Rocket Propulsion**, I finished technical certifications like the ThoughtSpot Professional Certification. With a **CEFR Level of C1, my IELTS score of 7.0** reflects my English competency.

Germany is a global leader in sectors such automotive, electronics, and manufacturing, which mostly depend on automation and control systems, hence I wish to study there. Germany's educational system is significantly better, hence I wish to remain there. Experiencing the rich German culture, diversity, and great exposure will enable me to grow both personally and professionally. Germany fosters entrepreneurship and innovation, hence studying there will help startups and new businesses by means of resources and support. I wish to live in a nation that celebrates creativity and technology so that recent grads have great employment possibilities.

Particularly in the domains of science and engineering, RPTU University of Kaiserslautern Landau is well-known for its high academic standards and outstanding research output, hence I wish to apply there. The university's modern facilities and sizable student body really excite me since they will provide a stimulating classroom. Though I do not know anyone personally at the university, I have heard wonderful things about its teachers and campus site. The study centers and teachers connected to the Automation and Control program especially appeal to me. Kaiserslautern is the perfect destination for me to study because of its active culture and lots of attractions. Furthermore, the local employment market is robust; many businesses are hiring graduates of this program, therefore enhancing my professional growth.

Automation and Control appeals to me since it has always captivated me how systems might be built to run precisely and effectively with minimum human involvement. Working on Industrial Robotics during my internship at Mukkudal Robotics piqued my enthusiasm in this topic. This experience with my Electrical Engineering degree have helped me be ready for this program. Modules like Control System Engineering and Smart Grid Technology especially fascinate me since they will provide with the technical know-how and interpersonal skills required to succeed in this industry. This course will help me personally by letting me work on creative ideas and professionally by creating career prospects in several sectors.

Following my Master's in Automation and Control, I want to work. The curriculum will provide me chances to work in professional roles such **robotics engineer, control systems engineer, and automation engineer**. Working on initiatives that lower human intervention and increase efficiency will help me to contribute to the field. I think the information and abilities this program will equip me for a prosperous future.

Ultimately, I am quite driven to seek my Master's degree in Automation and Control at RPTU University of Kaiserslautern Landau. My ideal candidate for this program is myself because of my academic background, practical experience, and field love. The chance to study in Germany and help to advance automation and control excites me.

I value your giving my application some thought.

**With sincerity,
Arijeet, Dutta**
