

Motivation Letter

Arijeet, Dutta is my full name, and I respectfully like to apply to **Ravensburg-Weingarten University of Applied Sciences for the Master of Science degree in Electrical Engineering and Embedded Systems**. Having been born in Bhilai, Chhattisgarh, India, on June 24, 2002, I have always been driven about technology and engineering. Having a strong academic foundation in Electrical Engineering and a lot of experience from internships, I am motivated and eager to expand my knowledge in this area via the great program this prestigious university has.

Having graduated from the National Institute of Technology, Raipur, India, with an excellent **score of 8.90 CPI (German Grade: 1.6)**, I hold **Bachelor of Technology in Electrical Engineering**. I studied basic electrical engineering, computer programming, electrical measurement and instrumentation, electrical circuit and network analysis, control system engineering, high voltage engineering, and smart grid technology undergradually. I passed my Senior School Certificate Examination (Class 12th) with a **score of 94.2% (German Grade: 1.2)** and my All India Secondary School Examination (Class 10th) with a score of **95.8% (German Grade: 1.1)**.

Over my academic career, I have attended numerous seminars and training courses including a workshop on **artificial intelligence with Deep Learning** run by Learn& Build powered by TechieNest Pvt. LTD. and training in **Catia & Ansys** from Skill Vertex. Currently employed as a **Business Technology Solutions Associate at ZS Associates India Private Limited**, my professional experience spans an ongoing position. My internships have given me a variety of experiences including **designing a low-cost compact electric car** at IIT Patna, working on **ophthalmic devices for eye-disease detection** at **NETR AI PVT. LTD**, and doing industrial robots at Mukkudal robots. Along with classes in **Robotics, Introduction to the Internet of Things and Embedded Systems, and Rocket Propulsion**, I finished technical certifications like the ThoughtSpot Professional Certification. With a **CEFR Level of C1, my IELTS score of 7.0** reflects my English competency.

My passion with how technology may address practical issues drives me into Electrical Engineering and Embedded Systems. Working on a low-cost compact electric vehicle while interning at IIT Patna set me on a path toward embedded systems. My experience in industrial robotics at Mukkudal Robotics also confirmed my inclination to concentrate in this discipline. The courses in Embedded Systems Design, Advanced Control Systems, and Smart Grid Technology this program offers really appeal to me. These courses will provide me with both technical knowledge and useful skills—qualities necessary to handle contemporary engineering problems.

Studying Electrical Engineering and Embedded Systems will, in my opinion, provide me the required tools to innovate and advance the profession. The program's emphasis on practical uses and research projects will help me to work on innovative technologies and cooperate with business partners. This course will help me personally by improving my problem-solving and teamwork skills as well as professionally by creating doors to demanding employment prospects.

Germany's high standards in education and strong focus on research and development—especially in engineering and technology—have me applying there. The field of education in Germany is significantly better, hence I wish to remain here. I wish to be among the rich German culture, diversity, and good exposure. Germany's creative atmosphere and chance to engage with numerous points of view and ideas have convinced me that this country should be my master's program choice. I wish to study in Germany so that I may develop personally and professionally. Germany's culture encourages accuracy, efficiency, and creativity, hence it would be the ideal location for my academic and career goals. I want to really absorb everything.

Ravensburg-Weingarten University of Applied Sciences appeals especially to me because of its emphasis on applied research and high caliber instruction. The facilities of the university, which include contemporary classrooms and well-equipped labs, will create a first-rate learning atmosphere. Although I do not know anyone personally at the university, its standing and chances for entrepreneurship and innovation really inspire me. Studying in Weingarten appeals even more because of its lovely surroundings and active culture. Furthermore appealing to me for my future employment is the local job market, which features businesses which employ program graduates.

After earning my Master of Science in Electrical Engineering and Embedded Systems, I hope to be employed in positions such **Automation Engineer, Electrical Design Engineer, or Embedded Systems Engineer**. Helping to create sustainable energy solutions and smart grid technologies piques especially my interest in Working, where the engineering industry is renowned for its inventiveness and quality, is what I want. This degree will equip me the tools and knowledge required to succeed in these positions and significantly influence the field of electrical engineering.

At Ravensburg-Weingarten University of Applied Sciences, I am excited to use my aptitudes and desire to acquire the Master of Science in Electrical Engineering and Embedded Systems. This education will surely provide me the tools I need to excel in my chosen industry and help technology to develop. My interest in this esteemed university stems from my will to change the engineering field and from my passion of learning. The chance to keep developing academically and professionally at Ravensburg-Weingarten University of Applied Sciences excites me.

With sincerity,
Arijeet, Dutta
